CAGR – Compound Annual Growth Rate. **Past performance may or may not be sustained in future and not a guarantee of future returns.** These figures pertain to performance of the index / model and do not in any manner indicate the returns/performance of the Scheme. There is no assurance of any returns/capital protection/- capital guarantee to the investors in this scheme of Baroda BNP Paribas Mutual Fund

Fixed Income Outlook - Opportunity Going forward!

- India's fixed-income market entered July with a more cautious backdrop as CPI inflation rose to 4.38% in June from 3.93% in May, moving above the RBI's 4% target.
- We therefore see the monetary policy stance remaining data-dependent, with the RBI likely to prioritize inflation management while retaining flexibility to support growth should external risks weigh materially on domestic activity.
- Domestic liquidity conditions remain broadly supportive, although the RBI continues to actively manage liquidity through its market operations.
- The 10-year benchmark remained around the 6.8% level through July, reflecting the balance between supportive domestic liquidity and concerns around inflation, crude oil and global rates.
- We expect liquidity to remain an important support for the front end but believe the long end will continue to trade with a higher risk premium.
- The RBI's special FCNR(B) deposit swap facility, announced in June and available for fresh/renewed deposits mobilized between June 8 and September 30, has emerged as an important source of foreign-currency liquidity.
- Banks had mobilized around $32 billion under the facility by mid-July, providing a meaningful cushion to the balance of payments and reducing near-term pressure on the INR. Importantly, the FCNR(B) flows are supportive for the currency and external liquidity, but do not eliminate the structural sensitivity of the INR to crude prices. A sustained rise in oil prices would still remain a risk to INR.
- The G-sec curve saw considerable volatility during July, with the short end benefiting from expectations of easier liquidity and the RBI's measures to attract foreign currency inflows, while the long end remained more vulnerable to inflation, crude and global yield risks.
- The 2-year yield moved from around 5.97% at the beginning of July to around 5.92% towards month-end, while the 10-year yield ended July at approximately 6.83%, resulting in a relatively steep curve.
- The long end also faced pressure from the sharp rise in crude prices and the uncertainty around foreign demand for Indian government bonds.
- Foreign investors had turned net sellers of FAR bonds towards the end of July after strong inflows earlier in the month, while Bloomberg's decision to defer India's inclusion in its Global Aggregate Index added another near-term headwind.
- Overall, the curve continues to reflect a divergence between a relatively well-supported front end and a long end that demands a higher risk premium for inflation, fiscal and external-sector risks.

About the Underlying Funds

Intended Positioning & Philosophy - Baroda BNP Paribas Corporate Bond Fund**

Baroda BNP PARIBAS MUTUAL FUND

Allocates minimum 90-95% in Sovereign/AAA/A1+ assets

Maintaining issuer level duration up to 10 year across asset class

Portfolio duration is dynamically managed within 3 to 5 years

Higher Diversification, Lower Concentration with Limited Volatility

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

* Data as on July 31st, 2026 Baroda BNP | Monthly Factsheet | MF India | SIP Investment

**Considering the current market conditions, the scheme intends to invest in the Baroda BNP Paribas Short Duration Fund. The Fund Manager may at its discretion invest in any other debt-oriented schemes of Baroda BNP Paribas Mutual Fund as listed in SID. For more information please visit the AMC website (www.barodabnpparibasmf.in)

Intended Positioning - BBNPP Corporate Bond Fund**

Baroda BNP Paribas Corporate Bond Fund is the underlying fund for debt allocation. Why ?

- Guiding principle of the fund aims to invest in AA+ and above rated corporate bonds.
- The fund operates majorly into highly rated space by, allocating minimum 85% in Sovereign/AAA/A1+ assets* of the portfolio.
- We intend to remain invested in 2yr-4yr maturity assets as we believe spreads remain attractive in this segment. In addition to enhance the accrual of the fund we continue to stay invested in AAA (SO) PTC's which also helps portfolio diversification.

