V. RISK FACTORS

1. STANDARD RISK FACTORS

a. Standard Risk Factors for investments in Mutual Fund

- Investments in mutual fund units involves investment risks such as market risk, credit & default risk, liquidity risk, trading volumes, settlement risk, including the possible loss of principal.
- As the price/ value/ interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down. The various factors which impact the value of the scheme's investments include, but are not limited to, fluctuations in the stock markets, bond markets, fluctuations in interest rates, prevailing political and economic environment, changes in government policy, factors specific to the companies and issuer of the securities, tax laws, liquidity of the underlying instruments, settlement periods, trading volumes etc.
- Past performance of the Sponsor/ AMC/ Mutual Fund does not guarantee future performance of the scheme.
- The Schemes of the mutual fund do not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The Sponsor / its associates are not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs. 10,00,000/- (Rupees Ten lakh only) to the corpus of the Mutual Fund made by it towards setting up the Fund.
- The present schemes of the Fund are not guaranteed or assured return schemes.

b. Risk factors of not maintaining average AUM of Rs. 20 crore on half yearly rolling basis (Applicable only for open ended debt oriented schemes)

- The scheme(s) shall maintain an average AUM of Rs. 20 crore on half yearly rolling basis. In case, the average AUM falls below Rs. 20 crore, the AMC shall scale up the AUM of such scheme(s) within a period of six months so as to maintain the average AUM of Rs. 20 crore on half yearly rolling basis

c. **Risks associated with different derivative strategies**

The Schemes may use various derivative instruments and techniques, permitted within SEBI Regulation from time to time only for portfolio balancing and hedging purpose, which may increase the volatility of scheme's performance. Usage of derivatives will expose the Schemes to certain risks inherent to such derivatives.

Derivative products are specialized instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional investments.

The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is a possibility that a loss may be sustained by the Scheme as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, interest rates and indices. Even a small price movement in the underlying instrument could have a large impact on their value. This could increase the volatility of the Scheme's performance.

In case of hedge, it is possible that derivative positions may not be perfectly in line with the underlying assets they are hedging. As a consequence, the derivative cannot be expected to perfectly hedge the risk of the underlying assets. This also increases the volatility of the Scheme's performance.

Some of the risks inherent to derivatives investments include:

1. **Price Risk:** Despite the risk mitigation provided by various derivative instruments, there remains an inherent price risk which may result in losses exceeding actual underlying.
2. **Default Risk:** This is the risk that losses will be incurred due to default by counter party. This is also known as credit risk or counterparty risk.
3. **Basis Risk:** This risk arises when the derivative instrument used to hedge the underlying asset does not match the movement of the underlying being hedged for e.g. mismatch between the maturity date of the futures and the actual selling date of the asset.
4. **Limitations on upside:** Derivatives when used as hedging tool can also limit the profits from a genuine investment transaction.
5. **Liquidity risk:** This risk pertains to how saleable a security is in the market. All securities/instruments irrespective of whether they are equity, bonds or derivatives may be exposed to liquidity risk (when the sellers outnumber buyers) which may impact returns while exiting opportunities.

Interest Rate Swaps: An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example: Use of IRS

- (i) The funds of the Scheme are reasonably invested, and the view of the fund manager is that interest rates are expected to move up due to certain negative events, which have occurred. In such cases, the Scheme may enter into a paid position (IRS)

Example A: Use of IRS – Paid Position

Let us assume the Scheme has 10% of its portfolio in cash. The fund manager is of the view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay a fixed rate of return on cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from an overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days: The Scheme pays a fixed rate for 91 days at 9.90% and receives a compounded rate at 10.25% for 91 days.

In practice the difference between the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporates, mutual funds and all India financial institutions.

- (ii) In the view of the fund manager, interest rates are expected to come down due to certain positive events, which have occurred. In such cases, the Scheme may enter into a received position (IRS) where the Scheme will receive a fixed rate for a specified maturity and pay a floating rate of interest. This is illustrated below:

Example B: Use of IRS – Received Position

Let us assume the Scheme has 10% of its portfolio in cash. The fund manager is of the view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 10.25%
5. At the end of 91 days;
6. The Scheme pays compounded call rates for 91 days at 9.90% and receives a fixed rate at 10.25% for 91 days. In practice, the difference between the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and all India financial institutions.

