WHY CONSIDER LARGE CAPS?

Compared to Mid & Small Caps, they are truly large!

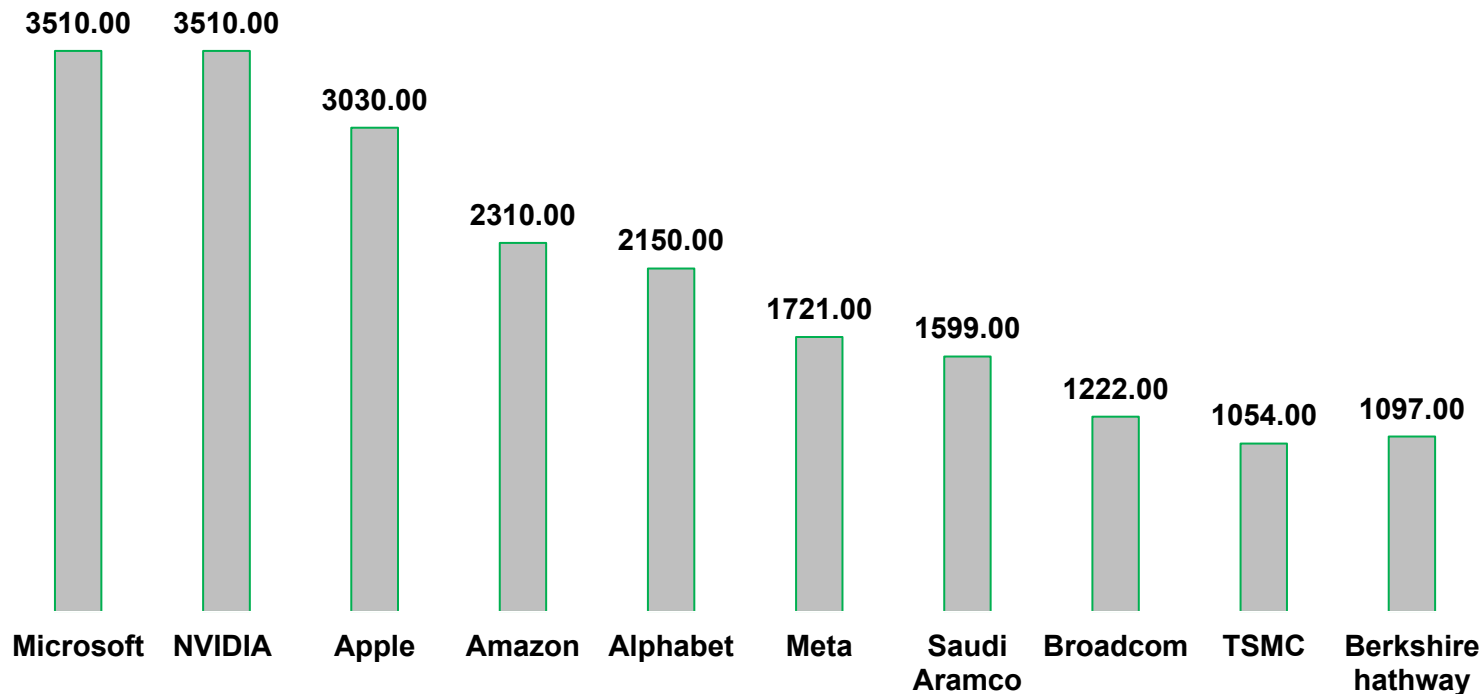

Source: Amfiindia.com. Latest Available Data as on April 30th 2025. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.**

Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization. For complete portfolio details please refer to the website (www.barodabnpparibasmf.in)

Large caps: The leading performers across the world!

5 year Absolute growth(%)

Super large caps of the world are still growing...

Source: Bloomberg. Data from 31st December 2019 to 30th May 2025

Returns here are absolute, point-to-point returns. The above illustration is for comparison purpose only and should not constitute as investment advice. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and the fund may or may not have any future position in these sector(s)/stock(s)/issuer(s).

