

BARODA BNP PARIBAS LARGE CAP FUND

(An Open-Ended Equity Scheme predominantly investing in Large Cap Stocks)

SAIL WITH THE WHALES

Ride market's waves with India's largest companies

Just like the whales who are steady and resilient during rough times, the Large Cap Funds typically invest in blue chip companies and market leaders which could generate revenues and earnings across different market cycles.

Benefits of Large Cap Fund

Large Caps are less volatile and typically intends to weather the ups and downs of the market.

Aims to provide capital appreciation over the years and helps investor meet their long-term goals.

Market Outlook - Equity

Nifty 50 index rallied by 1.8% during the month to close at all-time high for the calendar year 2025. A significant underperformance of the domestic market to MSCI Emerging markets index, better than expected corporate results, speculation around favorable negotiation around Indo-USA trade talks and positive Foreign Portfolio Investors (FPI) flows led to rally. Amongst sectors, IT and Financials outperformed the broader markets, while Realty sector underperformed.

FPI flows were positive to the tune of USD 500mn, 2nd consecutive month of positive flow. Domestic Institutional Investors (DII) flows continue to be positive with flows of USD 7.8bn. FPI ownership is now at all-time low of 16% - a 20-year low. FPI also withdrew money from other markets such as South Korea, Taiwan, Malaysia.

On the global side, the Federal Reserve delivered a second consecutive 25 bp rate cut, lowering the Fed Funds target range to 3.75-4%, and announced the end of Treasury runoffs starting December 1st. However, Chair Powell used the post-meeting press conference to indicate lower certainty of rate cuts in December meeting. Consequently, expectations for December rate cuts are lower and a key monitorable for global markets.

Domestically we had several events. Bihar election saw a clear majority mandate for NDA. Cash transfer schemes and fiscal measures such as tax cuts and GST cuts should boost consumption. With a few key elections due next year- Bengal and Tamil Nadu (2026), UP (2027), election spending may drive consumption in these states.

India's GDP print of 8.2% for Q2 FY26 surprised on the upside with GVA (Gross Value Added) at 8.1%. Growth was driven primarily by Manufacturing and Services on the production side. On the expenditure front, private consumption and investments were the key contributors. Nominal GDP growth, in Q2, stood at 8.7%, just 0.5 percentage point above real GDP growth, highlighting the impact of soft inflation.

Credit growth accelerated to 11.3% yoy in October 2025, the highest in 10 months, signalling a positive inflection for bank earnings. Growth was driven by a robust 27% yoy increase in MSME loans (Micro, Small, and Mid Enterprises) and a 14% yoy rise in personal loans, the strongest in 15 months. Notably, unsecured personal loans increased to 12.4% yoy, reflecting banks' increased risk appetite. Bank valuations are supported by declining delinquency rates in unsecured loans.

We are through the corporate earnings season. Sales of Nifty 500 companies grew by 6% yoy, EBITDA grew by 17% yoy, while PAT growth was 15%. This was largely driven by the Nifty Next 50 and midcaps followed by Nifty 50 and the small caps. Overall result season was better than expected with consensus upgrading the Nifty 50 earnings by about 2.5%. Earnings seem to have stabilized and we are past the earnings cut cycle which we witnessed over the last few quarters.

Indian market valuations trade at its long-term average of 21x and with expectations of accelerated growth from 2HFY26 onwards, valuations can see re-rating. After Indian markets having underperformed significantly to Emerging markets, FPI ownership being at an all-time low, and with some reversal of AI trades and earnings likely to pick up; both fundamentals and technical factors are aligned for better performance of the Indian markets.

Market Outlook - Fixed Income

Debt Market Commentary December-2025

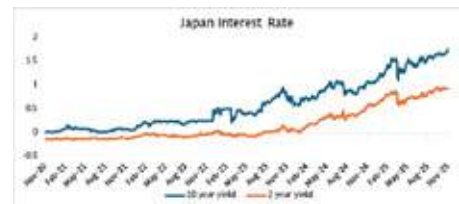

Global Economy -

Global market volatility took a breather in November-2025. The overall uncertainty regarding US tariffs came down. Dollar broadly strengthened till early November on increased safe-haven demand amidst the US government shutdown, and lower expectations of Fed rate cut in the December meeting. Currencies like Japanese yen remained volatile conditional on the evolving growth and inflation dynamics. Global commodity prices remained subdued on lower food and crude oil prices. Prices of industrial metals rose on fears of a supply shortage and higher imports by China. Gold prices saw a correction from a record high in mid-October in the second half due to reduced safe haven buying and a stronger dollar.

