ABOUT THE FUND

- Baroda BNP Paribas Overnight Fund is an open ended debt scheme investing in overnight securities having a maturity of one business day.
- It is considered a low-risk and low-volatility strategy:
 - It invests predominantly in TREPS (tri-party repo) and other debt securities with a maturity of one business day.
 - Risk of mark-to-market movement which exist in other fixed income securities is minimal in TREPS.
 - Also the underlying investment may not be affected by changes in interest rates or changes in credit quality of the issuer since the investment is only for one business day.
- The scheme is positioned at the lowest end of the risk-return scale
- The scheme is suitable for corporate and individual investors looking to park their surplus funds for a period of one day and extremely short period of time. Also it is suitable for investors seeking high liquidity with relatively low risk.

PORTFOLIO POSITIONING

- Overnight funds mainly invest in market repo and other instruments maturing on the next business day; hence they have relatively lower interest rate risk. Returns are expected to be in line with prevailing overnight rates.
