

BARODA BNP PARIBAS MULTI ASSET FUND

(AN OPEN ENDED SCHEME INVESTING IN EQUITY, DEBT AND GOLD ETF)

June 2025

Together for more

The word 'more' does not imply more returns or assurance of scheme performance. It refers to the additional value provided by the joint venture, as compared to Baroda AMC and BNP Paribas AMC individually.

Key Highlights

- **Multi asset funds are mutual fund schemes that invest in 3 or more asset classes.**
- **Baroda BNP Paribas Multi Asset Fund invests in Equity, Fixed Income, Gold and REITS/INVITS**
- **The scheme has allocated ~14.99% to Gold; ~70.3% to Equity and ~14.64% to Fixed Income & Others.**
- **Out of the total Equity allocation, 78% is in large cap stocks.**
- **Out of the total Fixed Income allocation, 93.6% is allocated to low-risk assets (A1+; AAA; Sov and cash & others).**

Data as on 30th June ,2025

Market Capitalization as per SEBI - Large Cap: 1st – 100th company, Mid Cap: 101st - 250th company and Small Cap: 251st company onwards in terms of full market capitalization.

Investing is like having a wholesome meal

- Individually each component of food i.e. proteins, carbohydrates, vitamins and minerals, have unique characteristics.
- When all the components of the food come together in the right proportion, they make a person healthy.
- Similarly, each Asset class has unique characteristics.
- But when combined together, it creates a portfolio that aims to capture the upside and protect the downside!

DIFFERENT ASSET CLASSES BEHAVE DIFFERENTLY

Multiple Asset Classes: Differing Returns Profiles

Composite Portfolio is a composite Index of 65% of Equity, 15% of Gold & 20% of Debt. Equity is represented by Nifty 500 TRI, Debt by Nifty Composite Debt Index and Gold by MCX day end spot prices.

