India's GDP growth through the decade

Source: Bloomberg, IMF, 2030 estimates from CEBR (The Centre for Economics and Business Research)

Large caps are getting larger

- Market cap growth of Large (top 100 companies) grew faster than Mid and Small companies in last 5 years (Mar18-Dec'22)

Latest available data as on 30th December 2022. Source: MOSFSL, Capital line, AMFI. Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization.

Past performance, including such scenarios, is not an indication of future performance.

Large caps outperform Mid and Small caps

*Sales CAGR

Source: MOSFSL, Capital line

EBITDA Margin (%)

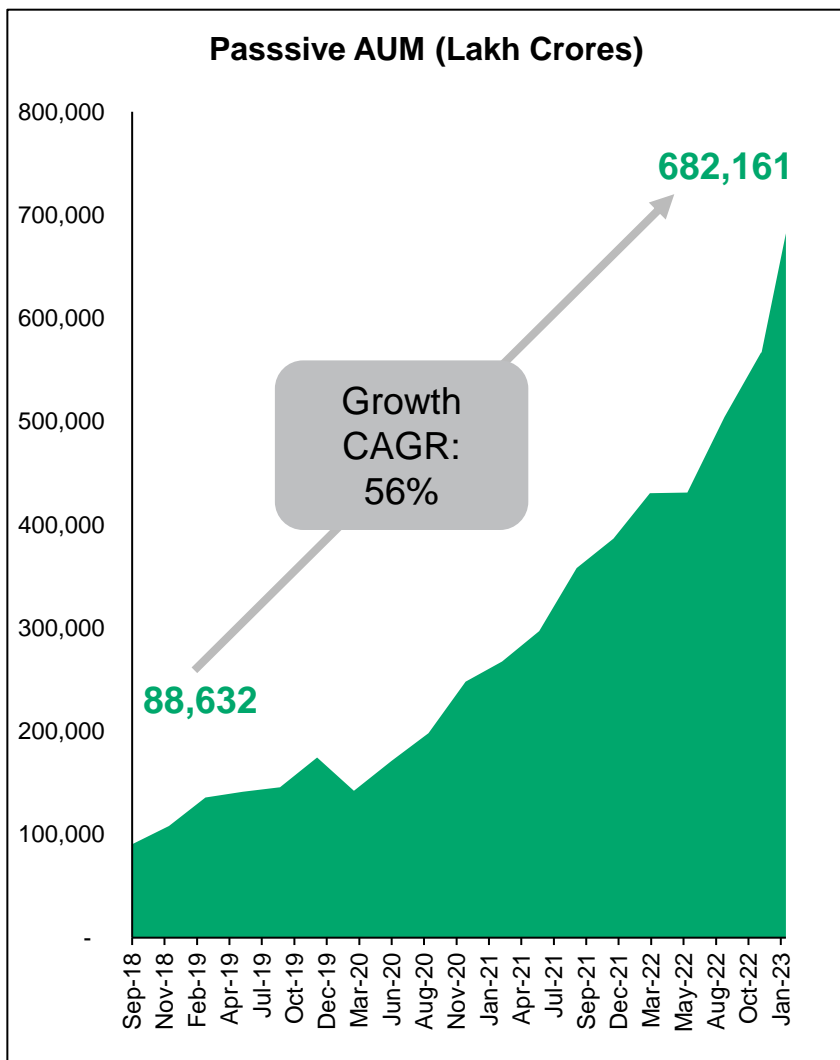

EBITDA margins (Excluding financials)

- Large companies continues to command leadership position in Sales/ EBITDA/PAT growth.
- In last 10 years, Large companies (Ex-financials) saw EBITDA margin expansion of 490 bps, while mid and small companies saw EBITDA margin expanded by 90 bps and 490 bps respectively.

Data as of March 31, 2022. The same would be updated end of every financial year.

*This is based on actual financial data released by the companies every financial year. Past performance, including such scenarios, is not an indication of future performance.

Tailwinds from inflows to Passives

- The Passive funds have seen a rapid growth in the AUM in the past years
- A lot this AUM will flow into large cap stocks
- This tends to provide growth tailwinds for the large cap stock to grow further

Data as on January 31, 2023 | Source: MFI Explorer,

* Average ETF exposure rebased to 100%

For AUM growth the entire universe of Domestic ETFs and Index Funds

Past performance, including such scenarios, is not an indication of future performance.

