-Dedicated Fund Manager for Overseas Investments: Mr. Shreekirana Rao (managing fund since December 01, 2022)

ABOUT THE FUND

- Baroda BNP Paribas Conservative Hybrid Fund invests around 75%-90% of its holdings in debt and money market instruments. The scheme also intends to invest (in the range of 10%-25%) in equity and equity related instruments. The portfolio may also invest upto 10% of its net assets in REITs and InvITs.
- The debt segment of the portfolio is actively managed based on the fund manager's interest rate outlook. The AMC forms views on the likely direction of interest rates and the portfolio is structured consistent with these views. Individual instruments are bought and sold based on the conformity with the interest rate view and the instrument specific factors (credit risk, exposure). By actively managing the portfolio, the scheme attempts to achieve its objective through both interest yield and capital appreciation.
- The equity segment of the portfolio is diversified across sectors with a bias towards companies having large market capitalization.
- The scheme is suitable for investors who are seeking regular income and capital appreciation in the long term.

PORTFOLIO POSITIONING

Equity:

- Equity exposure stands at 23.8% for the month.
- We have increased exposure to discretionary and IT while reducing exposure to other staples, the financial sector, and industrials.
- In the Financial sector, we remain positive on private retail banks and insurance companies, which may continue to grow faster than the industry.
- We are overweight on Industrials as the Capex cycle is gradually picking up.
- Industrials, discretionary, financial sector and Healthcare are key overweight in this scheme while energy, material and utilities are under weight. Within materials, we are overweight in cement.

Debt:

- US Inflation moderated to 6.4% in January 2023 from 6.5% in December.
- CPI increased sharply to 6.52% in Jan 2023, the highest in three months, compared to 5.72% in December, and above market expectations of 5.9%, led by core inflation, food inflation, and unfavorable base effects.
- The scheme intends to maintain its average duration in the range of 2.00-2.50 years.
- The scheme remains open to taking tactical duration calls.
