ABOUT THE FUND

- Baroda BNP Paribas Small Cap fund will invest minimum 65% of the net assets into small cap companies.
- The fund aims to build wealth of investors by tapping into companies which have the potential to become leading companies of the future.
- The fund will follow bottom-up stock picking approach.
- Emphasis will be on selecting companies with strong fundamentals, quality business models and reputation management.
- The fund will not be biased towards any sector.

PORTFOLIO POSITIONING

- Industrials, Consumer Staples, Consumer Discretionary and Utilities are key overweight sectors. Within utilities, we have significant exposure to gas utilities where we find valuations attractive. Within Industrials, we have exposure to companies with strong technological advantage over peers.
- We are underweight in Financials, IT Services and Healthcare. Our underweight in financials emanates from reducing exposure to capital market plays which could witness high volatility due to near term uncertainty. Our Underweight on IT Services is on account of uncertain global environment and tepid global growth outlook.
- The allocation to small cap companies is at 79%. Allocation to Large & Mid cap companies is 17%. Our cash position is 4%. (Exposure as % of net assets as on August 31, 2025).
- We follow the bottom up approach in small cap investing which is about identifying the champions of tomorrow.