UPDATE ON BARODA BNP PARIBAS LARGE CAP FUND

(AN OPEN-ENDED EQUITY SCHEME PREDOMINANTLY INVESTING IN
LARGE CAP STOCKS)

For Product Label and Riskometer of the Scheme please refer slide no. 24

Together for more

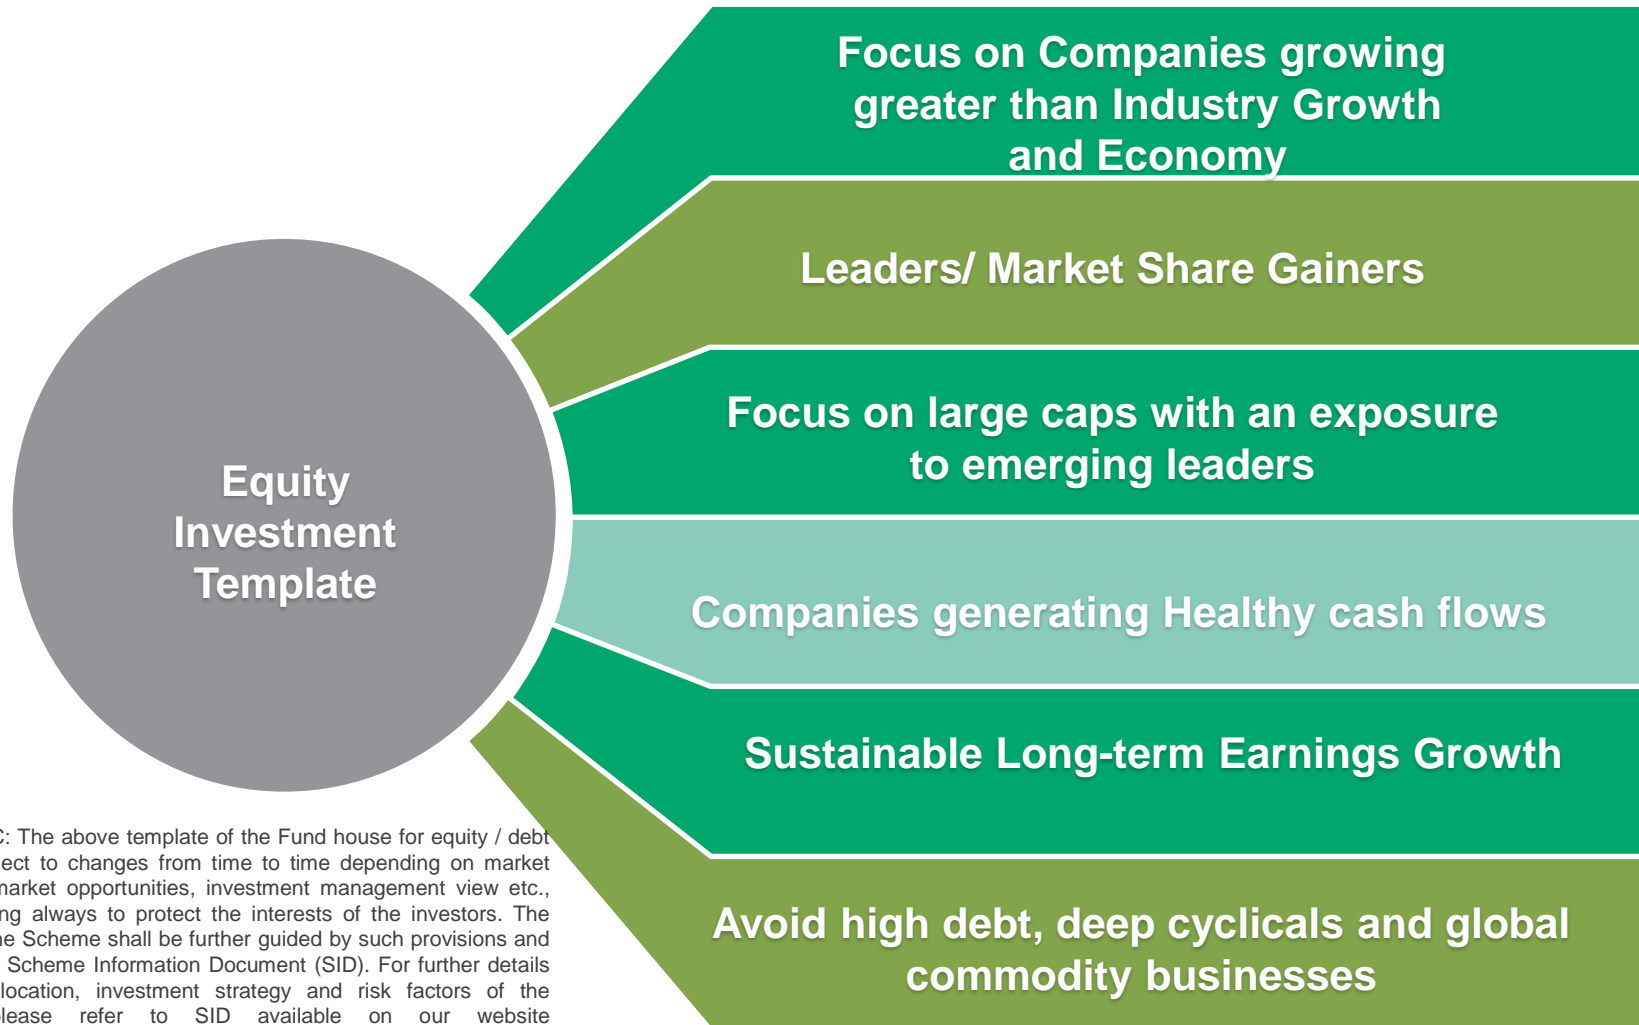

About the Fund

- Large cap funds typically invest in blue chip companies and market leaders which could generate stable revenue and earnings due to their established businesses and tenure.
- These companies being seasoned and large corporate houses, likely to withstand market cycles. Mid or small cap companies tend to not have the same level of stability and therefore carry a higher degree of risk than large caps.
- Baroda BNP Paribas Large Cap Fund invests predominantly in such **large capitalization** companies with a **proven track record of growth in the long term**.
- The scheme intends to be well diversified across sectors and intends to focus on **quality names** exhibiting sound management and fundamentals with sustainable earnings growth potential.
- The scheme is suitable for investors who have a long-term investment horizon.

Overarching Philosophy

- Allocation More than Selection is a key determinant for success
 - The Investment Universe is made up of India's largest and the most successful companies
 - Basic hygiene Governance levels exist in all the companies
 - Theses are the most well researched and well tracked companies under constant scrutiny
- The Interplay of Macro-economics and their sectoral impacts is an important facet of allocating weights
- Active shuffling of sectors based on our views on the economy (accelerating vs decelerating), and monetary conditions (hardening vs softening)
- Growth at a Reasonable Price (GARP) remains a key philosophy of selection of companies.

BBNPP AMC Equity Investment Template

BBNPP AMC: The above template of the Fund house for equity / debt may be subject to changes from time to time depending on market conditions, market opportunities, investment management view etc., intention being always to protect the interests of the investors. The portfolio of the Scheme shall be further guided by such provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme, please refer to SID available on our website (www.barodabnp-paribasmf.in). Data as of January 2023.

Current Themes

Digitalization of the financial industry

