Load Structure

Exit Load: If units of the Scheme are redeemed or switched out up to 10% of the units (the limit) within 12 months from the date of allotment – Nil.

• If units of the scheme are redeemed or switched out in excess of the limit within 12 months from the date of allotment - 1% of the applicable NAV; • If units of scheme are redeemed or switched out after 12 months from the date of allotment - Nil.

For detailed load structure please refer Scheme Information Document of the scheme.

"The scheme is a 'Transferee Scheme', and accordingly, the ratios are being provided considering the weighted average NAVs of both the Transferor Scheme and Transferee Scheme. *Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable

**Mr. Pratish Krishnan was appointed as Fund Manager w.e.f November 29, 2025 in place of Mr. Shiy Chanani.

Data as on November 28, 2025

ABOUT THE FUND

- Baroda BNP Paribas Mid Cap Fund invests predominantly in mid-capitalization companies with high growth potential.
- Mid cap companies are uniquely positioned between small developing companies and large mature companies. They are often in the "growth" phase of the business life cycle where they may be experiencing higher cash flows and earnings growth rates.
- Midcaps typically comes with a combination of elevated risk and substantial growth potential during the growth stage. They tend to be more volatile than large caps but less than small caps.
- The mid cap space remains attractive for investments owing to presence of new businesses and growth opportunities in sunrise industry, i.e., businesses or sectors in its infancy but with the potential of a rapid hoom
- The stock selection is inclined towards companies that are led by a dynamic management style and entrepreneurial flair. The focus is on growth stocks that may do well in the future and on alpha generation through a bottom-up stock picking approach.
- The Scheme is suitable for investors who have a long term investment horizon.

PORTFOLIO POSITIONING

- Domestic facing sectors like Healthcare and Consumer discretionary are key overweight sectors.
 Healthcare sector continues to be in a sweet spot with consistent growth across sub sectors like domestic pharma, international pharma, and hospitals. With normal monsoons and boost from cut in GST rates, we expect discretionary consumption to see uptick and sustain in the medium term.
- We are underweight on Financials, Utilities, Consumer staples, and IT Services. We have reduced our underweight in Financials and IT Services and increased underweight in Consumer staples.
- The allocation to small cap companies is at 17.3% while allocation to large cap companies is at 6.3%. Exposure to mid-cap companies is at 72.9%. Our cash holding is 3.5%. (Exposure as % of net assets as on November 30, 2025).
- Within the midcap universe, our focus is on identifying companies with sustainable earnings growth, leading market share, better return ratios and healthy cash flows as well as on having a blend of companies with healthy balance sheets and attractive valuations going through a favourable cycle.

 $[*] For detailed Portfolio holdings please refer to the Factsheet \\ \underline{https://www.barodabnpparibasmf.in/downloads/monthly-factsheet} \\ \underline{https://www.barodabnparibasmf.in/downloads/monthly-factsheet} \\ \underline{https://www.barodabnparibasmf.in/downloads/$

Income Distribution cum Capital Withdrawal (IDCW) HISTORY (Regular Plan - IDCW Option)

Wealth Creation in long term.

Record Date	Distribution Rate Per Unit (₹) Individual/others	CumIDWC NAV (₹)			
27-Mar-23	3.39	41.85			
27-Mar-24	4.98	57.38			
27-Mar-25	5.09	57.78			

Last 3 IDCW declared for IDCW option.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of pay-out and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. Past performance may or may not be sustained in future and is not a guarantee of any future returns. The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of Rs 10 per unit. Face value may change depending upon FV of the scheme.

DISCLAIMERS

Key Statistical Ratios - The information contained in this report has been obtained fromsources considered to be authentic and reliable. This quantitative data does not purport to be an offer for purchase and sale of mutual fund units. The Standard Deviation is used to measure the volatility of returns. Sharpe Ratio is the measure of the risk - adjusted performance. Beta is the measure of the portfolio's volatility to its respective benchmark. The risk free rate of return considered for calculation of Sharpe ratio is 5.59%, as per 1 day MIBOR rate on the last business day of the month. Sharpe ratio, Volatility/Standard deviation is annualised based on 36 monthly data points. Beta is based on last 36 monthly data points. Information ratio aims to show consistency in generating excess returns relative to benchmark ,which is measured by the tracking error. Tracking error is the measure of the deviation from the benchmark.

Market Capitalization as per SEBI - Large Cap: 1st - 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization

Portfolio Positioning, Top 10 Sectors/Stocks – details contained herein is for general information purposes only and does not indicate assurance of future Scheme performance. The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID).
