***How to thrive in an ever changing world?***

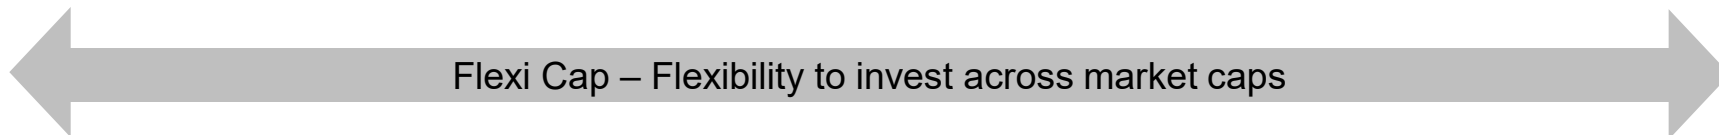

***Be Flexible***

# BENEFITS OF FLEXI CAP FUNDS

Together for more

# Flexi Cap - Flexibility to invest across market caps

# Benefits of Investing in Flexi Cap Fund

---

## Agility

- No capping across market cap allows the Flexi cap fund at any given time to dynamically take positions across large/ mid or small cap stocks

## Diversification

- One equity fund invests in different market segments. Large caps tend to reduce volatility where as mid and small caps may come with higher growth potential

## Managing Risks

- A diversified portfolio helps in reducing risks associated with investing solely with large / mid and small caps and hence it is a good starting point for someone who is new to investing

## All Season Fund

- Given the dynamic nature of the fund, it aims to adapt to the ever changing business environment

# MARKET SEGMENTS UPDATE

# The performance of different market segments

- There have been years when the large cap has given positive returns with Mid and small cap being negative; and vice versa.
- Predicting the direction may also seem difficult at times.

Source: MFI Explorer, Nifty Indices. Data as on March 31, 2026.

**Past performance may or may not be sustained in future and is not a guarantee of any future returns**

# Valuations at different points in time

- Trendline shows the historic average valuations.
- Currently, both small caps and midcaps are trading at a discount to their long-term historic averages. However, small caps currently exhibit higher divergence compared to mid-caps.

Source: Nifty Indices, Internal Research.

Premiums represent excess / deficit value over the base value. For example, mid cap premiums show  $(\text{mid cap value} - \text{large cap value}) / \text{large caps}$ .

Data as on March 31, 2026.

**Past performance may or may not be sustained in future and is not a guarantee of any future returns**

*AIM TO REAP THE BENEFITS OF FLEXIBLE  
INVESTING THROUGH...*

# **BARODA BNP PARIBAS FLEXI CAP FUND**

(AN OPEN-ENDED DYNAMIC EQUITY SCHEME INVESTING  
ACROSS LARGE CAP, MID CAP, SMALL CAP COMPANIES)

