ABOUT THE FUND

Baroda BNP Paribas Money Market fund (MMF) is an open-ended debt scheme that invests solely in money market instrument with upto one year maturity, which are also often referred to as money market instruments. These investments are short-term liquid investments with high credit rating. The purpose of this scheme is to provide investors with a safe investment option which are characterized as a low-risk, low-return investment. It enables investors to earn Money market yields otherwise available for large & Institutional investors. Investors with a short investment horizon or with surplus cash and low risk appetite can invest in money market funds.

PORTFOLIO POSITIONING

- Banking and durable liquidity are currently comfortable, and financial conditions have significantly improved in past four months.
- RBI announced Open Market operations (OMO) purchase of INR 1.25tn for the month of May-25, taking total OMO purchase in FY26 to INR2.45tn.
- RBI liquidity management is focused on faster and more effective transmission of rate cuts.
- Going forward, we expect liquidity to remain in surplus over the next few months, with the flow of funds to the banking system to increase led by RBI dividend transfer (2.6trillion).
- The weighted average overnight Rates remained at 5.60%-5.75% during the month.
- The scheme is maintaining the higher side of Average maturity and will continue to be overweight.

DISCLAIMERS

***Concept of Macaulay duration** - The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.