Large caps: Current theme!

Advantageous:

Healthcare: Advancements by Indian companies into new areas like GLP1, peptides etc. Tariff related disruptions could act as a short-term blip to the sector.

Industrials: Government enhancing capex to catch up on shortfall of earlier part of the year. Power and T&D remains a major area of spends.

Utilities: Rising energy demand; transition to renewables.

Neutral:

Telecom: Consolidation of competitive forces. Tariff increases are coming at a slow clip and spectrum costs are tapering off

Staples: More liquidity in the term of taxpayers through budget tax breaks, expectation of normal monsoon and thereby rural recovery to aid growth in the sector.

BFSI: Post RBI actions on creating liquidity, we have turned slightly constructive in the medium term and added 300 bps weights to the sector during the month while keeping our stance as neutral.

Dis-advantageous:

Materials: Weaker global growth could be a headwind on demand. Tariff protection could keep the sector in a limbo.

IT: Weakness in the DXY (dollar index) and headwinds of weaker than expected global growth amid the tariff uncertainties etc. Second order weakness could hurt tech spends.

Consumer Discretionary: Sign of certain slowdown in discretionary consumption which is making us near term cautious. We continue to observe a) recent tax breaks b) monsoon being normal as a boost to farm income c) pick up in the festive season in 2H to potentially change our stance on this space.

Source: Bloomberg. Dated 30th May 2025.

Have Resources to Fund Innovation!

- Large cap companies invest in upcoming themes and technology either directly or through the Mergers and Acquisition route.
- They have the capital & the know how required to fund innovation.

Below are some examples of Innovations & upcoming themes and the large cap companies funding them:

The above examples are just to explain the concept of how large caps can be innovative. The stocks mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). The information should not be construed as an investment advice and investors are requested to consult their investment advisor and arrive at an informed investment decision before making any investments.

. Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization.

Mr. Dependable of the Equity world!

- During crisis, large caps tend to fall lesser compared to the mid and small caps.
- This makes them an ideal “core” component of any portfolio.

Source: NSE India and Internal. Data updated as on 30th May 2025

Large caps represented by Nifty 100 TRI; mid caps by Nifty Midcap 150 TRI and small caps by Nifty Small cap 250 TRI. Returns here are absolute, point-to-point returns. The above illustration is for comparison purpose only and should not constitute as investment advise. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.**

WHY NOW?

Baroda
BNP PARIBAS
MUTUAL FUND

Together for more

India at Growth Stage: Large caps to benefit!

India is going to witness two major shifts:

1.

Increase in Per capita income

Source: Standard Chartered Bank Report of July 2023 (latest available data)

2.

Higher earning capacity

Source: Morgan Stanley report Nov 2022 (latest available data)

- Typically, as an economy grows along with higher disposable income, people tend to spend more on quality and premium products.
- Also, as economy grows sectors like Auto, Consumer Discretionary, Retail, Hotels & Tourism, and so on may grow faster.
- The leading companies in these sectors are pre-dominantly large caps.

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and the fund may or may not have any future position in these sector(s)/stock(s)/issuer(s).