Source: Bloomberg, Data as on Nov-2025

US Treasury yields declined until the third week of October on safe-haven demand, a prolonged government shutdown, and Fed rate cut expectations. US yields, however, edged higher from the end of October on Fed Chair's comments tempering further rate cut expectations. Japan's economy witnessed fresh pressures on currencies and rates as concerns on the new Prime Minister Sanae Takaichi's stimulus package, which is expected to exceed 20 trillion-yen double of last year. The massive spending plan has raised concerns about Japan's fiscal health, when they haven't really come out of inflation problem.

Source: Bloomberg, Data as on Nov-2025

Domestic Economy-

The Indian economy showed signs of a further pick up in momentum, despite lingering external sector headwinds. Demand conditions witnessed signs of improvement with the revival of urban demand and continued strength in rural demand.

Policy stimulus both fiscal and monetary (income tax cut and interest rate reductions), good monsoon and lower inflation likely drove momentum in economic activity. Strong corporate earnings momentum due to low commodity prices, the mid-quarter announcement of GST rate cuts also spurred production ahead of implementation. All these factors have contributed to a resilient growth number.

Source: Bloomberg, Data as on Nov-2025

Therefore, India's GDP growth stood at 8.2% in Q2 FY26 vs consensus at 7.4%, owing to a muted deflator (0.5%). Nominal GDP growth remained subpar at 8.7%. Real GDP surprised on the upside due to the continued outsized impact of the deflator. Lower prices captured as lower deflator likely boosted purchasing power. Private consumption growth at 7.9% y/y outpaced investment growth at 7.3% y/y, while government consumption growth contracted by 2.7% y/y. GVA, which we consider as a better proxy for growth, stood at 8.1% y/y vs consensus at 7.3% y/y. The upside surprise mainly came from services registering growth of 9% y/y in Q2 FY26.

On the trade front, a crucial variable amidst US trade tariffs, India's merchandise trade deficit widened to an all-time high in October 2025. Exports contracted reflecting the adverse impact from global headwinds, imports surged on account of higher gold and silver imports, catering to the festive demand.

Pressure on INR has been clearly visible with USD/INR depreciating to a new low of 89.9. Lack of visibility on the trade deal is expected to weigh on INR, RBI's intervention has been low key in fresh pressures.

Domestic Inflation -

Source: RBI, Data as on October -2025

- Headline CPI fell to 0.25% y/y in October-2025, the series all-time low. The decline was on account of lower food prices, GST cuts past through and favourable base effects.
- CPI inflation is expected to remain benign led by 1) Lower crude oil prices keeping input cost inflation under check 2) High-frequency food prices indicate a continued decline in food prices in Nov-25, Also, from Dec-2025 with the winter food crop arrival, food prices are expected to moderate further.
- With the impact of GST cut higher than anticipated in October itself, the inflation trajectory has softened further with FY26 inflation expected at 2.3%. The space to cut remains open as real rates look optically higher and RBI's intent to support growth was clearly visible last policy.

Domestic Liquidity -

Source: Bloomberg, RBI Data as on November 30th, 2025, MCLR- Marginal Cost of Lending rate, LAF - Liquidity Adjustment Facility

- Liquidity surplus improved vs October end but by end of November moderated back to 1.7 trn amid continued RBI intervention and lower than expected government spending.
- Accordingly, the weighted average overnight rates rose by 4 bps week on week basis to -5.41%.
- Going into this week, we expect liquidity surplus to improve amid

government spending and as the last leg of the CRR cut impact plays out. Notably, the continued pressure on INR and the consequent FX intervention could continue to impact durable liquidity.

Outlook -

A Shift in US Monetary Dynamics -

- FED in October-25 policy delivered a rate cut and also mentioned end of quantitative tightening.
- Fed governor himself highlighted pressures on overnight rates on selected dates on use of standing repo facility (SRF).
- Secondly, labour market conditions in US have weakened in 2025 and FED is noticing.
- Such symptoms of tightening liquidity and growth uncertainty should be seen as the major mover for future rate cuts and quantitative easing.

Domestic Monetary Policy -

- Since the August-25 policy, when the monetary policy committee (MPC) pointed to a limited room for supporting growth, policymakers now in October-25 MPC signal available policy space to aid growth.
- RBI's forward guidance on space for rate cuts gives us confidence on growth supported future policy expectations.

Elevated spreads and yields -

- Valuation of securities is at reasonably attractive point wherein spreads of 10-year benchmark vs the overnight rate and SDLs/ Long g-sec versus the 10yr benchmark have reached the higher end of the trading range.
- The investors could benefit from further easing of rates in months ahead.

INR took the hit

- INR depreciation has resulted in INR valuation being closer to fair level and provides an attractive entry point from foreign investors in fixed income markets.
- Elevated rates and depreciated INR has supported foreign flows into domestic debt markets.

