

BARODA BNP PARIBAS MULTI ASSET FUND

(AN OPEN-ENDED SCHEME INVESTING IN EQUITY, DEBT AND GOLD ETF)

January 2023

Together for more

The word 'more' does not imply more returns or assurance of scheme performance. It refers to the additional value provided by the joint venture, as compared to Baroda AMC and BNP Paribas AMC individually.

Investing is like having a wholesome meal

- Individually each component of food i.e. proteins, carbohydrates, vitamins and minerals, have unique characteristics.
- When all the components of the food come together in the right proportion, they make a person healthy.
- Similarly, each Asset class has unique characteristics.
- But when combined together, it creates a portfolio that aims to capture the upside and protect the downside!

DIFFERENT ASSET CLASSES BEHAVE DIFFERENTLY

Multiple Asset Classes: Differing Returns Profiles

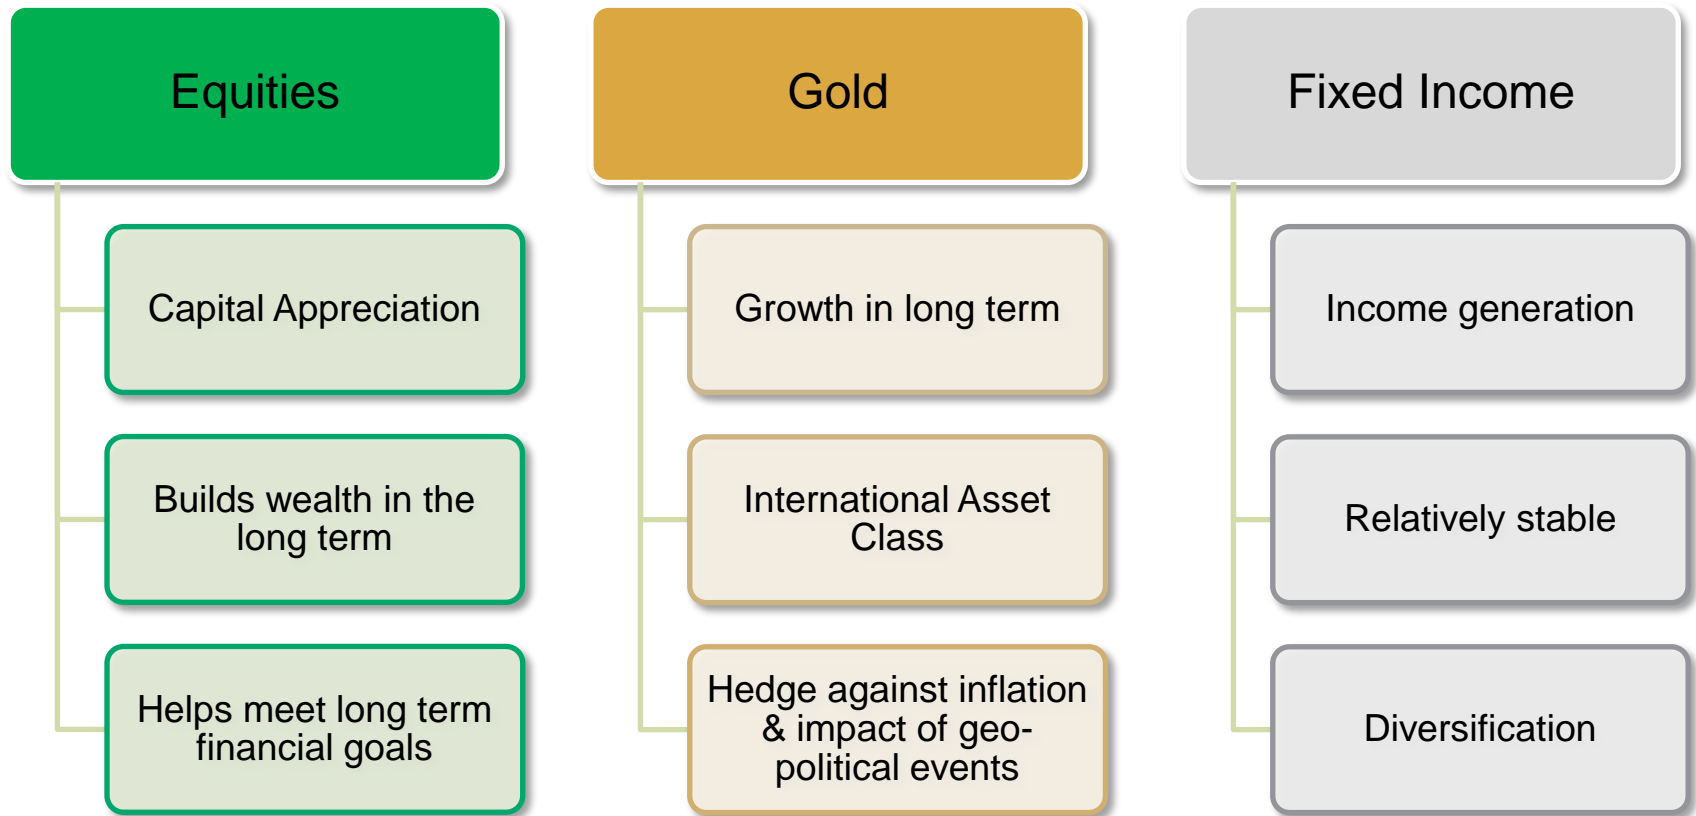

- Equity has delivered highest returns, but with high volatility!!

Power of each asset classes

Power of Low Correlation

“To reduce Risk, it is necessary to avoid a portfolio whose securities are all highly correlated with each other.” - Harry Markowitz

- Correlation measures the movement of asset classes against each other.
- The negative correlation amongst Gold-Equity and Gold-Fixed Income, denotes that when one asset class falls, the other rises.

Current Portfolio Positioning (as on 31st January 2023)

Equity:

- The fund continued its deployment into January after the NFO closed on 12th December 2022. At the end of January, the fund is broadly aligned with its investment objectives.
- Gold exposures via ETF's are now placed at ~13% spread across 4 ETFs for the sake of liquidity. Gold was up ~3% for the month as internationally a weaker USD led to some perk up in gold.
- Fixed income exposures are also now placed at ~13%.
- Gross equity exposures are now ~69% of the AUM. In line with the benchmarks larger exposures are across the BFSI, IT and energy sectors.
- Mid and small cap exposures account for ~12% of the exposures with the balance coming from large caps.

Debt:

- The Federal Reserve raised the fed funds rate by 25 bps to 4.50% - 4.75% and bank of England raised rates by 50 bps, we expect RBI to Increase the repo rate by 25 bps and pause at 6.50%.
- The Scheme intends to maintain its average duration in the range of 1.25 - 3.00 years.
- Primary Supply of Corporates bonds for shorter tenure up to March 2023 is a concern for the market, we expect some pressure in shorter yield.
- We will maintain AAA Liquid Security for a shorter duration.
- The scheme remains open to taking tactical duration calls.
