The above Exit Load will be applicable to all subscription transactions, excluding switch-ins.

-Dedicated Fund Manager for Overseas Investments:

Mr. Miten Vora (managing fund since December 01, 2022)

ABOUT THE FUND

- The Scheme has a dual objective of generating capital appreciation by investing in equity and equity related securities as well as generating income by investing in debt and money market securities, while attempting to manage risk from the market through active asset allocation.
- Under normal circumstances, the scheme may invest upto a maximum of 50% in unhedged equity and upto 35% in debt and money market instruments. The balance would be invested in the arbitrage strategy using equity futures. The scheme may also invest in InvITS and REITs (upto 10% of the net assets)
- The AMC has built a proprietary model for asset allocation based on the valuations and fundamentals of the companies. The asset allocation between equity and debt will be determined by the model and the top-down process will help in deciding the sector allocation while the bottom up process would lead to construction of the portfolio using specific securities.
- The model is updated on a monthly basis to decide the asset allocation. Generally, once the allocation is fixed, it will not be changed till the next month except in case of extraordinary situations where extreme volatility in the markets would force a change in asset allocation.
- The portfolio would be constructed based on top-down as well as bottom up approach using our core principle of investing, GARP (Growth at a Reasonable Price).
- The scheme is suitable for investors who are seeking Long term capital appreciation and income generation through a combination of equity, arbitrage and fixed income instruments.

PORTFOLIO POSITIONING

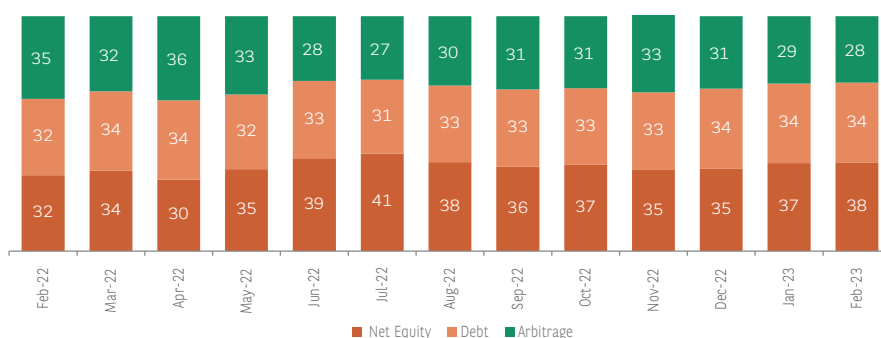

Equity:

- We have increased our net equity exposure marginally during the month as suggested by our model. Net Equity exposure as of Feb 23 stood at 37.8%, an increase of 20 bps on a month-on-month basis.
- We have increased exposure to IT, Power, Industrials and Telecom. Reduced exposure to the financial sector, consumer durables, Oil & Gas sector during the month.
- We are overweight in the financial sector with a preference for banks.
- We have increased the share of midcap/ small cap in the portfolio.
- Industrials, discretionary, the financial sector are key over weights. Energy, Utilities, healthcare, materials are key underweights currently.

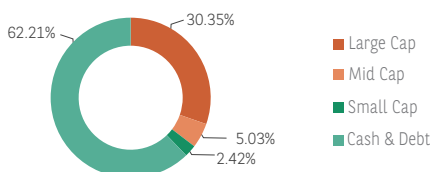

Debt:

- RBI hiked the Repo Rate by 25 bps to 6.50% last month, even fed has raised the rate by 25 bps and we expect other global central banks to keep on increasing rates to soften inflation.
- US Inflation moderated to 6.4% in January 2023 from 6.5% in December
- CPI increased sharply to 6.52 in Jan 2023, the highest in three months, compared to 5.72% in December, and above market expectations of 5.9%, led by core inflation, food inflation, and unfavorable base effects.
- We remain invested in AA and AA+ rated good quality debt paper of the portfolio at the shorter maturity.
- The scheme intends to maintain its Average Duration in the range of 2.00-2.25 year.
- The scheme remains open to taking tactical duration calls.
