Portfolio Rebalancing:

Portfolio rebalancing in case of deviation from asset allocation under defensive consideration:

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation or a short term period on defensive considerations as per Para 1.14.1.2 (b) of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. Such rebalancing shall be done within 30 days from the date of occurrence of deviation. However, at all times the AMC shall ensure that the portfolio would adhere to the overall investment objective of the Scheme.

Portfolio Rebalancing in case of passive deviation from asset allocation:

In accordance with para 2.9 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, as amended from time to time, the Scheme shall rebalance the portfolio in case of any deviation to the asset allocation mentioned in the SID due to passive breaches. In the event of deviation from mandated asset allocation mentioned in the SID due to passive breaches (occurrence of instances not arising out of omission and commission of AMCs), the portfolio shall be rebalanced within a period of thirty (30) business days.

In case the portfolio of Scheme is not rebalanced within the above mandated timelines, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period.

In case the portfolio of Scheme is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting the Scheme.

B. WHERE WILL THE SCHEME INVEST?

- permitted by SEBI / RBI.
- 8) Any other domestic fixed income instrument as may be permitted by SEBI / RBI from time to time.
 - 9) Units issued by REITs / InvITs.
 - 10) Units of mutual fund schemes.
 - 11) Foreign Securities as permitted by RBI / SEBI.
 - 12) Credit Default Swaps
 - 13) Repo and reverse repo in corporate debt securities
 - 14) Any other domestic fixed income securities as permitted by SEBI / RBI from time to time, subject to SEBI approval, if any.

The securities/debt instruments mentioned above could be listed or unlisted, secured or unsecured and rated or unrated, in accordance with the guidelines issued by SEBI from time to time. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offers or negotiated deals.

The above list is illustrative and not the exhaustive and may include other fixed income / debt securities as may be available / introduced in the market.

Investment in Foreign Securities

The Scheme may invest in Foreign Securities issued by overseas companies, for the purpose of diversification subject to compliance with the prescribed conditions by SEBI / RBI in this regard. The Mutual Fund may appoint overseas investment advisors and other service providers, to the extent permissible under the Regulations.

Investment in CDMDF

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM. For details, refer Section II.

Investment in other schemes

The Scheme may, in line with its investment objectives, invest in another scheme under the management of AMC or of any other asset management company. The aggregate inter-scheme investment by the Mutual Fund under all its schemes, and schemes of other mutual funds, other than fund of fund schemes, shall not be more than 5% of the net assets of the Mutual Fund. No fee shall be charged by the AMC on investment in any scheme under the management of AMC or of any other asset management company.

Investments of the AMC in the Scheme

The AMC may invest in the Scheme in accordance with Regulation 28(5) of the Regulations. No investment management fees would be charged on such investment in the Scheme.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Scheme is an actively managed open-ended debt scheme that seeks to provide returns by investing in a portfolio consisting of money market and debt instruments, government securities and treasury bills. The fund management team would formulate a view on the credit quality, interest rate movement etc., by monitoring parameters linked to corporate performance, economy as well as developments in the global markets. The Scheme may assume moderately higher credit risk as compared to a scheme investing predominantly in AAA bonds / sovereign securities. The portfolio will be constructed in line with the benchmark, and it would be endeavored to actively manage the portfolio so that it is similar to various attributes of benchmark like average maturity, duration etc. Selective capital appreciation opportunities could be explored by extending credit and duration exposure above the benchmark. The key element of investment strategy is having the ability to analyze and price credit risk for short, dated securities.

Event based Strategy: Sometimes it is seen that a company with lower credit rating (as assigned by any SEBI approved rating agency) has strong fundamental valuation which indicates that the company would have got better rating. Hence, in anticipation that credit rating of this company would be upgraded by the rating agencies, the fund manager, may at his discretion, invest / increase exposure in such types of companies. Once the upgradation in rating happens, the yield would fall and thus a capital gain / profit would be incurred. In a situation where a company with lower rating / unrated is being acquired by a company with higher credit rating, it is seen

SCHEME INFORMATION DOCUMENT

that the yield of former one usually falls. The fund manager may, after identifying such opportunities, and at his / her discretion make investments / increase allocation in those lower rated / unrated companies.

Credit Spread Strategy: Credit spread, or the yield differential of two companies with different credit rating, is mean-reverting in nature. This means that yield differential can be more or less in various time periods. The fund manager may, at his / her discretion, increase / decrease allocation to companies with different credit ratings to exploit this mean-reversion. E.g. assume a company with AA rating is being traded at 10.35% yield. At the same time, a company with AAA rating is traded at 9.35% yield. Both the instruments have same maturity. After examining the yield differentials of these two companies, it is understood that mean spread (i.e. yield differential) is 50 bps. Since the current spread is 100 bps then it is expected that by nature of mean-reversion the spread will fall to nearly 50 bps. This implies, under normal economic conditions and other factors being unchanged, that the yield of AA rated company would fall.

The Scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI/RBI for the purpose of hedging and portfolio rebalancing.

Risk control measures

Investments made by the Scheme would be in accordance with the investment objective of the Scheme and the provisions of the SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. While allocating and choosing securities, the Investment Manager will aim to diversify by gaining broad exposure to different industries and companies in order to reduce risk.

Portfolio turnover

Portfolio turnover is defined as lesser of purchases and sales as a percentage of the average corpus of the Scheme during a specified period of time. Portfolio turnover would depend upon the market conditions such as volatility of the market and inflows/outflows in the scheme. The Scheme being open-ended is expected to have a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio(s). Active asset allocation would impact portfolio turnover. Nonetheless, the AMC will take advantage of opportunities that present themselves from time to time in the securities market.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The performance of the Scheme will be benchmarked to the performance of **CRISIL Credit Risk Debt B -III Index**.

Pursuant to Para 1.9 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 ('SEBI Circular on Benchmark'), uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

The aforesaid Benchmark is accordingly the Tier 1 benchmark Index basis the category of the scheme and in line with the list of benchmark as notified by AMFI.

Performance comparisons for the Scheme will be made vis-à-vis the aforesaid Benchmark. However, the Scheme's performance may not be strictly comparable with the performance of the Benchmark due to the inherent differences in the construction of the portfolios. The Trustee / AMC reserve the right to change the Benchmark for evaluation of performance of the Scheme from time to time in conformity with the investment objectives and appropriateness of the Benchmark subject to the SEBI Regulations, and other prevailing guidelines, if any.

Impact of segregation :

Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme’s portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had filed a writ petition in the Hon’ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on’ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

***Kindly note that with effect from September 11, 2024, Baroda BNP Paribas Medium Duration Fund ('Merging Scheme') has merged into Baroda BNP Paribas Credit Risk Fund ('Surviving Scheme').

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit of the options of the Plan(s) under the Scheme will be computed by dividing the net assets of the options of the Plan(s) under the Scheme by the number of Units outstanding under the options of the Plan(s) under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

The NAV of the units under each options of the Plan(s) under the Scheme shall be calculated as shown below:

$$\text{NAV per Unit (Rs.)} = \frac{\text{Market or Fair Value of the Plan's Investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under each option of the Plan(s) under the Scheme}}$$

The NAV of the units under each options of the Plan(s) under the Scheme will be calculated and declared on each Business Day. Separate NAVs will be calculated and announced for each of the Plan(s) & option(s) under the scheme. The NAVs will be rounded off up to 4 decimal places for the Scheme. The units will be allotted up to 4 decimal places.

