\*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable

## ABOUT THE FUND

- The Scheme has a dual objective of generating capital appreciation and income by using arbitrage opportunities by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation.
- Under normal circumstances, the scheme may invest upto a maximum of 50% in unhedged equity and upto 35% in debt and money market instruments. The balance would be invested in the arbitrage strategy using equity futures. The scheme may also invest in INVITS and REITs (upto 10% of the net assets)
- The AMC has built a proprietary model for asset allocation based on the valuations and fundamentals of the companies. The asset allocation between equity and debt will be determined by the model and the top-down process will help in deciding the sector allocation while the bottom up process would lead to construction of the portfolio using specific securities.
- The model is updated on a monthly basis to decide the asset allocation. Generally, once the allocation is fixed, it will not be changed till the next month except in case of extraordinary situations where extreme volatility in the markets would force a change in asset allocation.
- The portfolio would be constructed based on top-down as well as bottom up approach using our core principle of investing, GARP (Growth at a Reasonable Price).
- The scheme is suitable for investors who are seeking Long term capital appreciation and income generation through a combination of equity, arbitrage and fixed income instruments.

## PORTFOLIO POSITIONING

### Equity:

- Net equity exposure at 39.4%.
- Compared to the last month, we have decreased exposure to financials consumer discretionary and consumer staples. Increased exposure to industrials, utilities and information technology.
- Mid and small cap exposure at 36% vs 37%, month on month. Large Cap exposure stands at 64% vs 63%.
- We are UW on consumer discretionary, energy, communication services, real estate, utilities and information technology and Overweight on financials and healthcare.

### Debt:

- RBI's forward guidance and the rate cut gives us confidence on growth supported future policy expectations.
- Recent softening in domestic inflations paves the way for RBI to take calibrated policy decisions.
- The scheme has invested in short-to-medium-term corporate bonds and G-secs of across tenor.
- We have allocated a small amount in units of REITS and INVITS with an intention to generate alpha over debt returns from a medium-term perspective.
- The scheme remains open to taking tactical duration calls.