Together for more

# Scheme Attributes

---

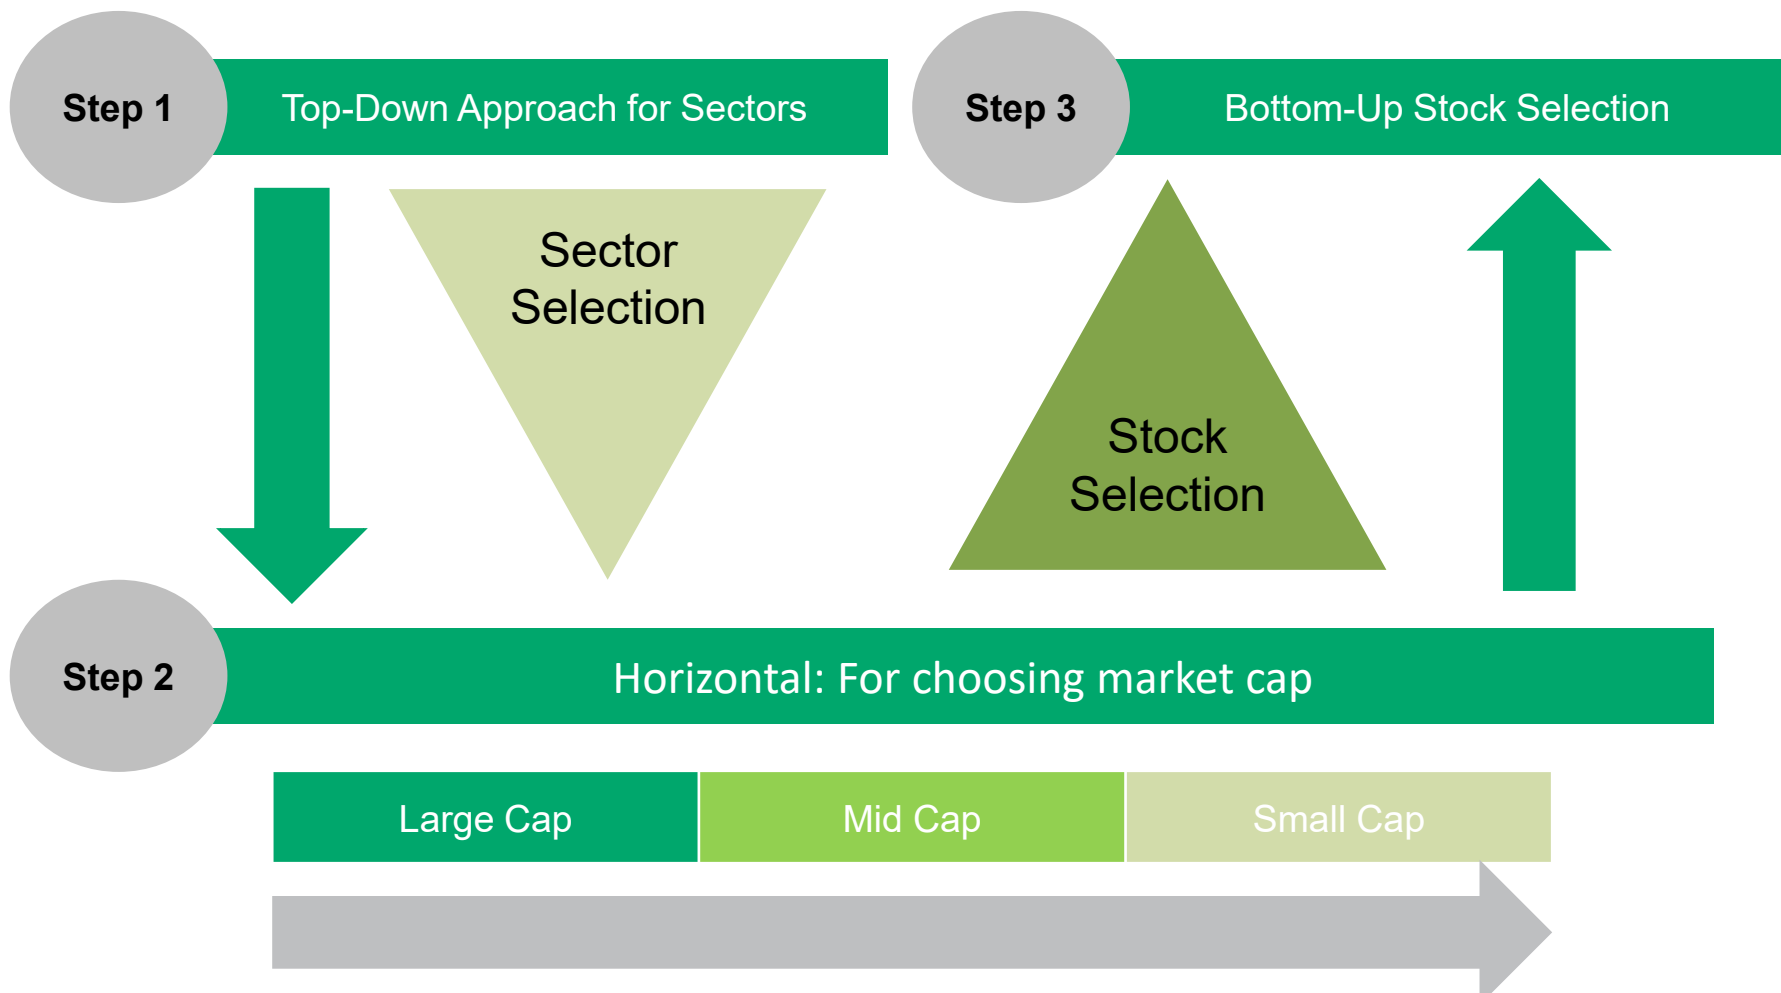

Fund offers the flexibility to invest across market cap

Diversified Strategy:  
Diversified allocation across sectors and market caps

Stock Holdings:  
Aims to hold around 40 – 60 stocks

Unique Investment approach  
The 3-pronged process

# Investment Approach: The Three Pronged Approach

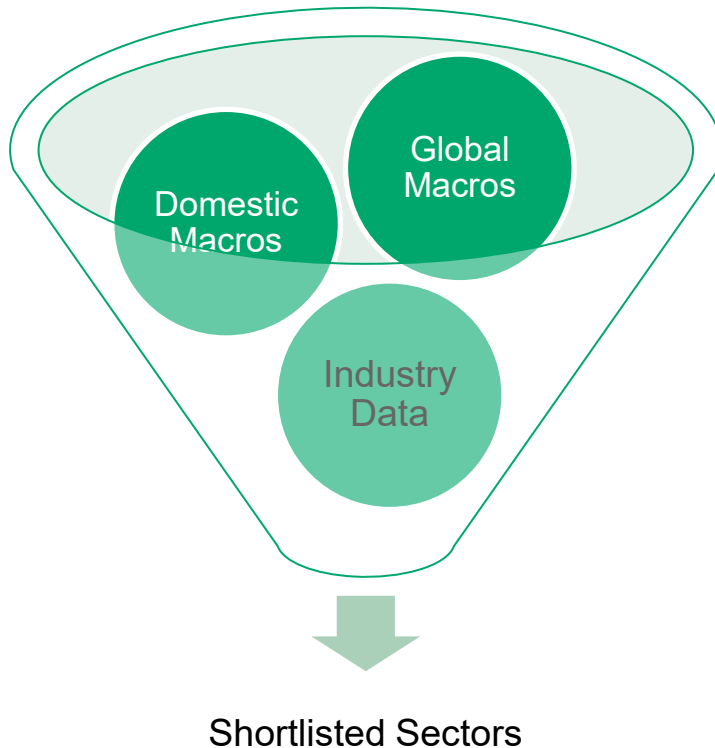

Market Capitalization as per SEBI - Large Cap: 1st – 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization. The investment strategy is subject to change basis the fund managers view and within the prescribed limits as mentioned in the Scheme Information Document (SID)

# Step 1 – Top Down Approach for Sectors

Step 1

Top Down Approach for Sectors

Underlying Factors\*

Gross Domestic Product (GDP)

Fiscal Deficit

Index of Industrial Production (IIP)

Credit Growth

Capex Cycle

Purchasing Managers Index (PMI)

GST Collections

\* Including but not limited to

# Step 2 – Horizontal: Market Cap

## Step 2

## Horizontal: Looking for opportunities across market cap

### GDP vs Market Cap Level

Market cycles: Different segments react differently to market ups and downs. Allocation between large, mid and small cap companies on the market cycle of the economy.

Source: Bloomberg, Nifty Indices, Internal Research. Data as on 31<sup>st</sup> December 2025. GDP growth for CY 2025 is inclusive of the RBI projected GDP growth estimate for Q3 FY2026 at 7%. **Past performance may or may not be sustained in the future.**