Risk Factor: The risks arising out of use of the above derivative strategy are as under:

- Lack of opportunities available in the market.
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Forward Rate Agreement (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period. The interest rate benchmarks that are commonly used for floating rate in interest rate swaps are those on various Money Market Instruments. In Indian markets, the benchmark most commonly used is MIBOR.

In the fund manager's view, interest rates are expected to move up due to certain negative events which are expected to occur at a specified future date. In such cases, the Scheme can enter into a

paid position (FRA) at a specified date in the future where the Scheme will pay a fixed rate for a specified maturity and receive the floating rate of interest at a specified future date. This is illustrated below.

Example 1: Use of FRA

The fund manager believes that in 3 months, interest rates will be higher, and decides to enter into an FRA to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio which is for a notional amount of Rs. 2 crore, where the bank agrees to pay 6% fixed; in case the 6 month OIS rate is greater than 6%, the bank will pay the difference to the portfolio manager 3 months hence, for 6 months. Say, 3 months hence, the OIS rate for six months is 6.50%.

This, like IRS, is cash settled and the bank, at the end of three months, will pay the portfolio manager the following $(6.50 - 6.00) \times 181 \times 200,000,00 / (365 \times 100 + 6.50 \times 181) = \text{Rs } 48040.55$ for that six months.

The view of the fund manager is interest rates are expected to move down due to certain positive events which are expected to occur at a specified future date. In such cases, the Scheme can enter into a received position (FRA) at a specified date in the future where the plans will receive a fixed rate for a specified maturity and pay the floating rate of interest at a specified future date. This is illustrated below.

Example 2: Use of FRA

The fund manager believes that in 3 months, interest rates will be lower, and decides to enter into an FRA agreement to protect the portfolio return. Say the manager wants to hedge 10% of the portfolio, which is for a notional amount of Rs 2 crore, where the bank agrees to pay 6% fixed, in case the 6 month OIS rate is less than 6%, the bank will pay the difference to the portfolio manager 3 months hence, for 6 months. Say, 3 months hence, the OIS rate for six months is 5.50%.

This, like IRS, is cash settled and the bank, at the end of three months, will pay the portfolio manager the following $(6.00 - 5.50) \times 181 \times 200,000,00 / (365 \times 100 + 5.50 \times 181) = \text{Rs. } 48272.76$ for six months.

Investment restrictions with regard to use of derivatives:

- When entering into plain vanilla interest rate swaps for hedging purposes for the scheme, the AMC will ensure that the counter party is an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the Scheme.
- Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the Scheme.
- Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated as part of the cumulative gross exposure limit through equity, debt and derivative positions, which shall not exceed 100% of the net assets of the Scheme.

Risk Factors: The risks arising out of use of the above derivative strategy are as under:

- Forward Rate Agreements are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involves uncertainty, and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Forward Rate Agreements are specialised instruments that require investment techniques and risk analysis.
- Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Swing Pricing

Pursuant to para 4.10 of SEBI Master Circular dated June 27, 2024, SEBI has prescribed swing pricing framework for open ended debt schemes (excluding overnight funds, Gilt funds and Gilt with 10-year maturity funds).

Swing pricing refers to a process for adjusting a fund's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity. Swing pricing mechanism would help ensure fairness of treatment of entering, exiting and existing investors in the mutual fund schemes, particularly during market dislocation. When the Swing pricing framework is triggered and swing factor is made applicable, both the incoming investors (ie. who submit purchase / switch-in requests) and outgoing investors (i.e. who submit redemption / switch out requests) shall get NAV adjusted to the extent of swing factor applied.

Investment in Corporate Debt Market Development Fund (CDMDF)

Corporate Debt Market Development Fund ("CDMDF" or "the fund") is set up as Category I Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility for purchase of investment grade corporate debt securities, to instil confidence amongst the participants in the Corporate Debt Market during times of stress and to generally enhance secondary market liquidity by creating a permanent institutional framework for activation in times of market stress.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI Master circular on Investment by Mutual Fund Schemes and AMCs in units of CDMDF, certain debt schemes (i.e., open ended debt oriented mutual fund schemes excluding Overnight funds and Gilt funds and including Conservative Hybrid funds), shall invest 25 bps of its AUM as on December 31, 2022 in the units of CDMDF within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF. However, in case of winding up of contributing scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Liquidity Risk Management Framework

