

**YOUNG SPARK TODAY.
POTENTIAL CHAMPIONS
TOMORROW.**

**BARODA BNP PARIBAS
MID CAP FUND**

The Fund identifies mid-cap companies with high growth potential and ability to become leaders of tomorrow.

**KEY
BENEFITS**

Invests predominantly in mid-capitalization companies with high growth potential.

Aims to create wealth in the long term.

Provides access to wider and niche sectors.

FUND FACTS | April 2026

Baroda BNP Paribas Mid Cap Fund

(An Open ended Equity Scheme predominantly investing in mid cap stocks)

This product is suitable for investors who are seeking*:

- ▶ Wealth Creation in long term.
- ▶ Investments in companies in mid capitalization segment.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Scheme Riskometer[^]

Investors understand that their principal will be at Very High risk.

For detailed portfolio refer page no. 9

[^]basis portfolio of the Scheme as on April 30, 2026.

Market Outlook - Equity

After a sharp sell-off in March 2026 on account of US-Iran war, April 2026 saw healthy recovery across global markets despite the on-going conflict in West Asia. Nifty 50 was up by 7.5% for the month of April. Amongst Asian markets, South Korean market (KOSPI), Taiwan Index, and Japan's NIKKEI 225 Index saw the biggest gains in April of 30.6%, 22.7% and 16.1% respectively. Korea and Taiwan continued to see traction in Artificial Intelligence (AI) and Semi-conductor segment.

Amongst developed European economies, German index DAX was up by 7.1% followed by French CAC 40 Index (+3.8%) and FTSE 100 Index (UK) by 2%. US index Nasdaq was up by 15.3%, while S&P 500 was up by 10.4%

Indian midcap and small cap index saw sharp rally during the month with Nifty Small Cap 250 Index up by 17% and Nifty Midcap 150 Index by 13.2%. Sector wise all the sectors were in green with BSE Realty by 21.4%, followed by BSE Cap Goods (+20.2%), BSE Metals (+14.6%), BSE Consumer Durables (+12.3%), Consumer Discretionary (+12%), BSE Banks (+9.1%), BSE Oil (+8.3%) and BSE Healthcare (+6.8%).

With geo-political risk, global macro headwinds, weakening rupee and risk of inflation inching up due to rising crude oil prices, FPI flows in April 2026 remained negative with net outflow of USD 4.2bn. Amongst emerging economies, Brazil continues to see positive inflows for CY2026 with net inflow of USD 1.6bn in April. After a massive sell off, Taiwan and South Korea saw net inflow of USD 8.4bn and USD 599mn respectively led by strong demand in Artificial Intelligence (AI) and Semi-conductor segment.

On 8th April 2026, US-Iran announced a two-week ceasefire for negotiations. However, after a failed attempt, US extended the ceasefire till 21st April 2026. The Strait of Hormuz continues to remain closed, disrupting global supply chain and energy markets. On account of the current crude crisis and higher energy prices the IMF has cut its global growth forecast by 20 bps. Growth is expected to be at 3.1% in 2026 and 3.2% in 2027.

Locally, RBI has kept the repo rate unchanged at 5.25% and stance of policy also remains unchanged at neutral. RBI remains focused on growth and there was no indication of a rate hike anytime soon. Manufacturing activities slowed down in March due to cost pressure, market uncertainty, and Middle East crisis leading to softer increases in new orders and output. Manufacturing PMI eased to 53.9 in March 2026 as against 56.9 in February, lowest since June 2022. Services PMI declined to 57.5 in March 2026 from 58.1 in February 2026. Exports declined 7.4% YoY in March 2026 to USD 38.9bn while imports declined 6.5% YoY to 59.6bn primarily due to decline in oil imports.

