*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable

Data as on December 31, 2025

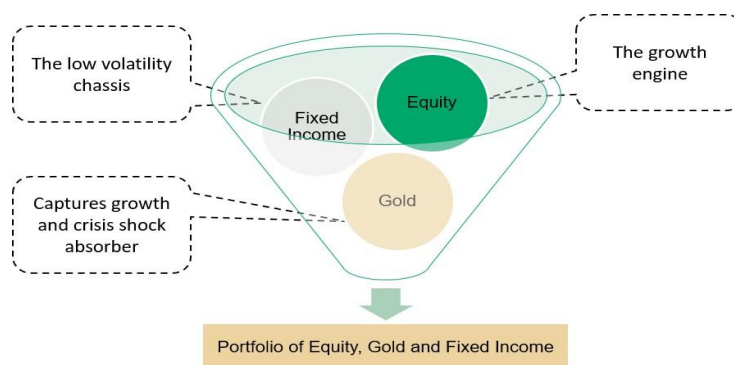

ABOUT THE FUND

- The scheme intends to seek long term capital growth by investing in equity and equity related securities, debt & money market instruments, REITs / INVITs and Gold ETF.
- The scheme intends to give access to multiple asset classes, which saves the hassle of investing, tracking and maintaining investments in multiple strategies / funds.
 - Investing in Equities aim to provide Capital Appreciation, build wealth in the long term and helps to meet long term financial goals of an investor.
 - Investing in fixed income asset class aims to help with income generation and help to mitigate the volatility of the equity market by diversifying in fixed income instrument.
 - Gold is an international asset class and may help with growth in the long run. It is used to hedge against inflation and the adverse impact of geo-political events.
- Due to the unique characteristics of each asset class, each of them is suited for a different but complementary role in the portfolio.

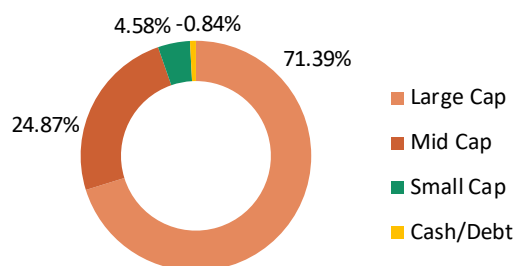

PORTFOLIO POSITIONING

Equity

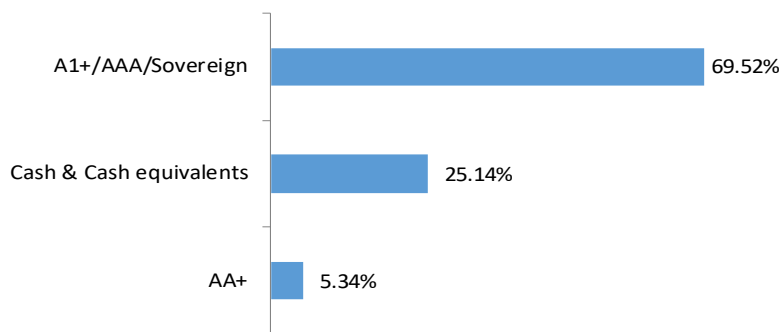

- The multi asset product is currently running a portfolio of ~68.6% equity exposures (lower by ~100bps over the prior month), down by a marginal 40bps over the prior month). Large caps account for ~71.4% of the equity component slightly higher than the prior month with the SMID space accounting for the balance.
- Gold continued to harden over the month outperforming equities with the yellow metal up 5.2% m-o-m. Some part of this appreciation also came from the weakness of the INR versus the USD. This pushed up the gold exposures to ~16.4% (higher by 20bps from the prior month and about 40bps higher than the usual band of our gold exposures). INVIT's account for ~50bps of the portfolio.
- Within the equity book the weakness in the USD globally prompted us to add to exposures in IT and metals. We also added to certain exposures in consumer services by trimming some consumer retailing exposures. We also marginally cut back on healthcare by booking some profits though we stay positive on the sector.
- Debt**
- The investment objective of the scheme is to seek to generate long term capital growth by investing in equity and equity related securities, debt & money market instruments, REITs /
- INVITs and Gold ETF
- The fixed income portion intends to keep the duration of the fund in the range of 3.50 years - 4.50 years as per constructive interest rate view.
- To achieve the same, we have allocated in mix of ~70%-30% strategy in terms of GSEC and Cash: Corporate bond composition.
- The Fund also intends to maintain its allocation to units of REITs/AnVits to enhance the potential return of the fund.
- Further, we will be open to taking tactical duration calls whenever opportunity arises.

Income Distribution cum Capital Withdrawal (IDCW) HISTORY (Regular Plan - IDCW Option)

Record Date	Distribution Rate Per Unit (₹) Individual/others	Cum--IDWC NAV (₹)
27-Mar-25	0.63	13.97

Last 3 IDCW declared for IDCW option.
Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of pay-out and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors' capital (Equalization Reserve), which is part of sale price that represents realized gains. Past performance may or may not be sustained in future and is not a guarantee of any future returns. The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of Rs 10 per unit. Face value may change depending upon Fair Value of the scheme.