It takes into account the Liquidity Risk arising from the liability side & covers all potential liquidity risk scenarios upto 99% confidence interval. Two types of liquid assets shall be maintained by Open ended debt schemes. Both these ratios are calculated & liquid assets are maintained on a daily basis at a scheme level for all open-ended debt schemes (except Overnight Fund, Gilt Fund and Gilt Fund with constant duration). In the case where liquid assets in a scheme fall below the minimum required threshold then portfolio manager cannot buy any other assets apart from liquid assets till time the liquid assets are replenished, as per the SEBI guidelines

2. SPECIAL CONSIDERATIONS

1. From time to time, the sponsor, their affiliates, associates, subsidiaries, the Mutual Fund and the AMC may invest directly or indirectly in the Scheme. These entities may acquire a substantial portion of the Scheme's units and collectively constitute a major investor in the Scheme. Accordingly, redemption / repurchase of Units held by such entities may have an adverse impact on the Scheme because the timing of such redemption / repurchase may impact the ability of other Unit holders to redeem their Units.

2. Redemption by the Unitholder due to change in the fundamental attributes of the Scheme or due to any other reasons or winding-up of the Scheme for reasons mentioned in this Document may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors, officers or their employees shall not be liable for any such tax consequences that may arise.
3. Investment decisions made by the AMC may not always be profitable.
4. The tax benefits described in this Scheme Information Document / SAI are as available under the prevailing taxation laws. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Schemes will endure indefinitely.
5. Investors should study this SID carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, investment or any other matters. Investors are advised to consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming units, before making a decision to invest / redeem units.
6. Neither this SID nor the Units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or totally prohibited to registration requirements and accordingly, persons who come into possession of this SID are required to inform themselves about and to observe any such restrictions.
7. No person has been authorised to issue any advertisement or to give any information, either oral or written to make any representations other than that contained in this SID/SAI. Any communication in connection with this offering not authorised by the Mutual Fund / Trustee / AMC and any information or representations not contained herein must not be relied upon as having been authorised by the Mutual Fund / Trustee / AMC.
8. As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption requests or of a restructuring of the Scheme(s). In view of the above, the AMC/Trustee has the right, in its sole discretion, to limit Redemptions (including suspending Redemptions) under certain circumstances, as described here.
9. The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Risk-o-meter categorizes the schemes of Fund under different levels of risk in terms of parameters defined under para 17.4 of SEBI Master circular. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Risk-o-meter) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. Further, in terms of aforesaid para 17.4 SEBI Master circular, investors are requested to note that Risk-o-meter for the Scheme shall be evaluated on monthly basis and AMC shall disclose the Risk-o-meter along with monthly portfolio disclosure for the Scheme on its website and on AMFI website within 10 days from the close of each month. Additionally, in case of any change in the risk-o-meter upon such evaluation, which will be done on monthly basis, the same shall be communicated by way of Notice-cum-Addendum and by way of an e-mail or SMS to unitholders of the Scheme. **Investors are requested to note that change in risk-o-meter will not be considered as a Fundamental Attribute Change of the Scheme in terms of regulation 18(15A) of SEBI (Mutual Funds) Regulations, 1996.**
10. The AMC and/or its Registrar may have to disclose the investors' personal information and/or any part of it including the changes/updates that may be provided by the investors' with (a) the Sponsor/s, Trustees, AMC, its employees, agents and third party service providers as deemed necessary for conduct of business including Registrar, Bankers/its agents and / or authorised external third parties who are involved in transaction processing, dispatches, effecting payments etc. of investors' investment in the Scheme; (b) Distributors or sub-brokers or Investment Advisors or intermediaries through whom applications of investors are received for the Scheme or whose stamp appears on the application form; or (c) Any other organisations or regulatory/statutory/judicial/quasi judicial entities (Indian or foreign) for compliance with any legal

or regulatory requirements without any intimation/advice to the investors' or to verify the identity of investors for complying with anti-money laundering requirements.

11. Compliance with Foreign Accounts Tax Compliance Act ("FATCA") and Common Reporting Standards (CRS) requirements:

FATCA and CRS requirements may require disclosure regarding your investment in the units of the Scheme.