- India is rapidly evolving on financial penetration with micro finance, small finance banks, payment banks and payment apps. UPI has made affordable even small transfers and promises to be a multi year theme.

Enhancing manufacturing capabilities

- Combination of rapid indigenisation (eg defence), import substitution (eg electronics), diversification of supply chains (eg China +1 in chemicals/drugs etc), competitive offshoring of manufacturing (eg Europe + 1 by MNC's) could augur well for the capital goods & crop protection industry.

Formalisation of trade

- Favourable push from legislation such as GST is reducing the spread between the formal and local industry. We see favourable tailwinds for retailing, consumer durables, jewellery and other parts of staples etc

New energy initiatives

- A big focus is on reducing carbon footprint and reliance on fossil fuels over time. This manifests itself via investments in electric vehicles, hydrogen chain or renewables. We see benefits accruing to asset owners in this space as well as technology/product suppliers to builders of such eco-systems.

Plays on macro stress points

- India's savings-investment gap has meant a constant fracture point on the issue of its twin deficit. Segments such as IT, healthcare & tourism offer a play to benefit from the pains of India's twin deficits

The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website (www.barodabnpparibasmf.in).

Current Positioning (1/2)

Top 5 Active Weight (% of Net Assets)

Bottom 5 Active Weight (% of Net Assets)

- The fund continued to maintain its marginal overweight stance on the financial sector. Within the financial sector, there is a clear preference for banks over NBFC's given the rising rate environment and the better liability franchise that banks enjoy.
- Industrials remain a large relative overweight stance given the pickup in capex spending and PLI schemes. IT has been the other overweight given favourable valuations for the sector.
- Other overweights include Autos where we added to a two-wheeler exposure given the favourable government policy (higher PDS subsidy) and the expectation of a buoyant rabi crop boosting farm incomes.
- Commodities (largely metals), utilities (guaranteed return with rising rate of interest) and staples (continuing weakness in rural markets) remain an underweight stance for the sector.