Corporate India started reporting its quarterly numbers. 161 companies out of Nifty 500 companies reported double digit growth for Q4FY26. Sales/EBITDA/PAT grew by 12.8%/11.6%/14.2% respectively. For the banking sector, system saw a bump in credit growth coming at 17% YoY with growth being broad-based across sectors. Key management commentaries suggest pickup in personal loans, continued growth momentum in gold, business banking and mid-corporates segments. The quarter witnessed meaningful reduction in slippages and better recoveries leading to improvement in credit cost. IT services companies reported revenue growth lower than expectations due to client specific issues and delay in the deal ramp ups. Slight margin contraction was also seen this quarter led by seasonality and select wage hikes which was offset by currency gains.

The impact of elevated oil prices and depreciation of rupee is yet to impact corporate India's profitability. Resolution of the West Asia conflict, progress of monsoon, potential supply chain disruptions and input cost pressures, will be key monitorable. These can weigh on inflation and growth dynamics, especially in H1FY27. On the positive side, the current result season remains upbeat so far, water reservoir levels appear to be adequate, companies have not yet raised material red flags on demand due to the war, there are hints of private capex picking up (via both organic and inorganic route), all of which will likely keep demand driven nominal growth healthy in the year. Trailing Nifty valuations have now reverted to lower than the historical average to a PE of 22.3x as of April-end, as compared to the 10-year average trailing Nifty PE of 23.2x.

Market Outlook - Fixed Income

Debt Market Commentary May-2026

The ongoing conflict in West Asia has reignited global inflationary concerns, primarily driven by its impact on energy markets. What initially appeared to be a short-term spike in crude oil prices is now showing signs of persistence, as supply disruptions continue to deepen. With transit channels under strain, the sustained elevation in oil prices is increasing cost pressures across economies, thereby amplifying fears of prolonged inflation on a global scale. The exposure to higher oil prices and supply uncertainty differ across countries shaped by whether they import or export, and how much policy space they have to respond.

Oil Importers and exporters by rating

Source: IMF, Data as on April 22nd, 2026

In the cusp of the war, Asian economies are facing the brunt, being the major buyer of oil and gas shipped through the Strait of Hormuz. Asian economies account for about 80% of LNG exported through the waterway. This disruption is already causing local shortages of petroleum products and gas, especially in countries with limited stockpiles. The direct impact is visible in their currencies of net importers of crude and gas, facing depreciating pressures. The second related impact is spillovers on import inflation and subsequently on rates.

Net imports of oil and gas, percent of GDP

Source: IMF, Data as on April 22nd, 2026

Interest rates in advanced economies are generally expected to remain on hold reversing any outlook on softening of rates as to maintain disinflation. In US Fed made no policy move in line with expectations. The federal funds stayed at 3.5%-3.75%. Although the voting pattern reflected, FOMC was moving closer to being explicitly neutral with three dissents in favour of shifting to a neutral bias. Powell continued with its ties with FED as a noninterfering governor in way to fight for FED's independence. He will remain on the Fed board, acting as a central bank governor. The upcoming FED chair Kevin Warsh, fuels uncertainty about the hawkishness of FED's future policy outlook.

In Japan, where inflation expectations are rising to near target, the central bank is expected to remain on pause while withdrawing accommodation during the first round of the energy shock. EU too is facing inflationary pressures driven by high gas prices. Less fiscal space since the pandemic and rising interest burdens, and now higher energy prices are raising fiscal concerns.

One part of the West Asia crisis was hitting supply but higher prices has also led to demand destruction affecting global growth. Most notably, petrochemical producers have curtailed operating rates as feedstock supply dried up, Households and businesses using LPG have also been impacted, while flight cancellations across the Middle East, parts of Asia and Europe have led to a sharp drop in jet fuel consumption. A growing number of countries have implemented policies to reduce demand, while others have put in place measures to shield consumers from the full impact of rising fuel prices. Overall, global oil demand is estimated to contract by 800 kb/d year-on-year in March and by 2.3 mb/d in April-2026. This stems out from a direct impact of reducing economic activity amidst restricted supply and elevated prices. Resuming flows through the Strait of Hormuz remains the single most important variable in easing the pressure on energy supplies, prices and the global economy.