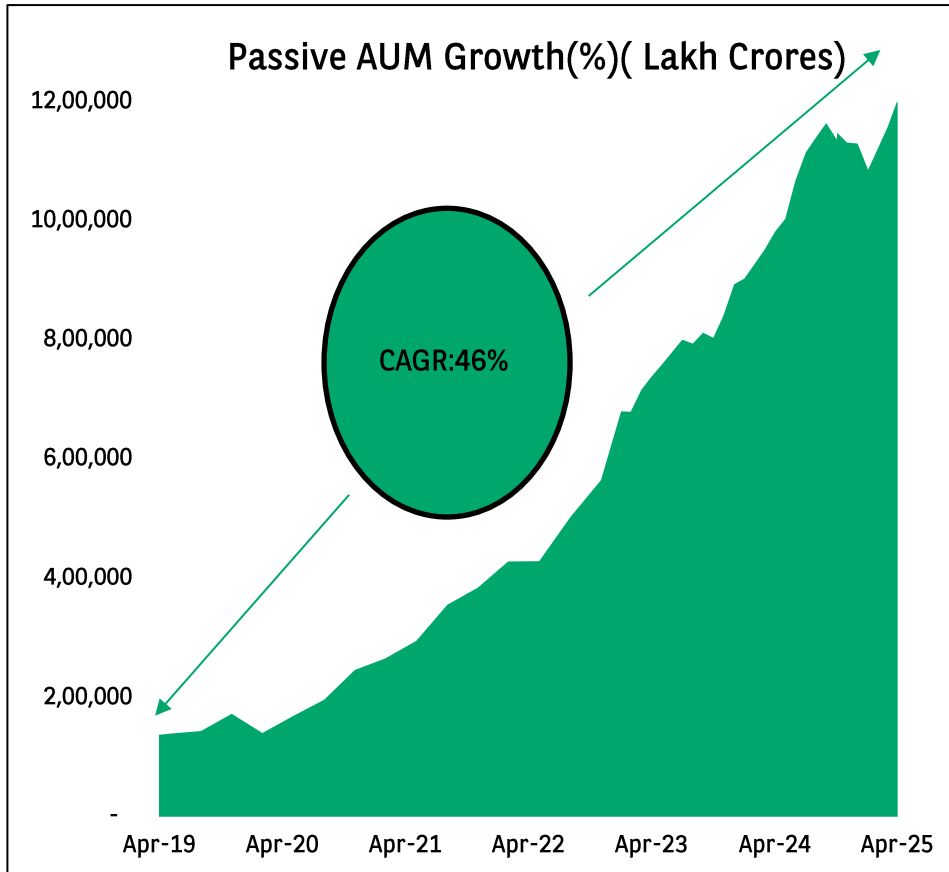

FII flows drive performance

Period	Cumulative FPI Flows (in Crs)	Nifty 100 TRI Performance (Absolute)
Apr-14 to Sep-14	60,620	21%
Mar-16 to Sep-16	63,847	14%
Feb-17 to Jul-17	60,112	15%
Oct-20 to Mar-21	197,655	26%
Mar-23 to Aug -23	169,433	13%
June-24 to Dec-24	1,65,769	1.22%
Jan-25 to March-25	32,981	-1.56%
April-25 to May-25	30,950	7.08%

- Large cap Index has delivered reasonable returns on account of consistent positive FII flows.
- Since sep-24 Indian stocks faced pressure due to a global uncertainties, slowing economic growth, rising US bond yields, market corrections, and significant selling by Foreign Institutional Investors (FIIs).
- With India's robust macros, strong GDP growth, India likely to attract higher foreign flows.

Source: MFI; Dated 30th May,2025. Past performance may or may not be sustained in future and is not a guarantee of any future returns.

Tailwinds from Inflows to Passives

- The Passive funds have seen a rapid growth in the AUM in the past years
- Majority of this AUM would flow into large cap stocks
- This tends to provide growth tail winds for the large cap stock to grow further

Data as on May 30th, 2025| Source: MFI Explorer, (It is the latest available data)

* Average ETF exposure rebased to 100%

For AUM growth, the entire universe of Domestic ETFs and Index Funds is considered. **Past performance may or may not be sustained in future and is not a guarantee of any future returns**

. Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization. ABOUT

BARODA BNP PARIBAS LARGE CAP FUND

(AN OPEN ENDED EQUITY SCHEME PREDOMINANTLY INVESTING IN
LARGE CAP STOCKS)

Together for more

About the Fund

- Large cap funds typically invest in blue chip companies and market leaders which could generate stable revenue and earnings due to their established businesses and tenure.
- These companies being seasoned and large corporate houses, are likely to withstand market cycles. Mid or small cap companies tend to not have the same level of stability and therefore carry a higher degree of risk than large caps.
- Baroda BNP Paribas Large Cap Fund invests predominantly in such **large capitalization** companies with a **track record of growth in the long term**.
- The scheme intends to be well diversified across sectors and intends to focus on **quality names** exhibiting sound management and fundamentals with sustainable earnings growth potential.
- The scheme is suitable for **new and seasoned investors** who have a long-term investment horizon.