# Step 2 – Horizontal: Market Cap

---

## Step 2

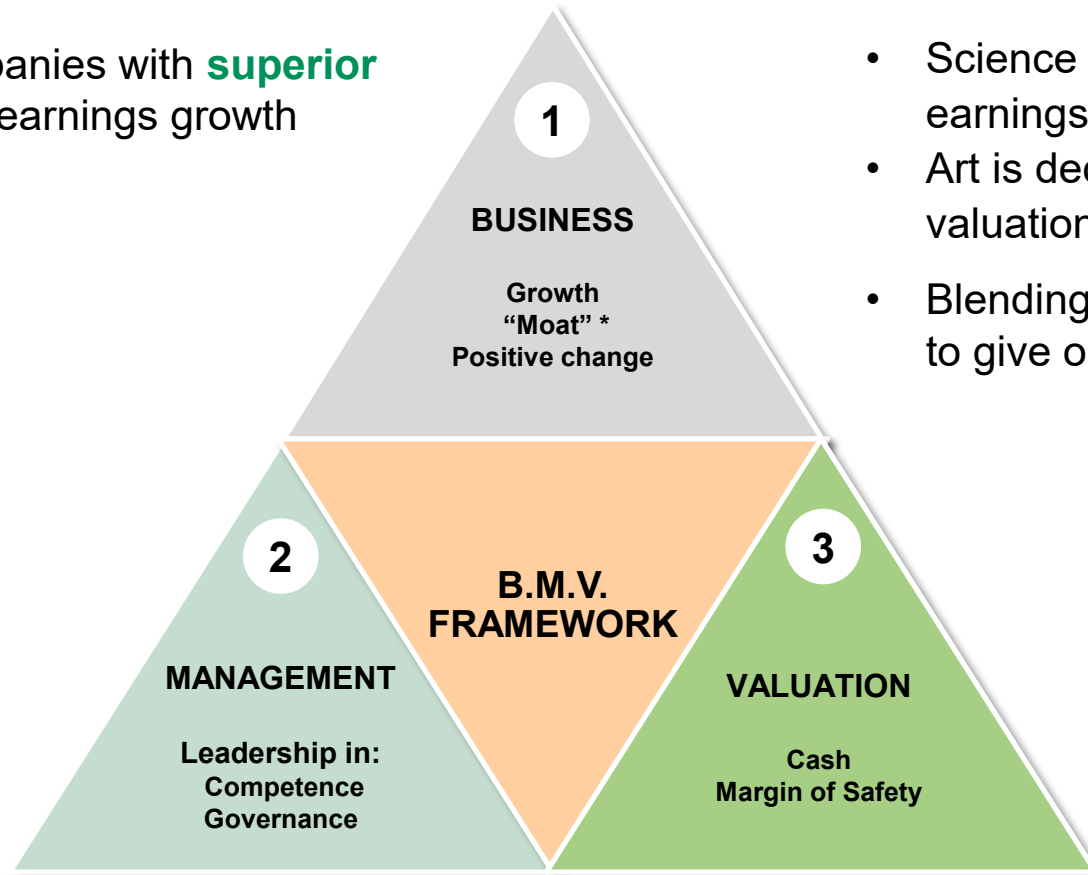

### Horizontal Looking for opportunities across market cap

- Relative Valuations: On relative terms, one segment may offer comparatively better value than others, and the fund manager could increase allocation to those segments
- Earnings Growth in each Segment
- Earnings momentum: Speed of growth in each segment
- Volatility of sector: Volatile sectors will have lesser allocation to mid and small caps and vice versa

# Step 3 - Bottom up Stock Picking

Core belief: Companies create wealth, not markets

In search of companies with **superior** and **sustainable** earnings growth

- Science is predicting the earnings
- Art is deciding the likely valuations
- Blending Art and Science to give optimum return

**Identify potential businesses, with strong management, at reasonable valuations**

\* A sustainable competitive advantage

B.M.V.: Business, Management, Valuation. Source: Internal Research

# CURRENT PORTFOLIO POSITIONING

# Product Positioning (as on March 31, 2026)

---

- The Nifty 500 TRI index was down ~1136bps for the month.
- We have marginally tweaked Cash position to 7.0% from the increased level of 7.3% a month ago.
- We have cut SMID exposure to 40.7% from 42.4% a month ago, while increasing Large Cap exposure to 52.3% from 50.3%.
- During the month, we have increased overweight on Information Technology and cut magnitude of underweight on Industrials and Communication Services. As against, we have become more underweight on Energy (cutting exposure to Oil Marketing Companies) and Financials and turned Neutral on Health Care from a previous overweight position.
- Key overweight positions are Information Technology and Materials, while key underweight positions are Energy, Utilities, and Consumer Staples.