SCHEME INFORMATION DOCUMENT

Valuation of the scheme’s assets, calculation of the scheme’s NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Pursuant to regulation 49(3), the repurchase price shall not be lower than 95 per cent of the NAV. Any imposition or enhancement of Load in future shall be applicable on prospective investments only.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

B. NEW FUND OFFER (NFO) EXPENSES

This section does not apply to the Scheme, as the ongoing offer of the Scheme has commenced after the NFO, and the Units are available for continuous subscription and redemption.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses incurred for operating the Scheme. These expenses include but are not limited to Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents’ fee including costs related to providing accounts statement, dividend/redemption cheques/warrants etc., marketing and selling costs marketing & selling expenses including agents commission and statutory advertisement, brokerage & transaction cost pertaining to the distribution of units, audit fees, fees and expenses of trustees, costs related to investor communications, costs of fund transfer from location to location etc., listing fee, custodial fees etc.

The maximum recurring expenses including the investment management and advisory fee that can be charged to the Scheme shall be subject to a percentage limit of average daily net assets as given in the table below. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

The AMC has estimated the annual recurring expenses under the Scheme as per the table below:

- i. 2.00% on the first Rs.500 crores of daily net assets.
- ii. 1.75% on the next Rs. 250 crores of daily net assets.
- iii. 1.50% on the next Rs. 1,250 crores of daily net assets.
- iv. 1.35% on the next Rs. 3,000 crores of daily net assets.
- v. 1.25% on the next Rs. 5,000 crores of daily net assets.
- vi. Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof on the next Rs.40,000 crores of the daily net assets.
- vii. 0.80% on the balance of the daily net assets.

The AMC will also annually set apart, for investor education and awareness initiatives, at least 0.02% on the daily net assets of each Scheme, which shall be within the maximum limit of TER as mentioned in the table above.

Further, the following costs or expenses shall be charged to the Scheme (in addition to the limits specified as per Regulation 52(6)(c) of SEBI Regulations):

- a) Brokerage and transaction costs which are incurred for the purpose of execution of trade shall be charged to the Scheme, not exceeding 0.12% in case of cash market transactions and 0.05% in case of derivative transactions;

Any payment towards brokerage and transaction costs, over and above the said 12bps and 5bps for cash market and derivatives transactions respectively, shall be charged to the Scheme within the total recurring expenses limit specified under Regulation 52 of SEBI Mutual Fund Regulations, 1996. Any expenditure in excess of the said limit will be borne by the AMC/Trustees/Sponsors.

- b) expenses not exceeding of 0.30% of daily net assets, if the new inflows from such cities as specified by SEBI from time to time are at least (i) 30% of gross new inflows in the scheme, or (ii) 15% of the average assets under management (year to date) of the scheme, whichever is higher. Provided that if inflows from such cities are less than the higher of (i) or (ii) above, such expenses on the daily net assets of the Scheme shall be charged on a proportionate basis. Provided further that the expenses charged under this provision shall be utilised for distribution expenses incurred for bringing inflows from such cities. Provided further that the amount incurred as expense on account of inflows from such cities shall be credited back to the scheme in case the said inflows are redeemed within a period of one year from the date of investment. Additional TER will be charged based on inflows only from retail investors (other than corporates and institutions) from B-30 cities. As per para 10.1.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, inflows of amount upto Rs. 2,00,000/- per transaction, by individual investors from B-30 cities, shall be considered as inflows from retail investors.
- c) additional expenses, incurred towards different heads, not exceeding 0.05% of the daily net assets of the Scheme. However, such expenses will not be charged if exit load is not levied / not applicable to the Scheme.

Investors may note that GST on investment and advisory fees may be charged to the Scheme in addition to the maximum limit of TER as mentioned in the table above. GST on expenses other than investment and advisory fees, if any, shall be borne by the Scheme within the maximum limit of TER as mentioned in the table above. GST on

brokerage and transaction costs paid for execution of trade, if any, shall be within the limit prescribed under Regulation 52 of the SEBI Regulations.

Note:

Pursuant to AMFI email dated March 02, 2023, with respect to keeping the B-30 incentive structure in abeyance, the AMC will not charge additional 30 bps on new inflows garnered from retail investors from B-30 cities till further notice. The total expenses of the Scheme including the Investment Management and Advisory Fee shall not exceed the limits stated in Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

For the actual current expenses being charged, the investor should refer to the website of the mutual fund at the following link <<https://www.barodabnpparibasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes>>. Any change proposed to the current expense ratio will be updated on the website and communicated to the investors via e-mail or SMS at least three working days prior to the effective date of the change (in accordance with para 10.1.8 of SEBI Master circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024). Further, the disclosure of the expense ratio on a daily basis shall also be made on the website of AMFI viz. www.amfiindia.com.

These estimates have been made in good faith as per the information available to the Investment Manager based on past experience and are subject to change inter-se. Types of expenses charged shall be as per SEBI (Mutual Funds) Regulations, 1996. The purpose of the above table is to assist the investor in understanding the various costs and expenses that an investor in the scheme will bear directly or indirectly.

Actual expenses for the financial year 2023-24:

Total recurring expense as a % to daily net assets :

- Regular Plan - 1.60%
- Direct Plan - 0.79%

An Illustration of impact of expense ratio on Scheme’s returns:

If an investor A invests in a regular plan of a Scheme with an expense of 2% p.a. and an investor B invests in Direct Plan of the same scheme with an expense of 1% p.a. Assuming the gross return of this fund is 10% for that given year, investor A will make a return of 8% (post expense) for that year, whereas investor B will make 9% return for same period.

Also, please take a look at below illustration which shows impact of different expense ratio assumed on initial investment of Rs. 10,000 invested over period of 10 years with an average annualized gain of 10% p.a.

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year	10,000	10,000
Returns before Expenses (@15%pa)	1,500	1,500
Expenses other than Distribution Expenses	150	150
Distribution Expenses	50	-
Returns after Expenses at the end of the Year	1,300	1350
% Returns on Investment (Post Expenses)	13%	13.5%

Note:

- The purpose of the above illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments, without considering any impact due to taxation.
- Investors are requested to note that NAV declaration made by AMC/Mutual Fund on every business day is net of expenses, and consequently scheme performance disclosures made by Mutual Fund, which are based on NAV values of the scheme are also net of expenses but does not consider impact of load and taxes, if any.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure please refer to the website of the AMC (www.barodabnpparibasmf.in) or call on the number, 1800-2670-189 or may call your distributor.

TYPE OF LOAD	LOAD CHARGEABLE (% of NAV)
Exit Load	1. If units are redeemed upto 10% of the units, on or before one year from the date of allotment: Nil 2. If units are redeemed over and above the 10% limit, on or before one year from the date of allotment: 1% of the applicable Net Asset Value (NAV) 3. If units are redeemed after one year from the date of allotment: Nil Exit load is not applicable for segregated portfolio.

In accordance with the requirements specified in para 10.4 of SEBI Master Circular no entry load will be charged for purchase/additional purchase/ switch-in. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder directly by the investor, based on the investor’s assessment of various factors including service rendered by the ARN Holder. The exit load charged, if any, net of Goods and Services Tax (GST), shall be credited to the Scheme. No load will be charged on units issued upon re-investment of amount of distribution under same IDCW option and bonus units.

For any change in load structure, the AMC will issue an addendum and display it on the website/ISCs.

I. Introduction

A. Definitions/interpretation

Investors may refer <https://www.barodabnpparibasmf.in/assets/pdf/Definitions.pdf> for definitions/interpretations.

B. RISK FACTORS

i. Scheme specific risk Factors

The Scheme specific risk factors are summarized as follows:

- **Market Risk:**

All mutual funds and securities investments are subject to market risk and there can be no assurance / guarantee that the scheme's objectives will be achieved. The securities that the scheme invests in would be exposed to price changes on a day-to-day basis. These price changes may occur due to instrument-specific factors as well as general macroeconomic conditions.

Markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. The scheme may be subject to price volatility due to factors such as interest sensitivity, market perception, and creditworthiness of issuer and market liquidity.

Different parts of the market can react differently to these developments. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

- **Concentration Risk**

The scheme may pursue only a limited degree of diversification. It may invest a greater proportion of assets in the securities of very few issuers (within the limits permitted by regulation) or be concentrated on a few market sectors. This could have implications on the performance of the scheme. The scheme may be more sensitive to economic, business, political or other changes and this may lead to sizeable fluctuation in the Net Asset Value of the scheme.

Risks associated with investing in fixed income securities:

1. **Credit and Counterparty risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security or honor its contractual obligations).

Counterparty risk refers to the counterparty's inability to honor its commitments (payment, delivery, repayment, etc.) and to risk of default. This risk relates to the quality of the counterparty to which the scheme has exposures. Losses can occur in particular for the settlement/delivery of financial instruments or the conclusion of financial derivatives contracts.

The value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit and counterparty risk as well as any actual event of default. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security value.

2. **Liquidity Risk:** The liquidity of the scheme's investment is inherently restricted by trading volumes in the securities in which the scheme invests.
A lower level of liquidity affecting an individual security or an entire market at the same time, may have an adverse bearing on the value of the scheme's assets. More importantly, this may affect the Fund's ability to sell particular securities quickly enough to minimise impact cost, as and when necessary to meet requirements of liquidity or to sell securities in response to triggers such as a specific economic/corporate event.
Trading volumes, settlement periods and transfer procedures may restrict the liquidity of a few or all of the investments and may affect the liquidity of the investments of the scheme.

SCHEME INFORMATION DOCUMENT

The scheme may be unable to implement purchase or sale decisions when the markets turn illiquid, missing some investment opportunities or limiting ability to face redemptions. The lack of liquidity could also lead to the risk that the sale price of a security could be substantially lower than the fair value of the security.

- Interest Rate Risk & Re-investment Risk:** The value of an investment may be affected by interest rate fluctuations. Interest rates may be influenced by several elements or events, such as monetary policy, the discount rate, inflation, etc. The value of debt and fixed income securities held by the Scheme generally will vary inversely with the changes in prevailing interest rates. In general, price of debt and fixed income securities go up when interest rates fall, and vice versa. Securities of any issuer that has higher duration could be more risky in terms of price movements relative to those with lower duration. Thus any impact of interest rate changes would be higher on securities with higher duration irrespective of the status of the issuer of the security. The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- Sovereign risk:** The Central Government of India is the issuer of the local currency debt in India. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying least probability of a default, such securities are known as securities with sovereign credit. It also implies that the credit risk on such Government securities is even lower than that on non-government securities with "AAA" rating and hence yields on government securities are even lower than yields on non-government securities with "AAA" rating.

Risk Factors associated with Investments in Derivatives

The Scheme(s) may use various derivative instruments and techniques, permitted within SEBI (Mutual Funds) Regulations, 1996 from time to time including but not limited for portfolio balancing and hedging purpose, which may increase the volatility of Scheme's performance. Usage of derivatives will expose the Scheme(s) to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is a possibility that a loss may be sustained by the Scheme(s) as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, interest rates and indices. Even a small price movement in the underlying instrument could have a large impact on their value. This could increase the volatility of the Scheme's performance.

In case of hedge, it is possible that derivative positions may not be perfectly in line with the underlying assets they are hedging. As a consequence the derivative cannot be expected to perfectly hedge the risk of the underlying assets. This also increases the volatility of the Scheme's performance. Some of the risks inherent to derivatives investments include:

- Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
- Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
- Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
- Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.

SCHEME INFORMATION DOCUMENT

5. **Liquidity risk:** This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

Risk factors associated with investments in Credit Default Swaps:

Credit default swap is the most common form of credit derivative where the buyer of the swap makes payments to the swap's seller until the maturity date of a contract. In return, the seller agrees that – in the event that the debt issuer defaults or experiences another credit event – the seller will pay the buyer the security's value as well as all interest payments that would have been paid between that time and the security's maturity date. The Scheme may participate in credit Default Swaps (CDS) as a buyer (protection buyer) to hedge/offset credit risk related to fixed income instruments. It is important to note that the credit risk isn't completely eliminated – it has been shifted to the CDS seller. The risk is that the CDS seller defaults at the same time the credit event occurs. In case the debt issuer does not default or no credit event occurs till maturity of CDS contract, the buyer will end up losing money through the payments on the CDS.

Risk factors specific to investments in foreign securities:

The Scheme may invest in Foreign Securities including overseas debt / equities / ADRs / GDRs with the approval of RBI/SEBI, subject to such guidelines as may be issued by RBI/SEBI. The net assets, distributions and income of the Scheme may be affected adversely by fluctuations in the value of certain foreign currencies relative to the Indian Rupee to the extent of investments in these securities. Repatriation of such investment may also be affected by changes in the regulatory and political environments. Market risks can be greater with respect to political instability, lack of complete or reliable information, market irregularities or high taxation. The Scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally, or the change in the credit profiles of the issuers. The liquidation of securities where investments will be made by the schemes shall be subject to the liquidity / settlement issues of the country of investment / settlement. Non-business days in country of investment / settlement may impact the liquidity of the scheme investments

The Scheme may, where necessary, appoint advisor(s) for providing advisory services for such investments. The appointment of such advisor(s) shall be in accordance with the applicable requirements of SEBI. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, transaction costs and overseas regulatory costs, the fees of appointed advisor(s). The fees related to these services would be borne by the AMC and would not be charged to the Scheme.

Risks associated with Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in a possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Mutual Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

Risk factors associated with investments in repo transactions in corporate debt:

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold, and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risk Factors associated with investing in debt instrument securities with special features:

Pursuant to para 12.2.1 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the schemes may invest in securities having special features viz. subordination to equity (absorbs losses before equity capital) and /or convertible to equity upon trigger of a pre-specified event for loss absorption. Such special features may be available under the Additional Tier 1 bonds and Tier 2 bonds issued under Basel III framework.

SCHEME INFORMATION DOCUMENT

These securities having special features will carry and be subject to all the risks associated with the investment in Fixed Income securities like Credit and Counterparty Risk, Liquidity Risk, Interest Rate Risk etc. However investors are requested to note that as these securities are subordinate to all other Fixed Income securities issued by an issuer and only senior to common equity, such securities with special features are more riskier than other Fixed Income Securities of the same issuer.

Credit Risk : Where the payout of interest or principal amount is due to be paid by an issuer for senior debt securities and for securities with such special features, such payout for the securities with special features would normally happen only after paying off all the senior debt dues. This increases the risk that the Issuer of the securities with special features may default on interest and /or principal payment obligations and/or default upon violation of covenant(s) and/or delay in scheduled payment(s)

Liquidity Risk : The securities with special features can normally be considered to have limited secondary market liquidity as compared to any senior debt of the issuer, and thus fund manager may be forced to hold such securities with special features till its maturity. Further, where the special features results in trigger and conversion to equity securities, such equity security received by the scheme(s) upon conversion will carry and be subject to all the risks associated with the investment in equity securities.