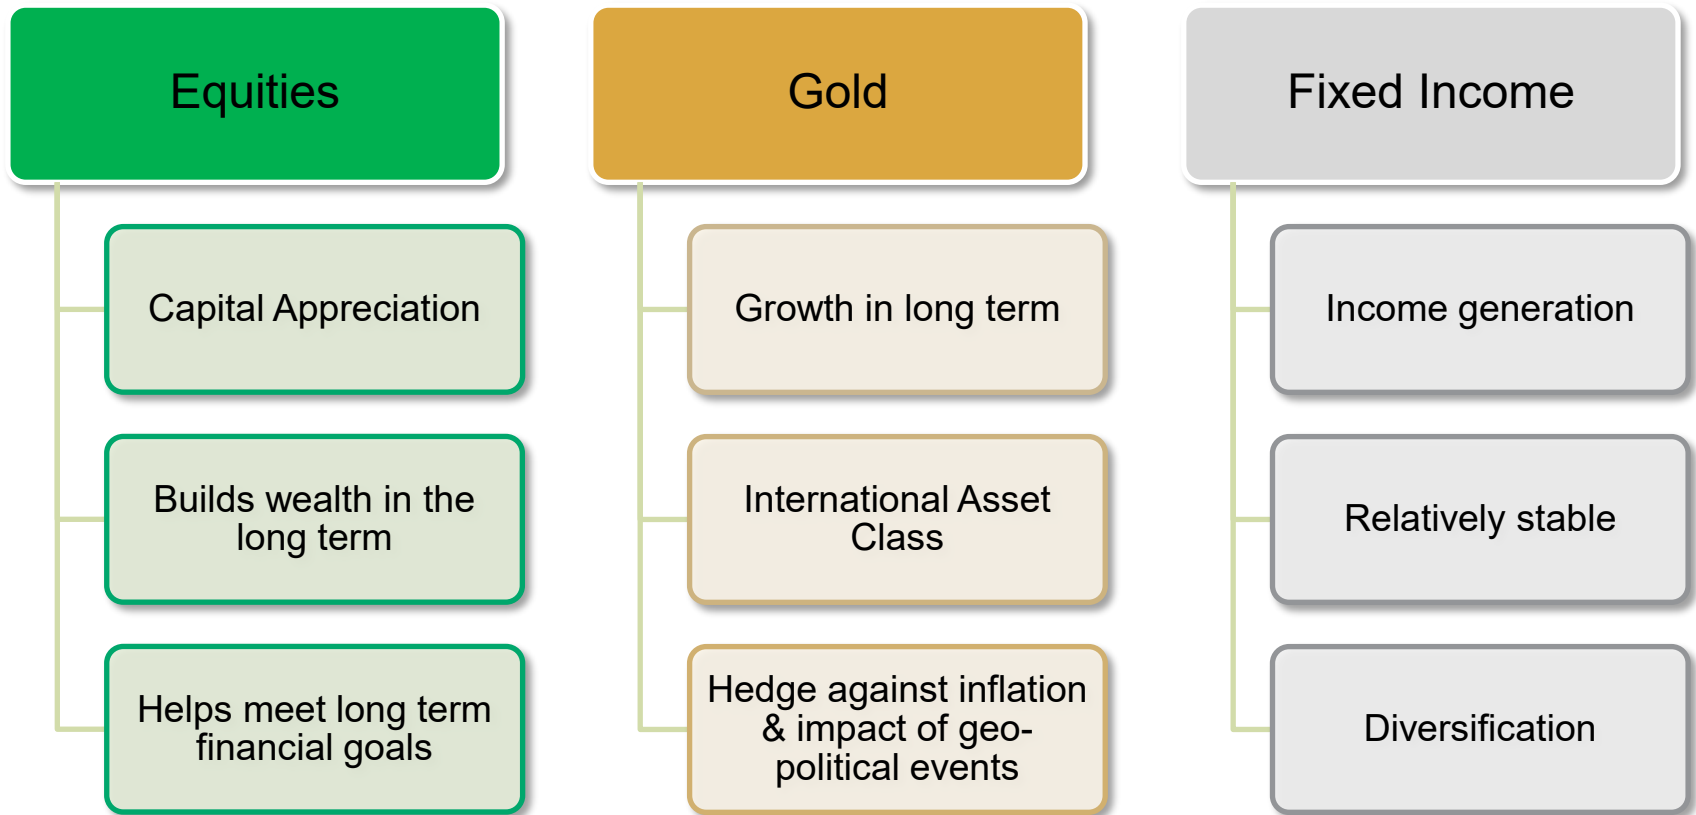

- Equity has delivered highest returns, but with high volatility!!

*CAGR – Compounded Annual Growth Rate.

Baroda BNP Paribas Mutual Fund does not guarantee returns on investments in the scheme. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.**

