*Monthly AAUM and AUM - Excluding inter-scheme Investments, if any, by other schemes of Baroda BNP Paribas Mutual Fund, as may be applicable.

ABOUT THE FUND

- Baroda BNP Paribas Overnight Fund is an open ended debt scheme investing in overnight securities having a maturity of one business day.
- It is considered a low-risk and low-volatility strategy:
 - It invests predominantly in TREPS (tri-party repo) and other debt securities with a maturity of one business day.
 - Risk of mark-to-market movement which exist in other fixed income securities is minimal in TREPS.
 - Also the underlying investment may not be affected by changes in interest rates or changes in credit quality of the issuer since the investment is only for one business day.
- The scheme is positioned at the lowest end of the risk-return scale
- The scheme is suitable for corporate and individual investors looking to park their surplus funds for a period of one day and extremely short period of time. Also it is suitable for investors seeking high liquidity with relatively low risk.

PORTFOLIO POSITIONING

- Overnight funds mainly invest in market repo and other instruments maturing on the next business day; hence they have relatively lower interest rate risk. Returns are expected to be in line with prevailing overnight rates.

PORTFOLIO (% of Net Assets)

Fixed Income Holdings	Type	Rating	% of Net Assets
91 Days Tbill (MD 19/06/2025)	Money Market Instruments	SOVEREIGN	1.46%
182 Days Tbill (MD 12/06/2025)	Money Market Instruments	SOVEREIGN	0.73%

- ▶ Generate returns, commensurate with low risk and high level of liquidity.
- ▶ Invest in overnight securities having maturity of one business day.

Scheme Riskometer^^

Benchmark (Tier 1) Riskometer^

Investors understand that their principal will be at Low risk.

Benchmark riskometer is at Low risk.

^^Riskometer For Scheme: basis it's portfolio, ^Riskometer For Benchmark (CRISIL Liquid Overnight Index): basis it's constituents; as on May 30, 2025

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Potential Risk Class (PRC) matrix*			
Credit Risk (Max)-	Relatively Low: Class A (CRV>=12)	Moderate: Class B (CRV>=10)	Relatively High: Class C (CRV<10)
Interest Rate Risk (Max):			
Relatively Low: Class I (MD<=1 year)	A-I		
Moderate: Class II (MD<=3 year)			
Relatively High: Class III (Any MD)			

MD=Macaulay Duration, CRV=Credit Risk Value.

The above PRC matrix denotes the maximum risk that the Scheme can take i.e. maximum interest rate risk (measured by MD of the scheme) and maximum credit risk (measured by CRV of the scheme).

DISCLAIMERS

† Concept of Macaulay duration - The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

#Sectoral Composition, Top 10 Holdings - The sector(s)/stock(s) mentioned in this document do not constitute any recommendation of the same and Baroda BNP Paribas Mutual Fund may or may not have any future position in these sector(s)/stock(s).
