Minimum Application Amount:
₹ 1,000 and in multiples of ₹ 1 thereafter.

Load Structure

Exit Load: • If units of the scheme are redeemed or switched out within 15 days from the date of allotment – 0.25% of the applicable NAV
• If units of the scheme are redeemed or switched out after 15 days from the date of allotment – Nil

please refer Scheme Information Document of the scheme.

**The scheme is a 'Transferee Scheme', and accordingly, the ratios are being provided considering the weighted average NAVs of both the Transferor Scheme and Transferee Scheme.

*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable.

ABOUT THE FUND

- Baroda BNP Paribas Arbitrage Fund aims to generate long-term capital growth primarily by using arbitrage strategy in equity markets and also invests a small component in short-term fixed income instruments.
- The portfolio will be managed using the arbitrage strategy by taking advantage from the price differentials in the spot/cash and derivatives segments of the market.
- The fund intends to benefit from the difference in pricing in cash and futures market. An arbitrage opportunity prevails when one buys a stock in the cash market and sells it at a higher price in the futures market so as to lock-in the potential gain.
- Fixed Income: Upto 35% would be invested in debt and money market instruments and/or units of debt schemes, including liquid, overnight, and money market funds.

PORTFOLIO POSITIONING

Derivatives Market

- Average rollover costs: Settled between 62 and 66 basis points.
- Nifty Rollovers: Advanced to 77% vs 74% compared to the 3-month average benchmark.
- Nifty Open Interest: Starts the September series with a higher base of ~1.47 cr shares vs. ~1.45 cr shares in August.
- Market-wide Rollovers: Finished marginally higher at 91% vs 90% of the 3-month average.
- Stock Futures Rollovers: Matched historical benchmarks perfectly, closing at 92% vs 92% of the 3-month average.
- Arbitrage Book Expansion: Domestic books expanded to ₹3,54,000 crore up from ₹3,52,000 crore in July.

Equity Market Performance

- Equity: Major indices advanced, as the Nifty climbed 1.5% while the Bank Nifty notched up 1.3%.
- Outperforming Sectors (Aug-26): Metals(+7.8%), Auto (+ 4.9%), PSU Bank (+3.9%), Media (+3.3%), Pharma (+2.2%), IT (+1.2%), Financial Services (+0.9%), Private Bank (+0.6%) & Energy (+ 0.4%)
- Underperforming Sectors (Aug-26): Utilities (-2.6%), FMCG (- 2.4%) & Realty (-0.4%)

CURRENT ASSET ALLOCATION (% of Net Assets)

NAV MOVEMENT (₹ 10,000 Invested at Inception)

NAV & index values re-based to ₹ 10,000 depicting lump sum investment since the inception date of the fund.

The above chart show the NAV movement since inception to August 31, 2026 For complete performance detail please refer page 2.

Data as on August 31, 2026

Record Date	Distribution Rate Per Unit (₹) Individual/others	Cum-IDWC NAV (₹)
10-Mar-26	0.06	13.14
08-Apr-26	0.05	13.18
10-Aug-26	0.05	10.63

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of pay-out and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors' capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of Rs 10 per unit. Face value may change depending upon FV of the scheme.

Debt Quants - The information contained in this report has been obtained from the internal sources. The quantitative data does not purport to be an offer for purchase and sale of mutual fund units.

#Key Statistical Ratios - The information contained in this report has been obtained from sources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The risk free rate of return considered for calculation of Sharpe ratio is 5.41%, as per 1 day MIBOR rate on the last business day of the month. Sharpe Ratio (annualised), Standard Deviation (annualised) and Beta are based on last 36 monthly data points. Information ratio aims to show consistency in generating excess returns relative to benchmark, which is measured by the tracking error. Tracking error is the measure of the deviation from the benchmark.

Portfolio Positioning- details contained herein is for general information purposes only and does not indicate assurance of future Scheme performance. The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme, please refer to SID available on our website (www.barodabnp-paribasmf.in).

NAV Movement (Rs. 10,000 Invested at Inception) - All returns are for Regular Plan - Growth Option. Past performance may or may not be sustained in future and is not a guarantee of any future returns. Returns do not take into account the load, if any.

Concept of Macaulay duration - The Macaulay duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

The risks associated with investments in equities include fluctuations in prices, as stock markets can be volatile and decline in response to political, regulatory, economic, market and stock-specific development etc. Please refer to Scheme Information Document for detailed Risk Factors, asset allocation, investment strategy etc.