Different Asset Classes Play Different Roles

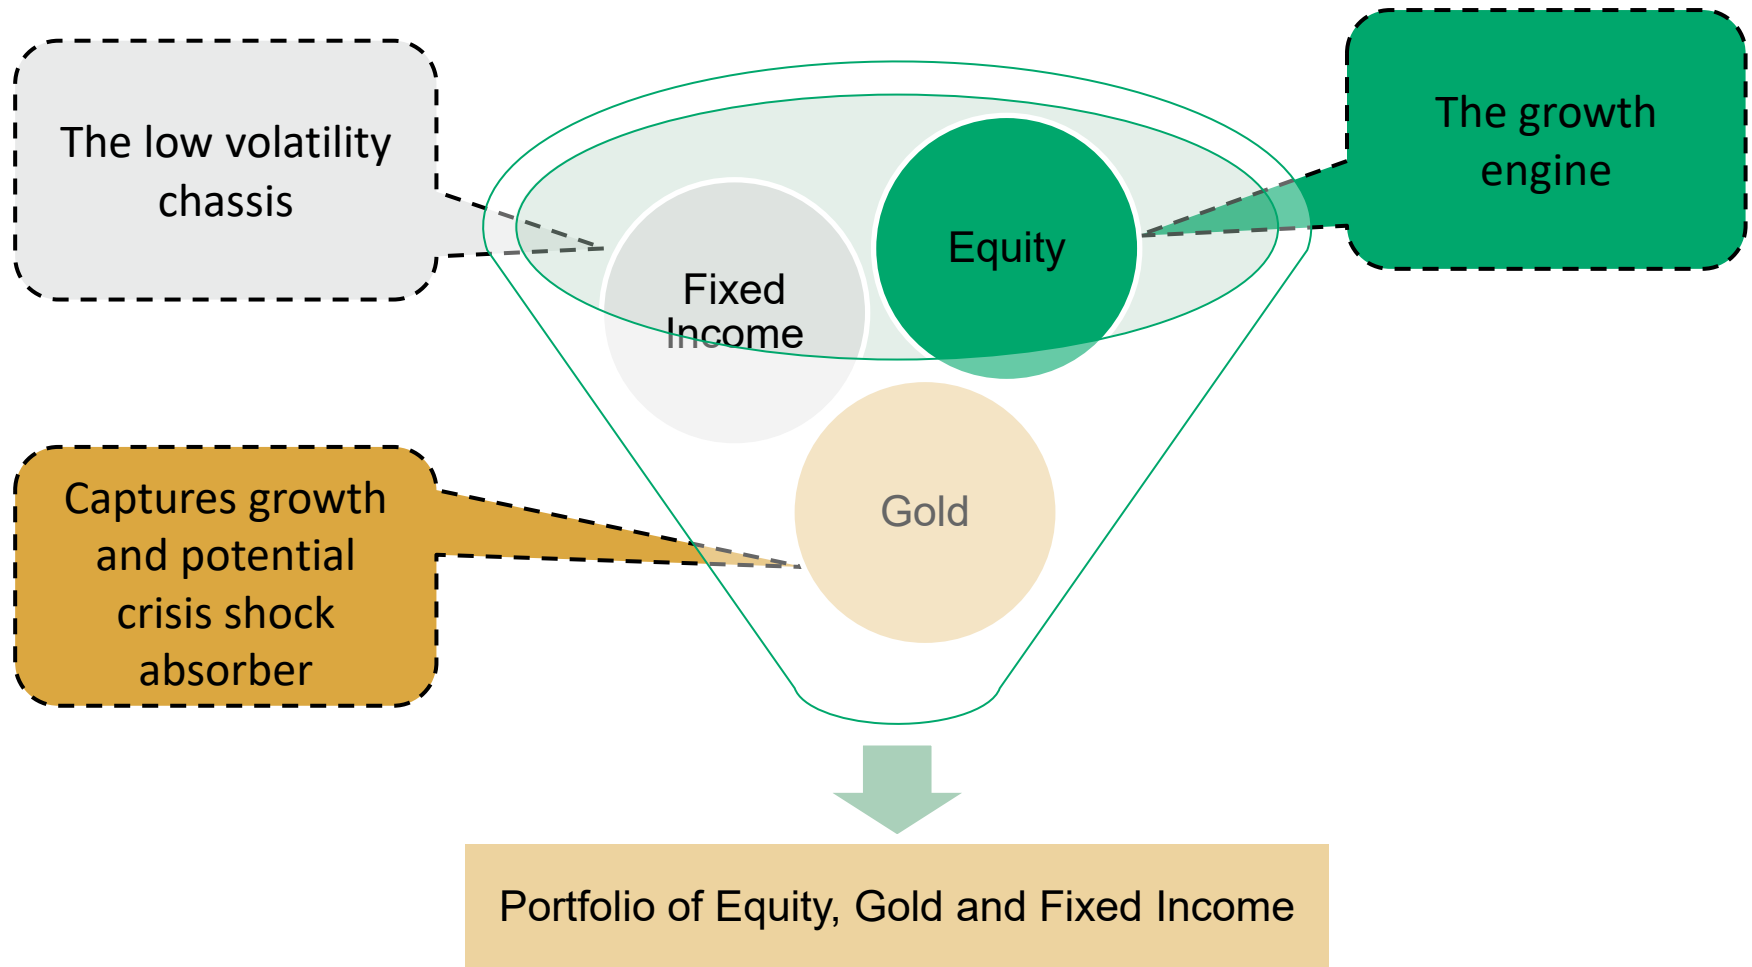

Because of the unique characteristics of each asset class, each of them is suited for a different and complementary role in the portfolio.

BUT...
WHEN THE POWER OF ALL THREE ASSET
CLASSES COMBINE...

...WE GET AN **ASSET ALLOCATION
STRATEGY** WITH **OPTIMAL RISK-
RETURN** TRADE OFF

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Investors should consult with their financial advisors before investment.

Power of each asset classes

Benefit of Low Correlation

“To reduce Risk, it is necessary to avoid a portfolio whose securities are all highly correlated with each other.” - Harry Markowitz

- Correlation measures the movement of asset classes against each other.
- The negative correlation between Gold & Equity and Gold & Fixed Income, denotes that when one asset class falls, the other rises.

Source: Internal research, NSE Indices for equity (Nifty 500 TRI) and debt index (Nifty Composite Debt Index) levels and world gold council for gold prices. Data from April 1, 2002, to June 30th, 2025. To calculate the correlation, we have considered the standard deviation of monthly returns. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.**

Benefits of the Fund

Convenience

- One fund gives access to multiple asset classes. Saves the hassle of investing, tracking and maintaining investments in multiple strategies / funds.

Diversification Benefits

- Helps you lower risk by spreading investment across different asset classes

Optimal Risk Adjusted Returns

- By investing in different asset classes with varying returns and risks, the fund aims to provide better returns for risk undertaken

