ABOUT THE FUND

- Baroda BNP Paribas Short Duration Fund invests in fixed income instruments such that the Macaulay Duration of the portfolio is between 1 to 3 years.
- The Scheme aims to invest in a mix of high quality instruments at the shorter end of the yield curve. These may be commercial paper (CP), certificate of deposit (CDs), government securities, securities issued by private or public sectors companies, etc. The portfolio also aims to offer high liquidity along with moderate duration risk.
- The Scheme remains open to taking tactical duration calls.
- While investing in fixed income instruments, the scheme takes into account various factors affecting the Indian economy, interest rate scenario, and the relative valuation, maturity profile and liquidity of the securities, etc.
- The Scheme is suitable for short term investment horizon.

PORTFOLIO POSITIONING

- Banking and durable liquidity are currently comfortable, and financial conditions have significantly improved in the past four months.
- RBI liquidity management is focused on faster and more effective transmission of rate cuts.
- Going forward, we expect liquidity to remain in surplus over the next few months, with the flow of funds to the banking system to increase led by RBI dividend transfer (2.6trillion).
- The weighted average overnight Rates remained at 5.60%-5.75% during the month.
- With the RBI Transfusing liquidity aggressively, we expect an additional 25bps more rates cut in June-25 policy, for smooth monetary transmission.
- The Yield on Shorter end corporate bonds have eased by 75-80bps since March 2025.
- We remain invested ~80%-85% in AAA rated and Sovereign instruments and balance in AA/AA+ rated good quality assets as it offers attractive spread over Government bonds.
- We remain invested in corporate bonds ranging from short to medium term maturities (2 to 5yr) across ratings.
- We intend to keep the duration at the higher levels, near to 2.50-3.00 years and the scheme remains open to taking tactical duration calls.
- In order to achieve the same, we have increased the allocation in PTCs rated AAA (SO) as well as PSU bonds to enhance the YTM and benefit from portfolio diversification

Product Labelling

[^]Concept of Macaulay duration:

The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration.

Potential Risk Class (PRC) matrix*			
Credit Risk (Max)– Interest Rate Risk (Max)	Relatively Low: Class A (CRV>=12)	Moderate: Class B (CRV>=10)	Relatively High: Class C (CRV<10)
Relatively Low: Class I (MD<=1year)			
Moderate: Class II (MD<=3year)			
Relatively High: Class III (Any MD)		B-III	

MD=Macaulay Duration, CRV=Credit Risk Value.

The above PRC matrix denotes the maximum risk that the Scheme can take i.e. maximum interest rate risk (measured by MD of the scheme) and maximum credit risk (measured by CRV of the scheme)

DISCLAIMERS

[†]**Concept of Macaulay duration:** The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.