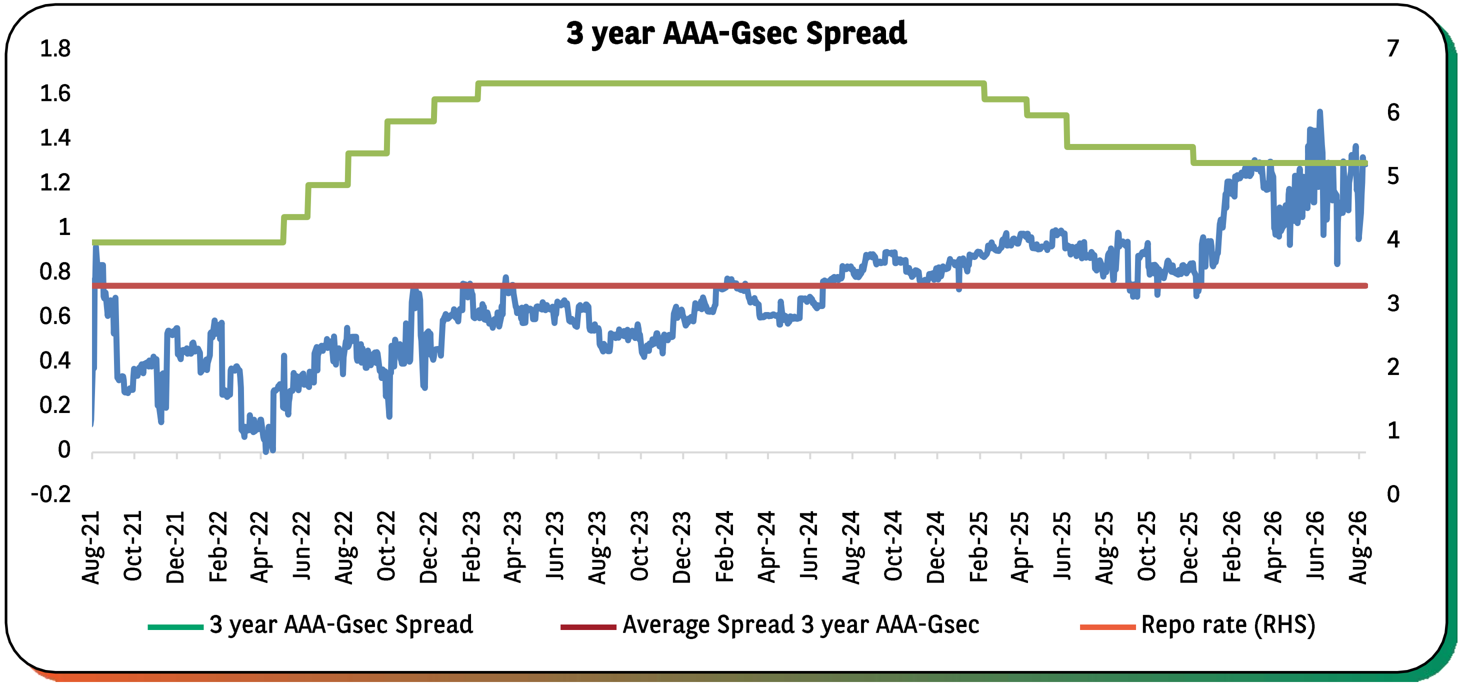
Intended Positioning - Baroda BNP Paribas Short Duration Fund**

Baroda BNP Paribas Short Duration Fund is the underlying fund for debt allocation. Why ?

- The guiding principle of the fund aims higher diversification and lower concentration with limited volatility through curb on durations at fund as well as issuer level.
- The fund tries to diversify across group/issuer and asset type to avoid concentration risk.
- The fund ensures liquidity through allocation to issuer with high liquidity in market



Declining conflicts, current transition of banking system liquidity from deficit to surplus mode and current available elevated spreads in our view presents a com- pelling opportunity.

Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization.
For complete portfolio details please refer to the website (www.barodabnpparibasmf.in) The stocks mentioned above, may or not form part of the portfolio in future.
* To know in detail about the scheme, please refer the Scheme Information Document.

Overarching Philosophy of the Large Cap Fund

Allocation more than Selection is a key determinant for success

- The Investment Universe is made up of India's largest companies**
- Basic hygiene Governance levels mostly exist in all the companies
- Theses are the mostwell researched and well tracked companies under constant scrutiny**

The Interplay of Macro-economics and their sectoral impacts is an important facet of allocating weights.

Active shuffling of sectors based on our views on the economy (accelerating vs decelerating), and monetary conditions (hardening vs softening).

Growth at a Reasonable Price (GARP) remains a key philosophy of selection of companies.

* These views alone may or may not be sufficient and should not be used for the development or implementation of an investment. To know in detail about the scheme, please refer the Scheme Information Document

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

^Concept of Macaulay duration:
The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration.

Baroda BNP Paribas Large Cap Fund

(An Open ended Equity Scheme predominantly investing in large cap stocks)
