For detailed load structure please refer Scheme Information Document

*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable

ABOUT THE FUND

- The scheme intends to seek long term capital growth by investing in equity and equity related securities, debt & money market instruments, REITs / INVITS and Gold ETF.
- The scheme intends to give access to multiple asset classes, which saves the hassle of investing, tracking and maintaining investments in multiple strategies / funds.
 - Investing in Equities aim to provide Capital Appreciation, build wealth in the long term and helps to meet long term financial goals of an investor.
 - Investing in fixed income asset class aims to help with income generation and help to mitigate the volatility of the equity market by diversifying in fixed income instrument.
 - Gold is an international asset class and may help with growth in the long run. It is used to hedge against inflation and the adverse impact of geo-political events.
- Due to the unique characteristics of each asset class, each of them is suited for a different but complementary role in the portfolio.

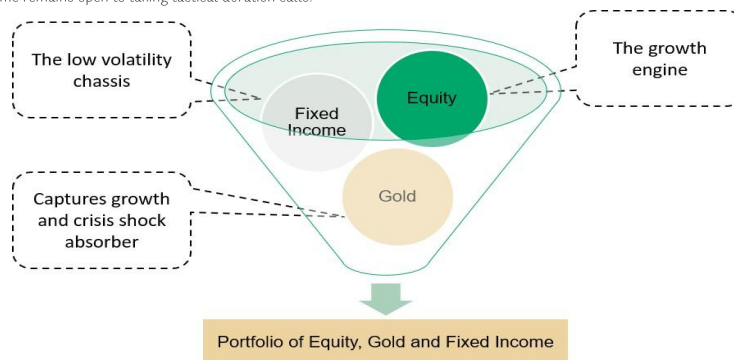

PORTFOLIO POSITIONING

Equity

- Gold continued to marginally march up by nearly 250bps for the month of July. One year returns for gold as a result at 42% towers the flat returns for equity (NSE500) during the same period. The appreciation in the yellow metal has resulted in a small inch up on our gold exposures to 15.2% (up 20bps from the prior month).
- We maintained our dominant exposure to large caps within our equity book (~72%). This is however almost 600bps below our levels for the prior month as we added to certain names in the SMID space. Some part of the reduction in large cap exposures is also attributable to the AMFI reclassification with effect from July. Our total equity exposure is currently placed at 70.3% similar to the prior month though we have shuffled some large cap exposures for the SMID space. REIT's and INVIT's were up 15bps at 1.45% while fixed income contributed to the balance.
- Over the course of the month, we added to weights on financials (~120bps) and materials (~100bps). In addition, we added ~50bps to our consumer services exposures. These were largely funded by trimming some weights on IT services (~160bps), utilities (~60bps) and energy sector (~50bps).

Debt

- Gold prices have remain range bound at 3,300\$-3,400\$ during the month.
- Rupee remained under pressure due to US-India Tariff standoff.
- Going forward, possibility of fed reducing the interest rates and thereby weakening of dollar can fuel rally in gold.
- Trade and geopolitical tensions do still remain high this month.
- We have allocated a small amount in AAA REITS and INVITS with an intention to generate alpha over debt returns from a medium-term perspective.
- The scheme invested in medium-term corporate bonds and G-sec to achieve the desired duration at the portfolio level.
- We intend to keep the duration of the fund in the range of 3.50 years - 4.50 years
- The scheme remains open to taking tactical duration calls.