Domestic Economy-

Domestic high-frequency indicators for March, in general, do not reflect much adverse impact of the global supply chain bottlenecks as some of the key risks have been contained by the Government, ensuring uninterrupted availability of petroleum products across the country. Overall demand conditions remained resilient with greater support from rural areas.

Trade deficit narrowed in March falling to a nine-month low. On a sequential basis, exports expanded, while imports contracted in March 2026. The conflict in West Asia led to a decline in exports and imports from the region.

Amidst the geopolitical chaos, RBI in April-2026 monetary policy meeting decided to continue with a pause on repo rate and retained the neutral stance. The key reading in

the policy was around MPC's inflation and growth projections which reflect the recent shocks from elevated Brent prices and spillovers from the West Asia war. Inflation is projected at 4.6% y/y for FY27. The future trajectory of inflation will mainly be guided by evolving geopolitical situation and the upcoming monsoon season. RBI's language on domestic growth was concerned with recent impact on economic activity. Therefore, RBI has projected domestic growth at 6.9% for FY27 vs 7.6% in FY26. Importantly RBI continued to give comfort on the liquidity conditions in the economy and reiterated its proactive approach on liquidity management.

RBI Inflation Estimates	FY27	Q1 FY27	Q2 FY27	Q3 FY27	Q4 FY27
February-2026 Policy	-	4.0	4.2	-	-
April-2026 Policy	4.6	4.0	4.4	5.2	4.7
February-2026 Policy	-	6.9	7.0	-	-
April-2026 Policy	6.9	6.8	6.7	7.0	7.2

Source: RBI, Data as on April 08th, 2026

Domestic Inflation -

Source: Internal research, Data as on March 13th, 2026

- The trajectory of inflation has seen an intercept shift in March-2026. Seasonal uptick in food prices plus spillovers of elevated fuel prices due to ongoing west Asia conflict led to higher momentum in domestic inflation.
- March CPI rose marginally to 3.4% y/y vs 3.2% y/y in Feb-26 as food, fuel prices inched up. Core inflation was at 3.7% y/y in Mar-2026, vs 3.4% y/y in Feb-2026.
- On a sequential basis, headline CPI inched up by 0.26% m/m led by broad base increase in the basket prices.
- Core inflation increased by 3.7% y/y in March 2026. Overall, the prices were generally stable in the core basket.
- Transfer of few items like higher airfare, gold prices etc. are partially remaining. Also, the estimate suggests that the pass through of higher input costs by companies to consumers is yet to begin.
- Remaining transfer of airfares prices, input cost inflation, LPG price hikes, higher food inflation in summer month etc. will keep the headline inflation higher than the current sub 3.5% inflation trend to a sub 4% headline number.
- CPI in Q1 and Q2 FY27 is expected to remain above RBI's target of 4%. Any more shocks from climate related risks or geopolitical crisis will keep the outlook on domestic inflation tilted on upside. We expect inflation to average around 4.8% y/y in FY27 with risks tilted on the upside.

Domestic Liquidity -

- System liquidity, after moderating in the second half of March amidst tax outflows, improved in April as pressure from tax outflows waned and government spending picked up.
- RBI conducted a 4-day VRR auction for Rs1 tn. The overnight rates remain comfortable towards the lower end of the LAF corridor.
- We expect durable liquidity to ease around Rs3.5-3.75 tn, with the government cash balances back to surplus of around Rs1 tn as of April 30, 2026.