Risk factors associated with investments in REITs and InvITs

- ♦ **Price Risk / Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. The valuation of the REIT/InvIT units may fluctuate based on economic conditions, fluctuations in markets (eg. real estate) in which the REIT/InvIT operates and the resulting impact on the value of the portfolio of assets, regulatory changes, force majeure events etc. REITs & InvITs may have volatile cash flows. As an indirect shareholder of portfolio assets, unit holders rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the portfolio assets
- ♦ **Liquidity Risk:** As the liquidity of the investments made by the scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. Further, there is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities for which a liquid market exists
- ♦ **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/InvIT receives as dividends or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things:
 - success and economic viability of tenants and off-takers
 - economic cycles and risks inherent in the business which may negatively impact valuations, returns and profitability of portfolio assets
 - force majeure events related such as earthquakes, floods etc. rendering the portfolio assets inoperable
 - debt service requirements and other liabilities of the portfolio assets
 - fluctuations in the working capital needs of the portfolio assets
 - ability of portfolio assets to borrow funds and access capital markets
 - changes in applicable laws and regulations, which may restrict the payment of dividends by portfolio assets
 - amount and timing of capital expenditures on portfolio assets
 - insurance policies may not provide adequate protection against various risks associated with operations of the REIT/InvIT such as fire, natural disasters, accidents.
- ♦ **Interest Rate Risk** - Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase
- ♦ **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- ♦ **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.

SCHEME INFORMATION DOCUMENT

- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Factors associated with investments in debt instruments having Structured Obligations / Credit Enhancements:

The risks factors stated for debt instruments having Structured Obligations / Credit Enhancements are in addition to the risk factors associated with fixed income instruments:

- Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer
- SO rated securities are often complex structures, with a variety of credit enhancements. Debt securities lack a well-developed secondary market in India, and due to the credit enhanced nature of CE securities as well as structured nature of SO securities, the liquidity in the market for these instruments is adversely affected compared to similar rated debt instruments. Hence, lower liquidity of such instruments, could lead to inability of the scheme to sell such debt instruments and generate liquidity for the scheme or higher impact cost when such instruments are sold.
- The credit risk of debt instruments which are CE rated derives rating is based on the combined strength of the issuer as well as the structure. Hence, any weakness in either the issuer or the structure could have an adverse credit impact on the debt instrument. The weakness in structure could arise due to inability of the investors to enforce the structure due to issues such as legal risk, inability to sell the underlying collateral or enforce guarantee, etc. In case of SO transactions, comingling risk and risk of servicer increases the overall risk for the securitized debt or assets backed transactions. Therefore apart from issuer level credit risk such debt instruments are also susceptible to structure related credit risk.

Risks associated with segregated portfolio:

1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.
3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.
4. Trading in the units of segregated portfolio on the Exchange may be halted because of market conditions, including any halt in the operations of Depository Participants or for reasons that in view of the Exchange Authorities or SEBI, trading in the units is suspended and / or restricted. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to stock exchange rules of 'circuit filter'. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of units of scheme will continue to be met or will remain unchanged.

Risks associated with investing in securitised debt:

The scheme may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS means securitized debts wherein the underlying assets are receivables arising from personal loans, automobile loans, etc. MBS means securitized debts wherein the underlying assets are receivables arising from loans backed by mortgage of properties which can be residential or commercial in nature. ABS / MBS instruments reflect the undivided interest in the underlying of assets and do not represent the obligation of the issuer of ABS / MBS or the originator of the underlying receivables. The ABS / MBS holders have a limited recourse to the extent of credit enhancement provided. Securitised debt may suffer credit losses in the event of the delinquencies and credit losses in the underlying pool exceeding the credit enhancement provided. As compared to the normal corporate or sovereign debt, securitized debt is normally exposed to a higher level of reinvestment risk.

SCHEME INFORMATION DOCUMENT

Pass through Certificate (PTC) (Pay through or other Participation Certificates) represents beneficial interest in an underlying pool of cash flows. These cash flows represent dues against single or multiple loans originated by the sellers of these loans. These loans are given by banks or financial institutions to corporates. PTCs may be backed, but not exclusively, by receivables of personal loans, car loans, two wheeler loans and other assets subject to applicable regulations.

How the risk profile of securitized debt fits into the risk appetite of the scheme

Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income like characteristics. The risk of investing in securitized debt is similar to investing in debt securities. In addition, securitized debt may also carry prepayment risk and has a relatively higher liquidity risk (the same are explained in the sections that follow). However, if the fund manager evaluates that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table. The investment shall be in securitized instruments that are top rated (AAA/ A1+) or its equivalent, by a recognised credit rating agency for the retail pool, and for single loan securitization, limits will be assigned as per the internal credit policy of the Fund.

Policy relating to originators

The originator is the person who has initially given the loan. The originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). An analysis of the originator is especially important in case of retail loans as this affects the credit quality and servicing of the PTC. Originators may be: Banks, Non Banking Finance Companies, Housing Finance Companies, etc. The fund manager's evaluation will be based on the track record of the originator, delinquencies in the pool and the seasoning of the pool. Other factors that will be considered are loan type, size of the loan, average original maturity of the pool, Loan to Value Ratio, geographical distribution, liquid facility, default rate distribution, credit enhancement facility and structure of the pool.

Risk associated with each kind of originator:

- (a) **Prepayment risk:** MBS and ABS are subject to prepayment risk. When the underlying loans are paid off by the borrower prior to their respective due dates, this is known as a prepayment. It could be triggered on account of various factors particularly in periods of declining interest rates. The possibility of such prepayment may require the scheme to reinvest the proceeds of such investments in securities offering lower yields, thereby reducing the scheme's interest income.
- (b) **Interest rate risk:** MBS carry interest rate risk. Home loan borrowers are provided the facility of refinancing their loans at the prevailing interest rates. A lowering of interest rates could induce a borrower to pay his loan off earlier than the scheduled tenure, whereas if the interest rates move upward, the borrower would tend to hold on to his loan for a longer period, thus increasing the maturity of the bond. The maturity of the bond could therefore shorten or lengthen, depending on the prevailing interest rates.
- (c) **Credit risk / default risk:** MBS and ABS also carry credit or default risk. MBS and structures carry built-in credit enhancement in different forms. However, any delinquencies would result in reduction of the principal amount if the amount available in the credit enhancement facility is not enough to cover the shortfall. Historically, housing loans have had lower default rates than other forms of credit.
- (d) **Price risk / liquidity risk:** MBS and ABS are subject to prepayment risk. Limited volumes of trading in securitized paper in secondary market could restrict or affect the ability of the scheme to re-sell them. Thus these trades may take place at a discount, depending on the prevailing interest rates.

In case of securitization involving single loans or a small pool of loans, the credit risk of the underlying borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to assess the credit risk. Securitization transactions may include some risk mitigants (to reduce credit risk). These may include interest subvention (difference in interest rates on the underlying loans and the PTC serving as margin against defaults), overcollateralization (issue of PTCs of lesser value than the underlying loans, thus even if some loans default, the PTC continues to remain protected), presence of an equity / subordinate tranche (issue of PTCs of differing seniority when it comes to repayment - the senior tranches get paid before the junior tranche) and / or guarantees.

SCHEME INFORMATION DOCUMENT

Level of diversification with respect to the underlying assets and risk mitigation measures for less diversified investments:

Currently, the following parameters are used while evaluating investment decision relating to a pool securitization transaction. These parameters may be revised the from time to time.

Characteristics/ Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	Car	Two Wheelers	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 10 Yrs	Up to 3 yrs	Up to 3 yrs	Up to 3 yrs	NA	NA	Refer to Note a	Refer to Note b
Collateral margin (including cash, guarantees, excess interest spread, subordinate tranche)	>10%	>10%	>10%	>10%	NA	NA		
Average Loan to Value Ratio	<90%	<80%	<80%	<80%	NA	NA		
Average seasoning of the Pool	>3 mths	>3 mths	>3 mths	>3 mths	NA	NA		
Maximum single exposure range	<1%	<1%	<1%	<1%	NA	NA		
Average single exposure range %	<1%	<1%	<1%	<1%	NA	NA		

Notes

- In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. The investment limits applicable to the underlying borrower are applied to the single loan sell-down.
- Other investments will be decided on a case-to-case basis.

Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenure of the securitization transaction. The Scheme will invest in securitized debt that is in compliance with the regulations.

Minimum retention percentage by originator of debts to be securitized

RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenure and structure of the securitization transaction. The Scheme will invest in securitized debt that is in compliance with the regulations.

Mechanism to tackle conflict of interest when the mutual fund invests in securitised debt of an originator and the originator in turn invests makes investments in that particular scheme of the fund

The key risk in securitized debt relates to the underlying borrowers and not the originator. In a securitization transaction, the originator is the seller of the debt(s) and the scheme is the buyer. However, the originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). As the originators may also invest in the scheme, the fund manager shall ensure that the investment decision is based on parameters as set by the Investment Committee (IC) of the AMC and IC shall review the same at regular interval.

The resources and mechanism of individual risk assessment with the AMC for monitoring investments in securitised debt

The fund management team including the credit analyst has the experience to analyze securitized debt. In addition, credit research agencies provide analysis of individual instruments and pools. On an on-going basis (typically monthly) the servicer provides reports regarding the performance of the pool. These reports would form the base for ongoing evaluation where applicable. In addition, rating reports indicating rating changes would be monitored for changes in rating agency opinion of the credit risk.

SCHEME INFORMATION DOCUMENT

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes including Conservative Hybrid Fund to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. How will the Scheme allocate its assets? And sub-section D. Where will the Scheme Invest" in "Section II- Information about the scheme".

Risk Management:

In accordance with SEBI & AMFI guidelines (issued from time to time), the AMC has implemented the following measures to manage various risk in the schemes.

Potential Risk Matrix:

The Potential Risk Class Matrix reflects the maximum risk fund manager can take in the scheme in terms of maximum interest rate risk (measured by Macaulay duration of scheme) and maximum credit risk (measured by Credit Risk value of the scheme). The threshold for values of interest rate risk & credit risk would determine the maximum risk the scheme can take.

i. Maximum Weighted Average Interest Rate Risk of the scheme (measured in terms of Macaulay Duration):

1. Class I: MD ≤ 1 year;
2. Class II: MD ≤ 3 years;
3. Class III: Any Macaulay duration

ii. Maximum Weighted Average Credit Risk of the scheme (measured in terms of Credit Risk Value assigned to each security in portfolio):

1. Class A: CRV ≥ 12
2. Class B: CRV ≥ 10
3. Class C: CRV < 10

Liquidity Risk Management Framework: It takes into account the Liquidity Risk arising from the liability side & covers all potential liquidity risk scenarios upto 99% confidence interval. Two types of liquid assets shall be maintained by Open ended debt schemes. Both these ratios are calculated & liquid assets are maintained on a daily basis at a scheme level for all open-ended debt schemes (except Overnight Fund, Gilt Fund and Gilt Fund with constant duration). In the case where liquid assets in a scheme fall below the minimum required threshold then portfolio manager cannot buy any other assets apart from liquid assets till time the liquid assets are replenished, as per the SEBI guidelines.

SCHEME INFORMATION DOCUMENT

Stress Testing: Stress testing in open-ended debt schemes addresses the asset side risk from an Interest Rate Risk, Credit Risk & Liquidity Risk perspective at an aggregate portfolio level in terms of its impact on Net Asset Value of the scheme. The AMC conducts Stress testing for all open-ended debt schemes (except overnight Fund) on a fortnightly basis. The model portfolio for each category of fund is defined. In case the stress in the actual portfolio is greater than stress in model portfolio then corrective action is taken within the defined timeline.

Asset Liability Mismatch: The AMC monitors the Asset Liability Mismatch (ALM) requirement which address potential liquidity risk. The liability side covers all possible outflow scenarios with a 95% confidence interval over 90 days period. The asset side is rigoured based on Risk-o-meter liquidity scores in an exponential manner, to penalize assets with higher Risk-o-meter scores more than proportionately. With the above liquidity management tools, the redemption risk in the scheme can be addressed to a certain extent. However, for extraneous scenarios like 2008- financial crisis, 2019 covid crisis, or during market dislocation a swing pricing mechanism has been introduced at industry level which covers all types of investors (existing, new & outgoing investors).

Other Risks:

- (a) **Risk associated with inflation:** Over time, yields of short-term investments may not keep pace with inflation, leading to a reduction in an investment's purchasing power.
- (b) **Legal risk:** The scheme may be affected by the actions of government and regulatory bodies. Legislation could be imposed retrospectively or may be issued in the form of internal regulations which the public may not be aware of. Legislation (including legislation relating to tax) or regulation may be introduced which inhibits the scheme from pursuing their strategies or which renders an existing strategy less profitable than anticipated. Such actions may take any form, for example nationalization of any institution or restrictions on investment strategies in any given market sector or changing requirements and imposed without prior warning by any regulator.
- (c) **Taxation risk:** The value of an investment may be affected by the application of tax laws, including withholding tax, or changes in government or economic or monetary policy from time to time. As such, no guarantee can be given that the financial objectives will actually be achieved. The tax information described in this Scheme Information Document (SID) is as available under the prevailing taxation laws. This could be changed at any moment by regulation. Further, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the scheme will endure indefinitely.
- (d) **Operational Risk:** Operational risk addresses the risk of trading and back office or administration issues that may result in a loss to the Scheme. This could be the result of oversight, ineffective securities processing procedures, computer systems problems or human error. There could also be risk associated with grouping of orders. For instance, at the time of placing the trades, the fund manager shall group orders on behalf of all schemes managed by him, provided it is unlikely to be detrimental overall for any of the schemes whose orders have been included. However, such grouping may have a detrimental effect to the scheme compared to the execution of an individual order for the scheme.
- (e) **Valuation risk:** This risk relates to the fact that markets, in specific situations and due to lack of volumes of transactions, do not enable an accurate assessment of the fair value of invested assets. In such cases, valuation risk represents the possibility that, when a financial instrument matures or is sold in the market, the amount received is less than anticipated, incurring a loss to the portfolio and therefore impacting negatively the NAV of the scheme.
- (f) **Risk factors associated with processing of transaction in case of investors investing in mutual fund units through Stock Exchange Mechanism:** The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognized stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing / settlement, etc. upon which the Fund and the AMC have no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s) upon which the Fund and the AMC have no control. Accordingly, there could be negative impacts to the investors such as delay or failure in allotment / redemption of Units. The Fund and the AMC are not responsible for the negative impacts.

C. RISK MITIGATION STRATEGIES

Risk Mitigation measures for investments in debt instruments.