At last, the opportunity -

- Positive real rates of ~250 bps (1yr T-bill vs FY26 inflation), post RBI rate cut of 100 bps provides a fundamentally attractive case for remaining invested in fixed income assets.
- Benign inflation forecast of 2.6%, below RBI threshold of 4% for FY 26 and maintaining GDP forecast at 6.8% indicates a continuity of pro-growth-oriented policy mindset.
- Multiyear high spread between benchmarks and long end G-sec is expected to provide ample opportunity, with stable to lower rate view and comfortable macros.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management – Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

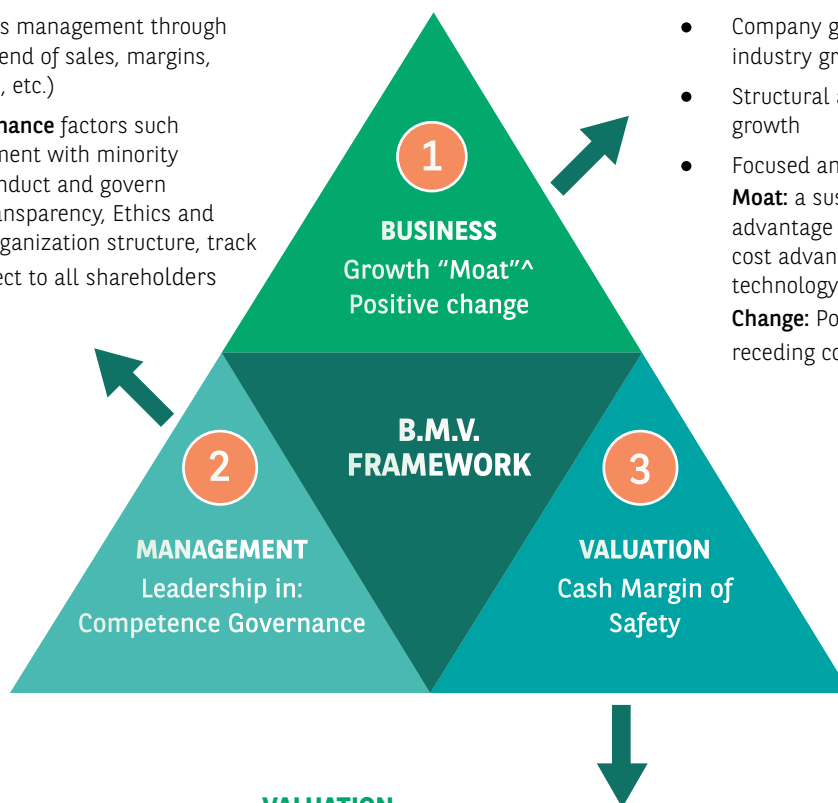

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
 - Structural and long-term sustainable growth
 - Focused and simple to understand
- Moat:** a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
- Change:** Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

Negative (+)													
Positive (+)													

India 10 year yield softened a bit backed by lower inflation and expectations of rate cuts in US.

India's Manufacturing PMI eased to a nine-month low, reflecting impact of tariffs , while GST cuts supported manufacturing the overall pace of expansion slowed.

Naukri Job Index grew by ~23% y/y in November-2025, impacted by base effect, along with broad-based improvement in employment across sectors.

GST collections softened to INR 1.7tn in November-2025, overall the collections increased by 4.6% y/y after adjusting for tax cuts.

** CARE's fund quality rating is not a recommendation to purchase, sell, or hold a security/ fund. It neither comments on the current market price, suitability for a particular investor nor on the prospective performance of the fund with respect to appreciation, volatility of net asset value (NAV), or yield of the fund. The ratings do not address the funds ability to meet the payment obligations to the investors.

\$Baroda BNP Paribas Banking and PSU Bond Fund has merged into Baroda BNP Paribas Short Duration Fund effective from October 17, 2025.

Segregated portfolio 2 BONDS & NCDs

Listed / awaiting listing on the stock exchanges

Yes Bank Ltd.N@@B@@&	[ICRA]D	0.00%
TOTAL		0.00%

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

#Inception Date : May 28, 2024

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown. *% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to "Performance of Schemes" page.

Please note TRI indicates Total Return Index.

Performance of Schemes

(as on November 28, 2025)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Gold ETF Fund, Baroda BNP Paribas Health and Wellness Fund, and Baroda BNP Paribas Business Conglomerates Fund is not provided as the scheme has not completed 6 months. \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -21.82% \$ \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24% ¥ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. * The scheme is a 'Transferee Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HQ/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. * Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: Total Return Index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%. Difference between total return index & price index A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time. ¥ The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HQ/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund. ¶ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid cap Fund and erstwhile Baroda Mid cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HQ/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid cap Fund. SAR - Simple Annualised Return.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor. based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port traffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is consumer price inflation excluding food and fuel.
Core CPI (%YoY)	
WPI (%YoY)
