## ABOUT THE FUND

Baroda BNP Paribas Business cycle fund investments is based on identifying the Macro-Economic Indicators rather than themes or sectors. It has agility to move across sectors. Various business indicators help us understand the economic trend. Suitable for Investors aiming to benefit from the strategic fund positioning based on the business cycle phases. It has 4 phases: Recovery, recession, slump, expansion, each phase offers unique potential opportunities.

- Monitor Macro Indicators & Identify Business Cycle Opportunity.
- Identify themes / sectors based on business cycle opportunity.
- Identify stocks based on finalised themes / sectors.
- A periodic assessment of the macro-economic environment and the subsequent investment approach is conducted, based on which the portfolio may be reallocated.

## PORTFOLIO POSITIONING

- We are currently invested to the tune of ~94.5% in the fund - about 150bps lower than the prior month. We have used the rally in equity markets to marginally trim exposures. Large cap exposures have moved up to ~67% (up 300bps over the prior month) with SMID segments accounting for the balance.
- Over the course of the month, we raised exposures to financials (large cap private banks) and industrials. This was almost entirely funded by a trimming of weights on the IT sectors.
- Our key overweights in the fund stays as healthcare, consumer discretionary (largely via consumer services) and industrials. Major underweights are on financials and materials.