The investments in debt and Money Market instruments would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk. The AMC shall undertake credit evaluation of each investment

SCHEME INFORMATION DOCUMENT

opportunity and invest in rated papers of companies having a sound background, strong fundamentals and quality of management and financial strength. In addition, the Scheme would endeavor to invest in instruments with a relatively higher liquidity and will seek to manage the duration of the debt assets on proactive basis to manage interest rate risk and to optimize returns. The following table summarizes the risk mitigation/management strategy for the Debt assets of the Scheme

Risk & description specific to Debt	Risk Mitigation/ management strategy
Interest Rate Risk	<p>The duration of a portfolio is one of the means of measuring the interest rate risk of the portfolio. Hence portfolios with higher duration will have higher interest rate risk.</p> <p>The duration of the Scheme will be actively managed based on prevailing macroeconomics condition, political environment, liquidity position in system, inflationary expectorations and other economic considerations.</p>
Credit Risk	<p>The credit evaluation of the AMC entails evaluation of credit fundamentals of each investment opportunity. Some of the factors that are evaluated inter-alia may include outlook on the sector, parentage, quality of management, and overall financial strength of the credit. The AMC will utilize ratings of recognized rating agencies as an input in the decision making process. To reduce credit risk, the scheme shall Invest in debt and money market instruments that have been assigned high investment grade ratings by a recognized rating agency.</p>
Liquidity Risk	<p>Liquidity risk is the risk of not being able to sell / liquidate a security at short notice at prevailing market prices or without incurring impact cost. Liquidity Risk can be partly mitigated by creating portfolios that are diversified across maturities, ratings, types of securities, etc. in line with the fund objectives, regulations and investment strategy.</p> <p>The Scheme shall follow the asset allocation pattern in Scheme Information Document under normal circumstances and residual cash may be invested in the Tri-party repo on Government Securities and treasury bills, repo market, units of mutual fund which seeks to ensure liquidity in the scheme under normal circumstances.</p>
Volatility Risk	<p>There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The Scheme will manage volatility risk through diversification. To that extent, the Volatility risk will be mitigated in the Scheme.</p>
Concentration Risk	<p>The AMC will attempt to mitigate this risk by maintaining adequate diversification across issuers/ sectors / instrument type in line with the scheme objectives, investment strategy and applicable regulations. This will also be managed by keeping prudent investment limits on any particular industry or issuer or issuer group based on the size, credit profile, etc. to reduce issuer or industry specific risk.</p>

The Scheme may utilize derivative instruments for hedging & portfolio balancing purposes. All Interest Rate Swaps will be undertaken with approved counter parties under pre-approved International Swaps and Derivatives Association (ISDA) agreements. The scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI/RBI for the purpose of hedging and portfolio rebalancing.

The above risk control measures shall be implemented by the AMC on best effort basis however there can be no guarantee that such measures can completely mitigate the risks involved in Scheme.

Position of debt & money market in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds. The G-Sec market is the oldest and the largest component of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Sec market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. A large part of the issuance in the non-Government debt market is currently on private placement basis.

SCHEME INFORMATION DOCUMENT

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and nongovernment debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Tri-party repo on Government Securities and treasury bills (TREPS).
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as money market instruments, PSU / DFI / corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option. The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

Instruments	Current yield as on October 31, 2024 (% per annum)
TREPS	6.10-6.30
3M T-Bill	6.45-6.55
1 Y T-Bill	6.50-6.60
10 Y G Sec	6.80-6.87
3M PSU Bank CD	7.15-7.20
3M NBFC CP	7.45-7.50
1 Y PSU Bank CD	7.50-7.55
1 Y NBFC CP	7.70-7.80
1Y Manufacturing Company CP	7.60-7.70
5 Y AAA Institutional Bond	7.35-7.45
10 Y AAA Institutional Bond	7.20-7.30

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

B. What are the investment restrictions?

Pursuant to the SEBI Regulations, the following investment restrictions are applicable to the scheme:

- 1) The Scheme shall not invest in equity and equity related securities.
- 2) **Issuer level exposure limits:** A mutual fund scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorised to carry out such activity under the Act.

Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Trustees or Board of AMC or a Committee constituted in this behalf. Provided that such limit shall not be applicable for

SCHEME INFORMATION DOCUMENT

investments in Government Securities, treasury bills and triparty repo on Government securities or treasury bills:

Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with SEBI.

Sector level exposure limits: The Mutual Fund/AMC shall ensure that total exposure of the Scheme in a particular sector (excluding investments in Bank CDs, tri-party repo on government securities or treasury bills, G-Secs, TBills, short term deposits of Scheduled Commercial Banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme;

Provided that an additional exposure to financial services sector (over and above the limit of 20%) not exceeding 10% of the net assets of the scheme shall be allowed by way of increase in exposure to Housing Finance Companies (HFCs) only; Further, an additional exposure of 5% of the net assets of the scheme has been allowed for investments in securitized debt instruments based on retail housing loan portfolio/ an affordable housing loan portfolio. However, the overall exposure in HFCs shall not exceed the sector exposure limit of 20% of the net assets of the scheme.

Provided further that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 20% of the net assets of the Scheme.

Group level exposure limits: The total exposure of the Scheme in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.

The investments by the Scheme in debt and money market instruments of group companies of both the sponsor and the AMC shall not exceed 10%. Such investment limit may be extended to 15% with the prior approval of the Board of Trustees.

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

- 3) A mutual fund scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities, other money market instruments and derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging:

Provided that Mutual Fund Schemes may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to such conditions as may be specified by SEBI vide Para 12.1.1 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 as amended from time to time.

Provided further that for investments by mutual fund schemes in unrated debt instruments maybe made subject to such conditions as may be specified by SEBI vide para 12.1.5 SEBI Master circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 as amended from time to time.

In accordance with the para 12.1.5 SEBI Master circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024,

investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. by mutual fund schemes shall be subject to the following:

- a. Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI Regulations and various circulars issued thereunder.
 - b. Exposure of mutual fund schemes in such instruments, shall not exceed 5% of the net assets of the schemes.
 - c. All such investments shall be made with the prior approval of the Board of AMC and the Board of Trustees.
- 4) In terms of para 12.3 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the investment of mutual fund schemes in the following instruments shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes:
- a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
 - b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

The above limits would not be applicable for investments in securitized debt instruments.

For the purpose of this provision, 'Group' shall have the same meaning as defined in para 12.9.3.3 of SEBI Master Circular No. SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024

SCHEME INFORMATION DOCUMENT

which states a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

- 5) The Scheme may invest in debt instruments with special features subject to following prudential limits as prescribed under para 12.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 or such other circular issued by SEBI from time to time:
- (i) No Mutual Fund under all its schemes shall own more than 10% of such instruments issued by a single issuer
 - (ii) A Mutual Fund scheme shall not invest –
 - a. more than 10% of its NAV of the debt portfolio of the scheme in such instruments; and
 - b. more than 5% of its NAV of the debt portfolio of the scheme in such instruments issued by a single issuer.

The above investment limit for a mutual fund scheme shall be within the overall limit for debt instruments issued by a single issuer, as specified at clause 1 of the Seventh Schedule of SEBI (Mutual Fund) Regulations, 1996, and other prudential limits with respect to the debt instruments.

Valuation of debt instrument securities with special features on the trigger date:

'Trigger date': Pursuant to Master Circular dated June 27, 2024, if the said instrument is to be written off or converted to equity pursuant to any proposal, the date of said proposal may be treated as the trigger date. However, if the said instruments are written off or converted to equity without proposal, the date of write off or conversion of debt instrument to equity may be treated as the trigger date.

While arriving at the valuation of products with special features, AMC/Valuation Agencies shall ensure that the financial stress of the issuer and the capabilities of issuer to repay the dues/borrowings are reflected in the valuation of the securities from the trigger date onwards. Further, the extent of losses proposed to be adjusted, the nature of structuring if any, shall also be taken in to account. Where the trigger leads to conversion into equity, factors like extent of conversion, listing status, period to listing, illiquidity etc. shall be considered to arrive at valuation of the securities. The scheme shall at all times adhere to necessary guidelines and circulars pertaining to valuation of such securities issued by SEBI from time to time.

- 6) Pursuant to para 4.6.1 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, the scheme shall hold at least 10% of its net assets in liquid assets. For this purpose, 'liquid assets' shall include Cash, Government Securities, T-bills and Repo on Government Securities.
- 7) Transfer of investments from one scheme to another scheme in the same Mutual Fund, shall be allowed only if,-
- (i) such transfers are done at the prevailing market price for quoted instruments on spot basis. Explanation: "Spot basis" shall have the same meaning as specified by stock exchange for spot transactions.
 - (ii) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.

