ABOUT THE FUND

- Flexi Cap Funds invest in companies across market caps viz. Large Cap, Mid Cap and Small Cap. •
- No market cap limits allow the Flexi cap fund, at any given time to dynamically take positions across large/ mid or small cap stocks • One equity fund that invests in different market segments; large caps tend to reduce volatility whereas mid and small caps may come with higher growth potential
- A diversified portfolio helps in reducing risks solely associated with investing in single market segment and hence it is a good starting • point for someone who is new to investing
- Given the dynamic nature of the fund, it may adapt and thrive in different market cycles

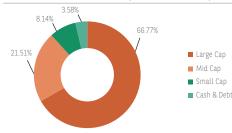

PORTFOLIO POSITIONING

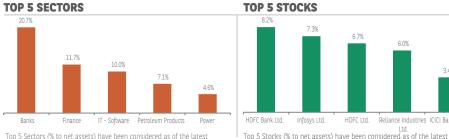

- Momentum in credit offtake continues and mid-sized/small size banks are reporting good growth numbers. Hence, we have further increased our overweight position in Financial Sectors, especially small cap banks.
- Majority of our holding is backed by able management and a healthy Current Account Saving Account (CASA) ratio. We believe large private banks are well-positioned for growth, from a long-term perspective. Further, we have exposure to corporate banks also as they are expected to benefit from the pickup in corporate loan books.
- We further reduced our underweight position in IT as we feel time correction is providing a good opportunity to increase exposure albeit slowly
- We continued to remain overweight in Real estate space & Retail space. This sector could get the benefit of improving retail demand
- We increased our exposure to utilities as valuations are reasonable with improving growth prospects.
- We have increased our mid cap and small cap exposure from 23.7% to 30% and reduced our large cap positioning to 66.8%. (Market • capitalization as per SEBI classification. Exposure as % of net assets as on December 30, 2022)