Strategic gold allocation

- Historically, portfolio with higher gold allocation has given higher risk adjusted returns, compared to individual assets

Equity Taxation

- Aims to provide the benefits of equity taxation for investors

Past performance may or may not be sustained in future and is not a guarantee of any future returns.

Who is the fund suitable for?

Adding Gold: Improved performance, low volatility

3 Year Rolling Returns	Nifty 500 TRI	Prices of Gold	NIFTY Composite Debt Index	Equity 65%+ Fixed Income 35%	65% Equity + 15% Gold + 20% Fixed Income
Min	-9.5%	-10.0%	0.8%	-2.6%	-0.7%
Max	68.9%	36.7%	12.2%	43.2%	47.2%
Average	17.8%	13.2%	7.1%	14.3%	15.5%
Median	14.6%	14.3%	7.4%	12.9%	13.7%
Distribution of returns					
Negative Observations	5.8%	8.0%	0.0%	0.6%	0.0%
0-5%	10.3%	13.3%	16.7%	9.6%	6.5%
5-10%	12.9%	15.5%	76.3%	19.0%	18.3%
More than 10%	71.0%	63.2%	7.1%	70.9%	75.2%

Median returns of the strategy are in line with the equity returns with **negligible negative returns**

Historically, the probability of negative returns was low.

The no. of times the returns have been more than 10% is the highest compared to other asset classes

Source: Internal research, NSE Indices for equity (Nifty 500 TRI) and debt index (Nifty Composite Debt Index) levels and world gold council for gold prices. Data from April 2002, to June 30th, 2025. Returns are average of daily 3-year rolling calculated on daily basis since 30th April 2005 till 30th June, 2025. **Past performance may or may not be sustained in future and is not a guarantee of any future returns.** The above is provided for information and understanding purpose only and should not be construed as investment advice/recommendation.