Further, provisions of para 12.30 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 and such other guidelines, shall also be complied with for such transfers.

- 8) A scheme may invest in another scheme under the same AMC or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund. Provided that this clause shall not apply to any Fund of Fund schemes and investment in Mutual Funds in Foreign Countries made in accordance with guideline issued by SEBI from time to time.
- 9) Indian MF schemes can now invest in Overseas MFs/UT, provided that the total exposure of Overseas MFs/UT in Indian securities is not more than 25% of their net assets as per the provisions of SEBI Circular no SEBI/HO/IMD/IMD-PoD-1/P/CIR/149 dated November 04, 2024.
- 10) The Mutual Fund will buy and sell securities on the basis of deliveries and shall in all cases of purchase, take delivery of relevant securities and in all cases of sale, deliver the securities.
Provided that a mutual fund may enter into derivatives transactions in a recognised stock exchange, subject to the framework specified by SEBI. Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.
- 11) The Mutual Fund shall get the securities purchased or transferred in the name of the Mutual Fund on account of the concerned scheme, wherever investments are intended to be of a long term nature.
- 12) In terms of Para 12.16 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, pending deployment of funds of the Scheme in securities in terms of the investment objective of the Scheme, the Mutual Fund may invest the funds of the Scheme in short term deposits of scheduled commercial

banks subject to restrictions laid down under the SEBI Regulations from time to time. The following provisions shall be complied with:

- a. Short Term" for parking of funds by Mutual Fund shall be treated as a period not exceeding 91 days.
 - b. Such short term deposits shall be held in the name of the concerned scheme.
 - c. No mutual fund scheme shall park more than 15% of the net assets in Short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with prior approval of the trustees. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the mutual fund in short term deposits.
 - d. No mutual fund scheme shall park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
 - e. Trustee/AMC shall ensure that no funds of a scheme may be parked in short term deposit of a bank which has invested in that scheme. Trustee/AMC shall also ensure that the bank in which a scheme has short term deposit do not invest in the said scheme until the scheme has short term deposit with such bank.
 - f. AMC shall not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.
- 13) A scheme shall not make any investments in:
- a. any unlisted security of an associate or group company of the Sponsor; or
 - b. any security issued by way of private placement by an associate or group company of the Sponsor; or
 - c. the listed securities of group companies of the sponsor which is in excess of 25% of the net assets.
- 14) The Scheme shall not make any investment in any fund of funds scheme.
- 15) The Scheme may invest in the units of REITs and InvITs subject to the following:
- a. No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and InvIT; and
 - b. A mutual fund scheme shall not invest –
 - i. more than 10% of its NAV in the units of REIT and InvIT; and
 - ii. more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer
 Provided that the limits mentioned in (i) and (ii) above shall not be applicable for investments in case of index fund or sector or industry specific scheme pertaining to REIT and InvIT.
- 16) Save as otherwise expressly provided under SEBI Regulations, the mutual fund shall not advance any loans for any purpose.
- 17) The mutual fund having an aggregate of securities, which are worth Rs. 10 crore or more, as on the latest balance sheet date, shall subject to such instructions as may be issued from time to time by SEBI, settle their transactions entered on or after January 15, 1998 only through dematerialised securities.
- 18) The mutual fund shall not borrow except to meet temporary liquidity needs of the mutual fund for the purpose of repurchase, redemption of units or payment of interest or dividend to the unit holders.
Provided that the mutual fund shall not borrow more than 20% of the net asset of the scheme and the duration of such a borrowing shall not exceed a period of six months.
- 19) SEBI has permitted Mutual Funds to participate in derivatives trading subject to observance of guidelines issued by it in this behalf. Accordingly, Mutual Funds may use various derivative products from time to time, as would be available and permitted by SEBI. The Mutual Fund would comply with the provisions of SEBI Circular Ref. No. DNP/Cir-29/2005 dated September 14, 2005 and para 7.5 of SEBI Master circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 and such other amendments issued by SEBI from time to time while trading in derivatives.
- 20) Pursuant to the para 12.24 and para 12.25 of SEBI Master Circular dated June 27, 2024 the following norms for investment in derivatives shall be applicable.
1. The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.
 2. The scheme shall not write options or purchase instruments with embedded written options.
 3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
 4. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
 5. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - (i) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - (ii) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in point 1 above.

SCHEME INFORMATION DOCUMENT

- (iii) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- (iv) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- 6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1 above.
- 7. As per Para 12.25.5 and 12.25.6 of SEBI Master Circular dated June 27, 2024:
 - (a) The Scheme may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.
 - (b) In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.
- 8. Definition of Exposure in case of Derivative Positions
Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

The scheme shall comply with the requirements stated in para 12.25.11 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 as amended from time to time.

- 21) To reduce interest rate risk, the Scheme may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio shall be as per the formula given below:

$$\frac{(\text{Portfolio Modified Duration} * \text{Market Value of the Portfolio})}{(\text{Futures Modified Duration} * \text{Futures price} / \text{PAR})}$$

Imperfect hedging using IRFs shall be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to the following:

- a. Exposure to IRFs is created only for hedging the interest rate risk based on the weighted average modified duration of the bond portfolio or part of the portfolio.
- b. The Scheme may resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is at least 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same shall be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure computed in terms of para 12.24.1 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The correlation shall be calculated for a period of last 90 days.

Explanation: If the fund manager intends to do imperfect hedging upto 15% of the portfolio using IRFs on weighted average modified duration basis, either of the following conditions needs to be complied with:

- (i) The correlation for past 90 days between the portfolio and the IRF is at least 0.9 or
- (ii) The correlation for past 90 days between the part of the portfolio (excluding the hedged portions, if any) i.e. at least 15% of the net asset of the Scheme (including one or more securities) and the IRF is at least 0.9.
- c. At no point of time, the net modified duration of part of the portfolio being hedged should be negative.
- d. The portion of imperfect hedging in excess of 20% of the net assets of the Scheme shall be considered as creating exposure and shall be included in the computation of gross exposure in terms of para 12.24.1 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024.

Further, it shall be ensured that the basic characteristics of the Scheme shall not be affected by hedging the portfolio or part of the portfolio (including one or more securities) based on the weighted average modified duration and that the interest rate hedging of the portfolio shall be in the interest of the investors.

SCHEME INFORMATION DOCUMENT

Explanation: In case of long term bond fund, after hedging the portfolio based on the modified duration of the portfolio, the net modified duration should not be less than the minimum modified duration of the portfolio as required to consider the fund as a long term bond fund.

