\*The scheme is a 'Transferee Scheme', and accordingly, the ratios are being provided considering the weighted average NAVs of both the Transferor Scheme and Transferee Scheme.

\*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable.

Data as on May 30, 2025

## ABOUT THE FUND

- Baroda BNP Paribas Large cap funds typically invest in blue chip companies and market leaders which are expected to generate revenue and earnings due to their established businesses and tenure.
- These companies being seasoned and large corporate houses, are expected to withstand market cycles. Mid or small cap companies do not have the same level of stability and therefore carry a higher degree of risk than large caps.
- Baroda BNP Paribas Large Cap Fund invests predominantly in such large capitalisation companies which has a proven track record of growth in the long term.
- The Scheme intends to be well diversified across sectors and intends to focus on quality names exhibiting sound management and fundamentals with sustainable earnings growth potential.
- The Scheme is suitable for investors who have a long term investment horizon.

## WHY LARGE CAP?

- Large-cap funds are equity funds that invest in relatively stable companies (top 100 companies listed on the stock exchange).
- Owing to the high degree of stability of the underlying equity stocks, large cap funds have lower risks compared to mid and small caps making them an ideal investment option for both new and seasoned investors.
- Large cap companies are leaders in their respective industries and tend to provide relatively stable returns over longer periods.
- These companies owing to their large capital are likely to pay off debt on time, withstand the market turmoil and have a good debt-to-equity ratio.

## PORTFOLIO POSITIONING

- May turned out to be an eventful month with the events at our north-western border. Border skirmishes with Pakistan followed by the announcement of a ceasefire led to some nervousness on markets. The other surprise was the early arrival of monsoons on the western coastline resulting in an early reprieve from the hot summers. This may have implications for certain products like air conditioners etc. Summer surge in power demand was also little less profound and there were instances of traded power prices plunging on exchanges. The earnings season also continued into the month (FY25 full year) though on an overall basis there seems to be a marginal tone down of numbers (1-2%) relative to expectations on an aggregate basis.
- Given the current situation, from a directional viewpoint we had undertaken two major shifts last month - the first has been a preference for local over global (given the tariff uncertainties, possibilities of weaker global growth etc) and the second was a marked increase in BFSI weights as a follow-through to RBI moves (largely via private banks). We continue to stay underweight in materials and energy. We have however added marginally to our exposures on consumer discretionary, industrials (tactically to some defence as well) etc.
- The fund is currently invested to the tune of ~95.2% up 70 bps from April levels due to the additions mentioned above being undertaken. Large caps account for ~81% (100bps lower than April) with the balance stemming from mid-caps.
- We continue to stay overweight on industrials, healthcare and utilities. Within utilities there is a strong preference for base load players than those exposed to the vagaries of merchant power.

## CURRENT MARKET CAP (% of Net Assets)

## NAV MOVEMENT (₹10,000 Invested at Inception)

NAV & Index values re-based to ₹ 10,000 depicting lump sum investment since the inception date of the fund.  
**Past performance may or may not be sustained in future and is not a guarantee of any future returns**  
 The above chart show the NAV movement since inception to May 30, 2025

## SIP PERFORMANCE

Period	Amount Invested In(₹)	Baroda BNP Paribas Large Cap Fund (Regular Plan - Growth)		Nifty 100 TRI (Benchmark Index Tier-1)

### DISCLAIMERS

**# Key Statistical Ratios** - The information contained in this report has been obtained from sources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The Standard Deviation is used to measure the volatility of returns. Sharpe Ratio is the measure of the risk - adjusted performance. Beta is the measure of the portfolio's volatility to its respective benchmark. The risk free rate of return considered for calculation of Sharpe ratio is 5.86%, as per 1 day MIBOR rate on the last business day of the month. Sharpe ratio, Volatility/Standard deviation is annualised based on 36 monthly data points. Beta is based on last 36 monthly data points. Information ratio aims to show consistency in generating excess returns relative to benchmark, which is measured by the tracking error. Tracking error is the measure of the deviation from the benchmark.

**Market Capitalization as per SEBI** - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization

**Portfolio Positioning, Top 10 Sectors/Stocks** - details contained herein is for general information purposes only and does not indicate assurance of future Scheme performance. The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website ([www.barodabnpparibasmf.in](http://www.barodabnpparibasmf.in)).

**NAV Movement (Rs. 10,000 Invested at Inception)** - All returns are for Regular Plan - Growth Option. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** Returns do not take into account the load, if any.

**SIP Performance** - Returns do not take into account the load and taxes, if any. The data assumes investments in Regular Plan - Growth option. % CAGR Returns are computed after accounting for the cash flow by using the XIRR method (investment internal rate of return). the above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. the AMC/ Mutual fund is not guaranteeing or forecasting or promising any return. SIP does not assure a profit or guarantee protection against loss in a declining market.

The risks associated with investments in equities include fluctuations in prices, as stock markets can be volatile and decline in response to political, regulatory, economic, market and stock-specific development etc. Please refer to Scheme Information Document for detailed Risk Factors, asset allocation, investment strategy etc.