Fixed Income Outlook -

- The Indian fixed Income market last month experienced significant volatility across segment primarily shaped by a major geopolitical conflict in West Asia, which spiked crude oil having its ramifications on INR as well as global yields. In midst of this global turmoil and uncertainty, RBI announced its monetary policy guiding the market on its rate, inflation and growth projections.
- The major driver for most of the parameters was the movement in Brent prices which moved in the range of \$95 to \$118 on news of settlement and disagreements between US and Iran. The rise in prices also increased speculation about increase in local energy prices and its indirect impact, especially post poll in couple of states.

Source: Bloomberg, Data as on May 04th, 2026.

- The 10-year G-sec benchmark yields which ended in March 26 around 7.03%, up from almost below 6.75% levels in Feb 26

continued to face pressure in April 26. The 10-year benchmark G-sec yield witnessed volatility of 10-15 bps during the month making a high around 7.05% levels basis Brent price behavior in addition to other factors like rising US yields around 4.40% levels and domestic concern on demand supply of Gsec and SDLs. Heavy supply pressure and absence of foreign demand for Indian debt during the month are expected to keep yields from falling sharply in the near term.

Source: Bloomberg, Data as on April 30th, 2026

- Corporate bonds and SDL witnessed similar trends during the month as Gsec curve in light of continued supply and muted demand in light of the above factors. The spread for long Gsec (esp. above 25 years) contraction of spread following reduced supply in light of the fact that the 10-year benchmark continued its upward journey during the month. Corporate bonds mainly in the 1-to-3-years maturity bucket were seen in demand as most of the fund managers preferred such bonds due to attractive accruals and lesser duration impact in a rising yield scenario.

Source: Bloomberg, Data as on April 30th, 2026

- At the shorter end, the curve witnessed some easing in levels up to 6 months following the March end phenomena and due to liquidity coming back to the banking system. As we moved towards one-year segment we witnessed overall stiffness in the levels above 7% following supply and other factors impacting overall yield curve.

Source: Bloomberg, Data as on April 30th, 2026.

- The RBI's Monetary Policy Committee (MPC) maintained the Repo Rate at 5.25% in its April 2026 meeting, keeping a "neutral" stance. The MPC remained vigilant, prioritizing data-driven decisions as supply-side shocks from the West Asia conflict introduce uncertainty. Headline inflation remains within the 2-6% target band, though projections for FY27 were recently raised to 4.6% due to energy and weather risks. GDP growth was projected at a robust 6.9% for FY27, slightly tempered from previous estimates due to global uncertainties. Despite domestic inflation remaining moderate (ticking up to 3.4%), the RBI maintained a neutral stance with a repo rate of 5.25%. High oil prices and global uncertainty have kept the RBI on a "long pause".
- The Indian Rupee (INR) underwent extreme volatility in April 2026, driven by geopolitical shocks in West Asia and persistent global dollar strength. The currency hit a historic low of Rs 95.33 per US Dollar, marking a steep 12% decline over a 12-month period. The Indian Rupee faced severe depreciation pressure, crossing the Rs 93-95 per dollar mark, which further incentivized the RBI to stay vigilant on liquidity and forex interventions.

Source: Bloomberg, Data as on May 04th, 2026

Outlook:

- Going ahead, while structural tailwinds like global index inclusion persist, the market faces immediate pressure from a record borrowing calendar and geopolitical volatility. We recommend a **barbell approach** recommending core allocations in **short-maturity bonds** and **money market instruments** from accrual and spread perspective, while **tactically positioning** in long gilts and SDLs for any alpha generating opportunities.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management - Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

