ABOUT THE FUND

- Baroda BNP Paribas Mid Cap Fund invests predominantly in mid-capitalization companies with high growth potential.
- Mid cap companies are uniquely positioned between small developing companies and large mature companies. They are often in the "growth" phase of the business life cycle where they may be experiencing higher cash flows and earnings growth rates.
- Midcaps typically comes with a combination of elevated risk and substantial growth potential during the growth stage. They tend to be more volatile than large caps but less than small caps.
- The mid cap space remains attractive for investments owing to presence of new businesses and growth opportunities in sunrise industry, i.e., businesses or sectors in its infancy but with the potential of a rapid boom.
- The stock selection is inclined towards companies that are led by a dynamic management style and entrepreneurial flair. The focus is on growth stocks that may do well in the future and on alpha generation through a bottom-up stock picking approach.
- The Scheme is suitable for investors who have a long term investment horizon.
