For detailed load structure please refer Scheme Information Document of the scheme.

ABOUT THE FUND

- Baroda BNP Paribas India Consumption Fund is an open-ended thematic equity scheme following consumption theme.
- The Scheme intends to invest in secular growth stories aided by rising aspirations, high income levels, high working age population, digital influence, financialisation, policy reforms and urbanisation to name a few. We believe the broader consumption theme is likely to deliver growth from a long-term perspective and is the structural story of India.
- The focus is on companies having strong competitive advantage, with high earnings visibility over the long run. These are businesses which interact directly with their consumers, i.e., following primarily a B2C (business-to-consumer) model.
- The Scheme invests across market capitalization viz. large, mid and small cap and follows a pure bottom-up stock picking approach.
- The Scheme is suitable for investors who have a long-term investment horizon.

CONSUMPTION DRIVERS

PORTFOLIO POSITIONING

- We have exposure to consumer-facing companies in the auto, FMCG, building materials and retail that we believe have good growth potential. We are encouraged by the bounce back on pent up demand in the consumer segment. We believe that space is well poised as worse of the input price pressure may be behind.
- The Financial sector remains one of the highest overweight sectors as we believe financial services is one of the important parts of the consumption story. We are participating in the same through a mix of select private banks, insurance companies and listed asset management companies.
- Consumption remains a secular investment theme on the back of improving per capita income within the country.
- The scheme has a mix of mid and small cap companies (21%) along with select large cap companies (74%) believed to be having stable and healthy cash flows. Our exposure to mid and small cap names is largely companies, which we believe have strong balance sheets, cash flows, leadership position in sector and strong track record.

HISTORIC MARKET CAPITALIZATION (% of Net Assets)

CURRENT MARKET CAP (% of Net Assets)

*The scheme is a 'Transferee Scheme', and accordingly, the ratios are being provided considering the weighted average NAVs of both the Transferor Scheme and Transferee Scheme.

Key Statistical Ratios - The information contained in this report has been obtained from sources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The Standard Deviation is used to measure the volatility of returns. Sharpe Ratio is the measure of the risk - adjusted performance. Beta is the measure of the portfolio's volatility to its respective benchmark. The risk free rate of return considered for calculation of Sharpe ratio is 6.70%, as per 1 day MIBOR rate on the last business day of the month. Sharpe ratio, Volatility/Standard deviation is annualised based on 36 monthly data points. Beta is based on last 36 monthly data points.

Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable

NAV Movement (Rs. 10,000 Invested at Inception) - All returns are for Regular Plan - Growth Option. Past performance may or may not be sustained in future and should not be used as a basis of comparison with other investments. Returns do not take into account the load, if any.

SIP Performance - Returns do not take into account the load and taxes, if any. The data assumes investments in Regular Plan - Growth option. % CAGR Returns are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return), the above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. the AMC/ Mutual fund is not guaranteeing or forecasting or promising any return. SIP does not assure a profit or guarantee protection against loss in a declining market.

The risks associated with investments in equities include fluctuations in prices, as stock markets can be volatile and decline in response to political, regulatory, economic, market and stock-specific development etc. Please refer to Scheme Information Document for detailed Risk Factors, asset allocation, investment strategy etc.