- 22) The Mutual Fund may engage in securities lending of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI.
- 23) Participation by the Scheme in CDS transactions shall be subject to and as per the guidelines issued by RBI and SEBI from time to time. SEBI vide Circular No. CIR/IMD/DF/23/2012 dated November 15, 2012 has prescribed the following conditions: (a) The Scheme shall participate in CDS transactions only as users (protection buyer). Thus, the Scheme is permitted to buy credit protection only to hedge its credit risk on corporate bonds it holds. The Scheme shall not be allowed to sell protection and hence not permitted to enter into short positions in the CDS contracts. However, the Scheme shall be permitted to exit its bought CDS positions, subject to para (c) below. (b) The Scheme shall buy CDS only from a market maker approved by the RBI and enter into Master Agreement with the counterparty as stipulated under RBI Guidelines. Exposure to a single counterparty in CDS transactions shall not exceed 10% of the net assets of the Scheme. (c) The cumulative gross exposure through CDS in corporate bonds along with equity, debt and derivative positions shall not exceed 100% of the net assets of the Scheme. (d) The total exposure related to premium paid for all derivative positions, including CDS, shall not exceed 20% of the net assets of the Scheme.
- 24) The Scheme shall participate in repos in corporate debt securities as per the guidelines issued by RBI from time to time, subject to the following conditions: • The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme. • The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt and derivatives shall not exceed 100% of the net assets of the Scheme. • The Scheme shall participate in repo transactions in rated corporate debt securities as per the policy on repo in corporate debt securities adopted by the AMC; however, such rating shall not be lower than the rating prescribed by SEBI. • The Scheme shall borrow through repo transactions, for a tenor as per the policy on repo in corporate debt securities adopted by the AMC; however, such tenor shall not exceed a period of six months as prescribed by SEBI

All investment restrictions shall be applicable at the time of making investment. Apart from the investment restrictions prescribed under the SEBI Regulations, internal risk parameters for limiting exposure to a particular scrip or sector may be prescribed from time to time to respond to the dynamic market conditions and market opportunities. The AMC / Trustee may alter the above investment restrictions from time to time to the extent that changes in the SEBI Regulations may allow and as deemed fit in the general interest of the unit holders.

C. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the Scheme, in terms of clause 1.14 of SEBI Master Circular for Mutual Funds dated June 27, 2024:

- (i) Type of Scheme:

 - The scheme does not guarantee any assured returns.

In accordance with Regulation 18(15A) of the SEBI (Mutual Funds) Regulations, 1996 read with Para 1.14.1.4 of SEBI Master circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 the Trustees shall ensure that no change in the fundamental attributes of the Scheme and the plan(s)/option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme and the plan(s)/option(s) thereunder affect the interests of Unit holders is carried out by the AMC unless it complies with regulation 25(26) of the SEBI Regulations.

Pursuant to Regulation 25(26) of the SEBI (MF) Regulations and Clause 1.14.1.4 of SEBI Master Circular, the AMC shall ensure that no change in the fundamental attributes of the Scheme as mentioned above, shall be carried out by the AMC unless it complies with seb-regulation (26) of 25g of SEBI Regulations:

SCHEME INFORMATION DOCUMENT

- (i) An application has been made with SEBI and comments of SEBI have been received before carrying out any fundamental attribute changes.
- (ii) A written communication about the proposed change is sent to each unit holder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- (iii) The unit holders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

D. Other Scheme Specific Disclosures:

<p>Listing and transfer of Units</p>	<p><u>Listing:</u> At present, the Units of the Scheme are not proposed to be listed on any stock exchange. However, the AMC / Trustee may at their sole discretion list the Units under the Scheme on one or more stock exchanges at a later date.</p> <p><u>Transfer of units:</u> Units of the Scheme shall be freely transferable by act of parties or by operation of law, subject to restrictions, if any, provided in the section "Restrictions, if any, on the right to freely retain or dispose off units being offered."</p> <p>AMC shall, on production of instrument of transfer together with relevant Unit Certificates, register the transfer and return the unit certificate to the transferee within thirty days from the date of such production.</p> <p>If held in demat form, they are freely transferable from one demat account to another demat account in accordance with the provisions of the Securities and Exchange Board of India (Depositories and Participants) Regulations, 1996.</p> <p>If a person becomes a holder of the Units consequent to an operation of law or upon enforcement of a pledge, the AMC shall, subject to production of satisfactory evidence and submission of such documents by the transferee, effect the transfer, if the transferee is otherwise eligible to hold the Units of the Scheme. Similarly, in cases of transfers taking place consequent to death, insolvency etc., the transferee's name will be recorded by the Fund, subject to production of satisfactory evidence. The provisions in respect of deletion of names will not be applicable in case of death of a Unit holder (in the case of joint holdings) as this is treated as transmission of Units and not as transfer. Investors may note that stamp duty and other statutory levies, if any, as applicable from time to time shall be borne by the investor.</p> <p>Further, in accordance with para 14.4.4 of SEBI Master Circular dated June 27, 2024 on transferability of mutual fund units, investors /unitholders are requested to note that units held in electronic (demat) form shall be transferable under the depository system and will be subject to the transmission facility in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 1996 as may be amended from time to time.</p>
<p>Dematerialization of Units</p>	<p>Pursuant to para 14.4.2 of SEBI Master Circular dated June 27, 2024; the unit holders of the Scheme shall be provided an option to hold units in demat form in addition to physical form. The following shall be applicable:</p> <ol style="list-style-type: none"> 1. The unit holder opting to hold units in demat form must provide their demat account details in the specified section of the application form. Such unit holder should have a beneficiary account with the depository participant (DP) (registered with NSDL / CDSL) and shall be required to indicate in the application form the name of the DP, DP ID Number and the beneficiary account number. The unit holder must mandatorily provide latest client investor master or demat account statement along with the application form. 2. Units held in demat form are transferable (except for Equity Linked Savings Scheme) in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 1996 as may be amended from time to time. Transfer can be made only in favor of transferees who are capable of holding units and having a valid demat account.

SCHEME INFORMATION DOCUMENT

	<ol style="list-style-type: none"> 3. In case, the unit holder desires to hold the units in a demat/rematerialized form at a later date, the request for conversion of units held in non-demat form into Demat (electronic) form or vice-versa should be submitted alongwith a demat/remat request form to the DP directly and not to the AMC or the Registrar and Transfer Agent (RTA) of the Fund. The AMC shall then issue units in the desired form within two working days of the receipt of valid documents from the respective DP. The credit of the converted units shall be reflected in the transaction statement provided by the DP to its client. Similarly, request for redemption or any other non – financial request shall be submitted directly to the DP and not to the AMC/ RTA of the Fund. 4. For the units held in demat form investors will receive an account statement from their respective DPs and not from AMC / RTA of the Fund. 5. Units will be credited in the demat account only based on fund realization. 6. The facility of availing the units in demat / remat form is available subject to such processes, operating guidelines and terms & conditions as may be prescribed by the DPs and the depositories from time to time. 7. Presently, the option to hold units in demat form shall not be available for systematic transactions like Systematic Transfer Plan (STP), Systematic Withdrawal Plan (SWP) etc. Such investors shall be mandatorily allotted units in physical form. 8. Pursuant to para 14.4.2 of SEBI Master Circular dated June 27, 2024 and AMFI communication no. 35P/MEM-COR/35/11-12 dated December 23, 2011 an option to hold units in demat form shall be available for SIP transactions. However, the units will be allotted based on the applicable NAV as per the SID and will be credited to investors demat account on weekly basis upon realization of funds. For e.g. units will be credited to investors demat account every Monday (or immediate next business day in case Monday happens to be a non-business day) for realization status received in last week from Monday to Friday. If an investor has opted to hold units in demat form for SIP transactions, he will be able to redeem / transfer only those units which are credited to his demat account till the date of submission of redemption / transfer request. Accordingly, redemption / transfer request shall be liable to be rejected in case of non - availability of sufficient units in the investor's demat account as on date of submission of redemption / transfer request.

Based on the para 16.6 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, to comply with the requirements of RTA inter-operable Platform for enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTAs (QRTA's), Kfin Technologies Limited (Kfintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral - A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the MFCentral platform. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using link <https://mfcentral.com/> (or its app in future).

With a view to comply with all provisions of the aforesaid circular, AMC/the Fund designates MFCentral as its Official Points of Acceptance of Transactions (OPAT) w.e.f. September 23, 2021.

SCHEME INFORMATION DOCUMENT

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of Kfintech or CAMS.