Current Investment Themes- June 2025

Advantageous:

1. **Gold:** Gold has been on a tear over the past 1 year with the yellow metal being up ~32%. April was no exception with gold hitting yet another high in international markets. In local currency terms gold was up ~5.9% beating equity and fixed income returns. Because of this appreciation we are marginally above our usual band of 14-16% on gold exposures at 16.1% given the global uncertainty in terms of trade war and weaker global economic growth.
2. **Healthcare:** Play on weaker rupee. Advancements by Indian companies into new areas like GLP1, peptides etc. Tariff related disruptions could act as a short-term blip to the sector.
3. **Utilities:** Rising energy demand; transition to renewables.

Neutral:

1. **BFSI:** Tighter liquidity and recent volatility in markets has led us to prefer private banks over NBFC's and capital market plays. Post RBI actions on creating liquidity, we have turned slightly constructive in the medium term and added some weights to change our stance from underweight to neutral.
2. **Staples:** More liquidity in the term of taxpayers through budget tax breaks, expectation of normal monsoon and thereby rural recovery to aid growth in the sector.

Disadvantageous:

1. **Metals & Energy:** Tightening global monetary policy, cuts to global growth/(IMF has recently toned-down global growth guidance by 0.5% to 2.8% in 2025) are disadvantageous to global commodities. Given the softer crude environment, we added marginally weights to the energy space.
2. **IT:** Weakness in the DXY (dollar index) and headwinds of weaker than expected global growth amid the tariff uncertainties etc. Second order weakness could hurt tech spends.
3. **Consumer Discretionary:** Sign of certain slowdown in discretionary consumption which is making us near team cautious. We continue to observe a) recent tax breaks b) monsoon being normal as a boost to farm income c) pick up in the festive season in 2H to potentially change our stance on this space.

The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website (www.barodabnpparibasmf.in). **Investment strategy shall be in accordance with the investment objective and strategy stated in the SID of the scheme.**

Current Portfolio Positioning (as on 30th June, 2025)

Equity:

- Gold continued to marginally move up by 65bps over the course of June notching up year-to-date gains of ~26% in 1HCY25 for the yellow metal much higher than equity and fixed income returns. Given this strong rally in gold, we booked some profits to bring our gold exposures to the mid point of our usual band of 14-16% at 15%. This is ~40bps below levels of May.
- We maintained our dominant exposure to large caps within our equity book (~78%). This is marginally lower than the prior month levels of 80%. Our total equity exposure is currently placed at 70.3% ~50bps lower than the prior month mainly on account of some profit booking. REIT's and INVIT's were static at 1.3% while fixed income contributed to the balance.
- Over the course of the month, we added to weights on financials. We also had a marginal increase on IT. Communication sector weight rose mainly on account of stock performance. These were largely funded by trimming some weights on materials and consumer staples.

Investment strategy- shall be in accordance with the investment objective and strategy stated in the SID of the scheme. The sector(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s). Further, the portfolio of the Scheme is subject to changes within the provisions and limitations of Scheme Information Document (SID). For further details on asset allocation, investment strategy and risk factors of the Scheme please refer to SID available on our website (www.barodabnpparibasmf.in).

Current Portfolio Positioning (as on June 30, 2025)

- **Debt:**
- Gold prices have remained elevated at 3,400\$ during the month due to Iran-Israel-USA war, it corrected to 3,300\$ when the cease fire was announced.
- Optimism around potential Fed rate cuts, coupled with a weaker dollar and declining crude prices, is expected to drive a rally in gold.
- Trade and geopolitical tensions have kept the global markets volatile.
- We have allocated a small amount in AAA REITS and INVITS with an intention to generate alpha over debt returns from a medium-term perspective.
- The scheme invested in medium-term corporate bonds and G-sec of various tenors.
- We intend to keep the duration of the fund in the range of 3.50 years – 4.50 years
- The scheme remains open to taking tactical duration calls.