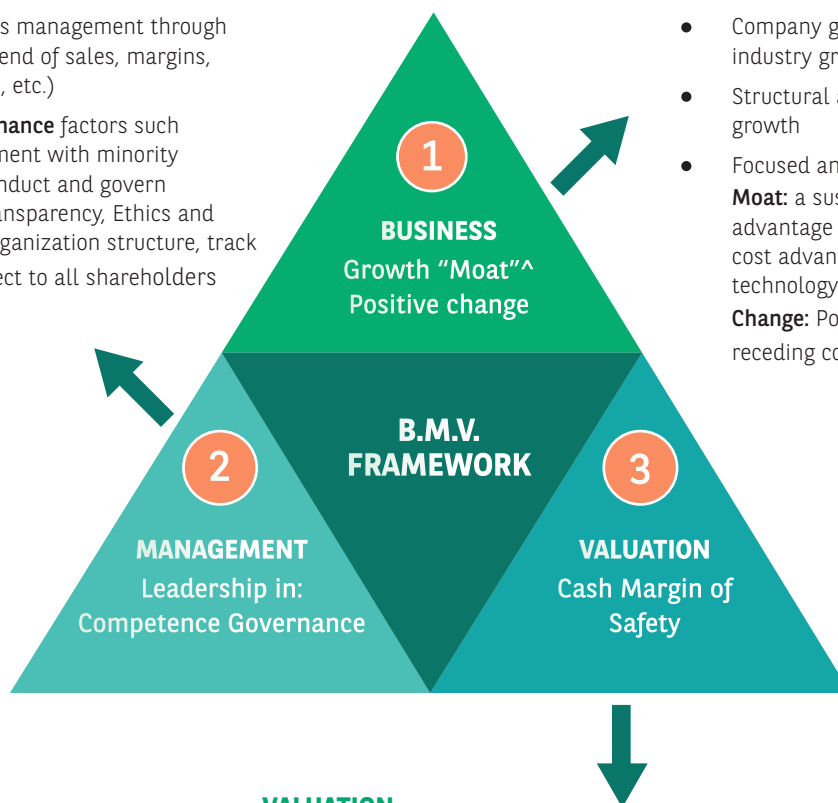

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
 - Structural and long-term sustainable growth
 - Focused and simple to understand
- Moat:** a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
- Change:** Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Credit growth remained robust ending FY26, led by broad based increase in credit offtake across segments especially services sector.

Domestic bond yields remain under pressure as the West Asia crisis remain persistent raising crude prices and consequently inflationary concerns.

India's manufacturing PMI survey reflected rising cost pressures led by elevated metal and crude prices. The survey highlighted transfer of input prices to output prices

India's gross GST collections hit an all-time high of Rs. 2.43 lakh crore in April 2026, marking an 8.7% y/y growth, contributing to the growth is the robust import-linked revenues.

** CARE's fund quality rating is not a recommendation to purchase, sell, or hold a security/ fund. It neither comments on the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors.

The Total Expense Ratio (TER) is the sum of the Base Expense Ratio (BER), brokerage fees, transaction costs, and statutory levies.

Segregated portfolio 2

BONDS & NCDs	
Listed / awaiting listing on the stock exchanges	
Yes Bank Ltd. [ICRA]D	0.00%
TOTAL	0.00%

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular-Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the Hon'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

(An Open ended Debt Scheme predominantly investing in AA+ and above rated corporate bonds. A relatively high interest rate risk and moderate credit risk scheme)

This product is suitable for investors who are seeking*:

- Capital appreciation and regular income in long term.
- Investment primarily in AA+ and above rated corporate bonds and the rest in debt and money market instruments.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas ESG Best-in-Class Strategy Fund is not provided as the scheme has not completed 6 months. \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -21.82%. \$ \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24%. µµ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. * The scheme is a 'Transferee Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. * Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%. Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time. † The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund. ¶ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid cap Fund and erstwhile Baroda Mid cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund. SAR - Simple Annualised Return.

Mr. Pratish Krishnan ceases to be the Fund Manager in Baroda BNP Paribas Balanced Advantage Fund, Baroda BNP Paribas Aggressive Hybrid Fund and Baroda BNP Paribas Multi Asset Fund effective from close of business hours of April 30, 2026.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage Change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	
PMI Services Index	
PMI Composite Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port tariffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is
Core CPI (%YoY)	consumer price inflation excluding food and fuel.
WPI (%YoY)
