\*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be

Note on Segregated Portfolio Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had filed a writ patition in the Hor/Net High Court. Murphy inter all is seeking relief from petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio

#### **ABOUT THE FUND**

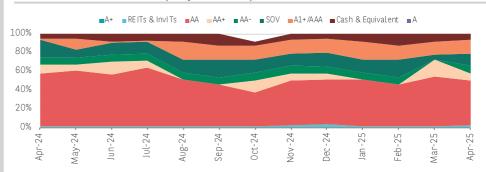

Baroda BNP Paribas Credit-risk fund is a debt fund which have at least 65% of their investments in AA (excluding AA+) and below rated corporate bonds. The fund aims to generate high returns by taking higher credit risks and invest in lower-rated papers. This fund invests based on short to medium term interest rate view and shape of the yield curve. They typically maintain a moderate duration of up to 2 years and invests in well researched credits / structures for yield enhancement. The fund looks for opportunities in the fixed income segment across varying interest rates cycle. Investing in such funds aims to give investors the benefit of generating income in both rising and falling interest rate environment. The fund has adequate exposure towards AAA bonds, G-Sec & money market instruments for ensuring liquidity.

#### **PORTFOLIO POSITIONING**

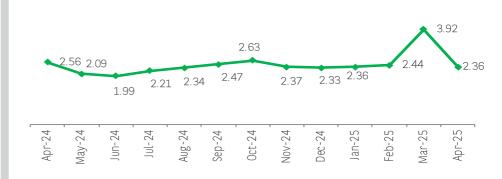

- The weighted average overnight Rates eased by 50bps from 6.60%-6.65% in February to 6.10-6.15% in March
- Liquidity largely remained in deficit zone during the month, however it turned into surplus at the month end due to huge government spending and OMOs.
- The Credit growth for the past three months remained flat, due to slow demand on loan during the year end, Even the Deposit growth is moderate for the past three months.
- The Supply in credit issuance also remain muted during the month
- The RBI's aggressive liquidity easing measures suggest a strong intent on ensuring smooth monetary transmission as it continues
- The Credit rates have already eased by 15-20bps after RBI taking soft steps on NBFCs and liquidity, we except rates to ease further after the rate cut in April.
- As mandated, we remain invested more than 56% in good quality AA and below AA assets.
- We have allocated small amount in units of REITS and INVITS to enhance the potential return of the fund
- We intend to maintain Average duration between 2.00 2.75 years.
- The scheme remains open to tactical duration calls

# Together for more\*\*

# **Product Labelling**

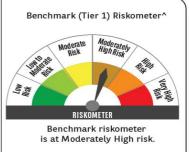

#### Baroda BNP Paribas Credit Risk Fund

(scheme has two segregated portfolio) (An open-ended debt scheme predomi-nantly investing in AA and below rated corporate bonds (excluding AA+ rated corporate bonds). A Relatively High Interest Rate Risk and High Credit Risk)

#### This product is suitable for investors who are seeking\*:

- Income over medium term.
- Investment in a mix of debt and money market instruments across the credit and maturity spectrum

# Scheme Riskometer^^ Moderately High Risk Very High Low Risk Investors understand that their principal

will be at Moderately High risk.

^Riskometer For Scheme: basis it's portfolio, ^Riskometer For Benchmark (CRISIL Credit Risk Debt B-II Index): basis it's constituents; as on April 30, 2025

Investors should consult their financial advisers if in doubt about whether the product is suitable for them\*

Potential Risk Class (PRC) matrix*						
Credit Risk (Max)→ Interest Rate Risk (Max)↓	Relatively Low: Class A (CRV>=12) Moderate: Class B (CRV>=10) Relatively High: Class C (CRV>=10)					
Relatively Low: Class I (MD<=1 year)						
Moderate: Class II (MD<=3 year)						
Relatively High: Class III (Any MD)			C-III			

MD=Macaulay Duration, CRV=Credit Risk Value.

The above PRC matrix denotes the maximum risk that the Scheme can take i.e. maximum interest rate risk (measured by MD of the scheme) and maximum credit risk (measured by CRV of the scheme).

#### **DISCLAIMERS**

+Concept of Macaulay duration - The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.