Overarching Philosophy

- **Allocation more than Selection is a key determinant for success**
 - The Investment Universe is made up of India's largest and the most successful companies
 - Basic hygiene Governance levels exist in all the companies
 - Thesis are the most well researched and well tracked companies under constant scrutiny
- **The Interplay of Macro-economics and their sectoral impacts is an important facet of allocating weights.**
- **Active shuffling of sectors based on our views on the economy (accelerating vs decelerating), and monetary conditions (hardening vs softening).**
- **Growth at a Reasonable Price (GARP) remains a key philosophy of selection of companies.**

Consistent Performance

Data as on 30th May ,2025. Source: Internal

The returns have been calculated on absolute basis. For complete performance please refer to slide no. 24. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.**

Fund Positioning

- May turned out to be an eventful month with the events at our north-western border. Border skirmishes with Pakistan followed by the announcement of a ceasefire led to some nervousness on markets. The other surprise was the early arrival of monsoons on the western coastline resulting in an early reprieve from the hot summers. This may have implications for certain products like air conditioners etc.
- Summer surge in power demand was also little less profound and there were instances of traded power prices plunging on exchanges. The earnings season also continued into the month (FY25 full year) though on an overall basis there seems to be a marginal tone down of numbers (1-2%) relative to expectations on an aggregate basis.

Data as on 30th May, 2025. | Source: Internal Research

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization.

