*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable.

ABOUT THE FUND

- The Scheme aims to maximize long-term capital appreciation by investing in equity and equity related securities of companies engaged in manufacturing sector.
- Manufacturing is recognized as the backbone of any economy, contributing significantly to GDP, employment, and overall economic growth.
- The Indian government has prioritized manufacturing through initiatives like "Make in India" and "Atmanirbhar Bharat," aiming to transform India into a global manufacturing hub.
- These initiatives have liberalized foreign direct investment (FDI) policies, allowing 100% FDI in most sectors, which enhances investment opportunities in manufacturing Sector.
- The current positive domestic environment, coupled with a global shift away from reliance on China, positions the Indian manufacturing sector favorably for long-term growth.
- This makes it an attractive investment avenue for those looking to capitalize on India's economic trajectory.

PORTFOLIO POSITIONING

- The NIFTY manufacturing TRI index was up sharply by 330bps during the month of October. This was slightly below market performance given the sharp rally in the prior month on GST cuts.
- We added nearly 170bps to our materials exposure reducing the magnitude of our underweight to the metals sector. We also added to industrials by ~130bps mainly by way of exposures to the power equipment and defence space. This was largely funded by some cuts to the consumer discretionary space (~130bps - some profit taking) and healthcare sectors (~90bps).
- Cash levels for the fund was placed at ~4% for the month (similar to levels of the prior month). Large caps account for ~45% of the total exposure with the balance of equity from the SMID space.
- We continue to stay underweight the consumer discretionary (mainly by way of an underweight on consumer electricals and EMS spaces) and materials sectors. Industrials, energy and healthcare remain our key overweight sectors.
- The top 5 sectoral exposures of the fund post deployment stay put as consumer discretionary, industrials, healthcare, materials and energy.
