ABOUT THE FUND

- Baroda BNP Paribas Arbitrage Fund aims to generate long-term capital growth primarily by using arbitrage strategy in equity markets and also invests a small component in short-term fixed income instruments.
- The portfolio will be managed using the arbitrage strategy by taking advantage from the price differentials in the spot/cash and derivatives segments of the market.
- The fund intends to benefit from the difference in pricing in cash and futures market. An arbitrage opportunity prevails when one buys a stock in the cash market and sells it at a higher price in the futures market so as to lock-in the potential gain.
- Fixed Income: Upto 35% would be invested in debt and money market instruments and/or units of debt schemes, including liquid, overnight, and money market funds.

PORTFOLIO POSITIONING