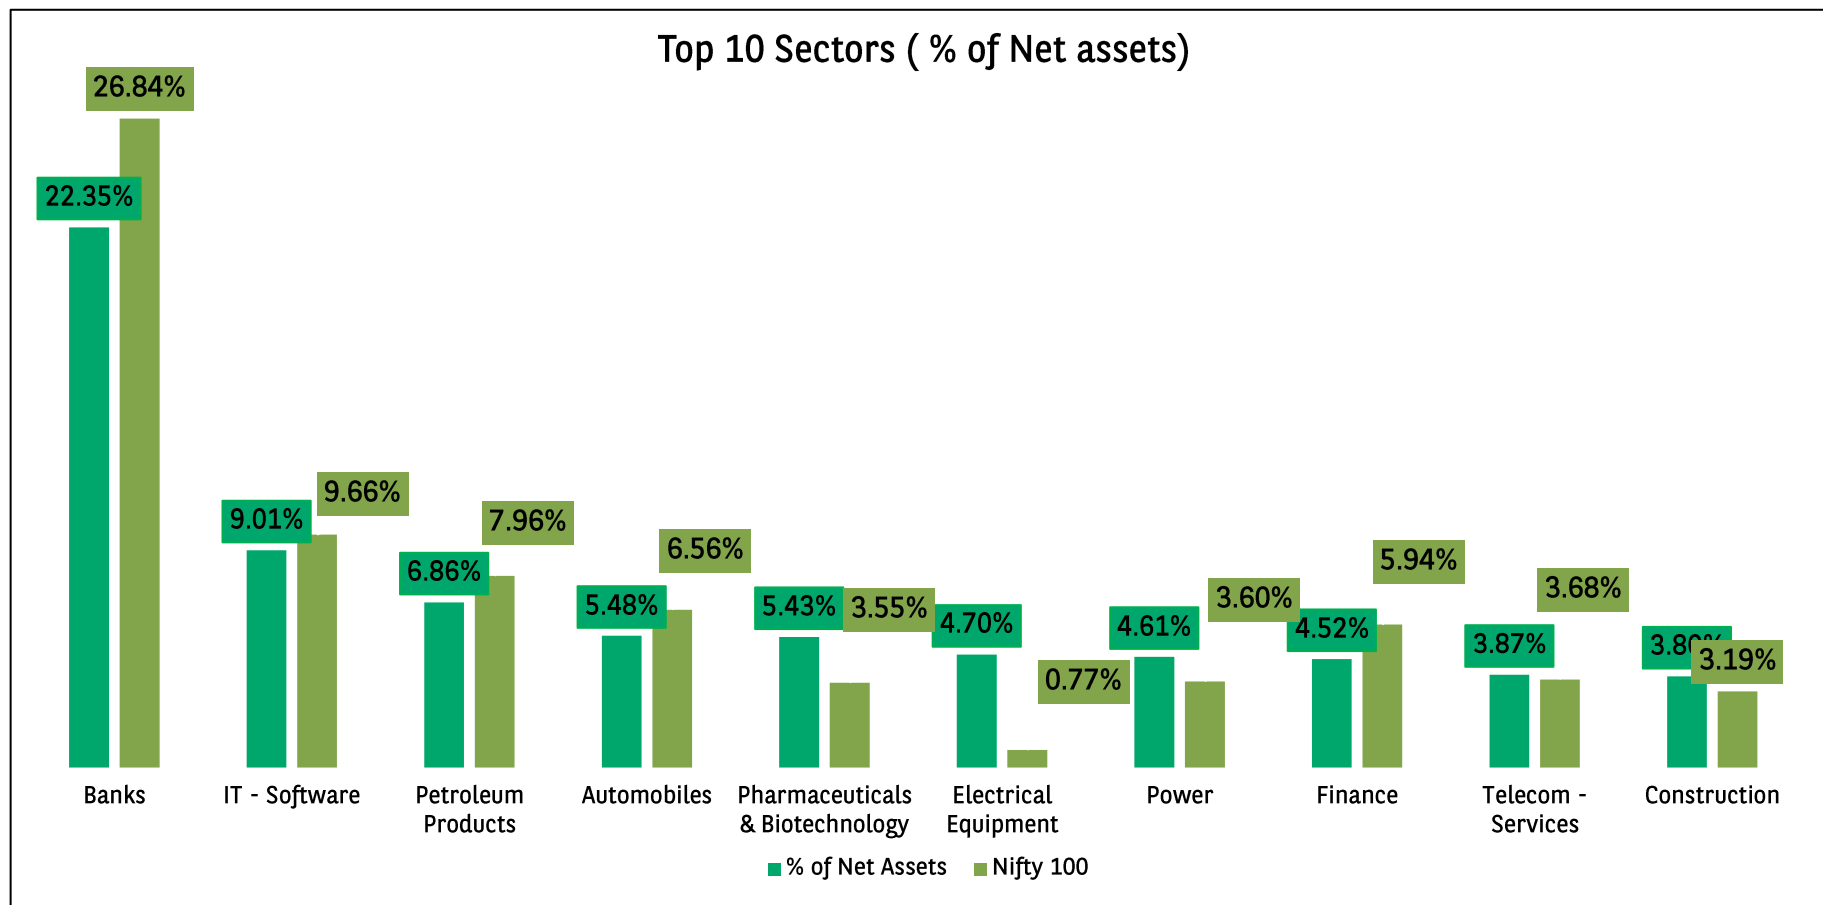

Fund Positioning

- Given the current situation, from a directional viewpoint we had undertaken two major shifts last month – the first has been a preference for local over global (given the tariff uncertainties, possibilities of weaker global growth etc) and the second was a marked increase in BFSI weights as a follow-through to RBI moves (largely via private banks). We continue to stay underweight in materials and energy. We have however added marginally to our exposures on consumer discretionary, industrials (tactically to some defence as well) etc.
- The fund is currently invested to the tune of ~94.2% up 70 bps from April levels due to the additions mentioned above being undertaken. Large caps account for ~81% (100bps lower than April) with the balance stemming from mid-caps.
- We continue to stay overweight on industrials, healthcare and utilities. Within utilities there is a strong preference for base load players than those exposed to the vagaries of merchant power.
