ABOUT THE FUND

- Baroda BNP Paribas Liquid Fund invests in debt and money market instruments with maturity of up to 91 days.
- The fund primarily invests in short term debt instruments including treasury bills, certificate of deposits (CD), commercial papers (CP), Tri-party repo (TREPs) on CCIL platform with Government Securities as collateral/reverse repos, etc.
- The investment mandate of up to 91 days aims to reduce the sensitivity of the portfolio to interest rate changes.
- As the scheme invests predominantly in money market instruments with high credit rating, the risk of default may be low. The scheme aims to offer twin advantages of low risk with high liquidity.
- The may be suitable for investors looking to park their idle or surplus money for a short term investment horizon.

PORTFOLIO POSITIONING

- The scheme intends to maintain average portfolio maturity between 25 to 45 days and continues to remain invested in liquid assets, largely in Banks, Public Sector Undertaking/Private Finance Initiatives and a few select NBFCs.
- Liquidity remained weak at the end of January. However, going forward, we expect liquidity to remain tight due to advance tax and GST.
- RBI increased the repo rate by 25 bps in February policy to 6.50%
- The scheme remains open to taking tactical liquidity driven interest rate calls.