Investors are further informed that the AMC / the Fund are required to adhere to various requirements inter alia including submission of various information / details relating to the investors in the schemes of the mutual fund, to authorities/third parties including the U.S Internal Revenue Service ('IRS') or the Indian tax authorities, for the purpose of onward transmission to the U.S. Internal Revenue Service or such other authority as specified under the applicable laws from time to time. The information disclosed may include (but is not limited to) the identity of investors and their direct or indirect beneficiaries, beneficial owners and controlling persons, their residential status / details. ABOUT FATCA and CRS DISCLOSURE - Foreign Account Tax Compliance Act

India and US have signed an agreement on July 9, 2015 on the terms of an Inter-Governmental Agreement ("IGA") to implement Foreign Accounts Tax Compliance Act ("FATCA"). Further, the Organization of Economic Development ("OECD") along with G-20 countries has released a 'Standard for Automatic Exchange of Financial Account Information in Tax Matters' commonly known as Common Reporting Standard ('CRS'). India is amongst the first signatories to the Multilateral Competent Authority Agreement ("MCAA") for the purposes of CRS.

The AMC/Mutual Fund is classified as "Foreign Financial Institution" under the FATCA provisions. The intention of FATCA is that the details of U.S. investors holding assets outside the U.S. will be reported by financial institutions to the United States Internal Revenue Service (IRS), as a safeguard against U.S. tax evasion. As a result of FATCA, and to discourage non-U.S. financial institutions from staying outside this regime, financial institutions that do not enter and comply with the regime will be subject to a 30% withholding tax with respect to certain U.S. source income. Under the FATCA regime, this withholding tax applies to payments that constitute interest, dividends and other types of income from the US sources.

The AMC/Mutual Fund would be required to collect relevant information(s) from the investors towards FATCA / CRS compliance and report information on the holdings or investment to the relevant authorities as per the stipulated timelines. The information disclosed may include (but is not limited to) the identity of investors and their direct or indirect beneficiaries, beneficial owners and controlling persons

The FATCA requirements are effective from July 1, 2014. Investors can get more details on FATCA requirements at <http://www.irs.gov/Business/Corporations/Foreign-Account-Tax-Compliance-Act-FATCA>

Cash Investments in Mutual Funds:

Pursuant to para 16.7 of SEBI Master Circular dated June 27, 2024, in order to help enhance the reach of mutual fund products amongst small investors, who may not be tax payers and may not

have PAN/bank accounts, such as farmers, small traders/businessmen/workers, SEBI has permitted receipt of cash for purchases / additional purchases to the extent of Rs. 50,000/- per investor, per mutual fund, per financial year subject to:

Compliance with Prevention of Money Laundering Act, 2002 and Rules framed there under; the SEBI Circular(s) on Anti Money Laundering (AML) and other applicable AML rules regulations and guidelines

(ii) Sufficient systems and procedures in place. However, payment of redemption/IDCW proceeds, etc. with respect to aforementioned investments shall be paid only through the banking channel.

Currently, the AMC is not accepting cash investments. Appropriate notice shall be displayed on its website as well as at the Investor Service Centres, as and when the facility is made available to the investors.

REDEMPTIONS

As per SEBI Regulations, the Mutual Fund shall despatch redemption proceeds within 3 business days of receiving a valid redemption / repurchase request. For schemes investing atleast 80% of total assets in permissible overseas investments, redemption processed shall be dispatched within 5 working days of accepting the valid Redemption request. A penal interest of 15% p.a. or such other rate as may be prescribed by SEBI from time to time, will be paid by the AMC for the period of delay in case the redemption proceeds are not transferred within the specified timeline.

In case an investor has purchased units on more than one business day (either during the New Fund Offer Period or through subsequent purchases) the units purchased first (i.e. those units which have been held for the longest period of time), will be deemed to have been redeemed first i.e. on a first-in-first-out basis.

However, where Units under a Scheme are held under both Regular and Direct Plan and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number), failing which the request would be processed from the regular plan. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan.

The redemption would be permitted to the extent of clear credit balance in the Unit holder's account and the number of Units held by the Unit Holder in the folio will stand reduced by the number of Units redeemed. The Redemption request can be made by specifying the rupee amount or by specifying the number of Units to be redeemed. If a Redemption request is for both, a specified rupee amount and a specified number of Units, the specified number of Units will be considered the definitive request. If only the Redemption amount is specified by the Unit holder, the AMC will divide the Redemption amount so specified by the Redemption Price to arrive at the number of Units. The request for Redemption of Units could also be in fractions, upto three decimal places.

However, in case of units held in electronic (demat) mode, the redemption request can be given only in number of Units. Also Switch transactions are currently not available in case of units held in electronic (demat) mode. The minimum amount of Redemption may be changed in future by the AMC. If the balance in the account of the Unit holder does not cover the amount of Redemption request, then the Mutual Fund is authorised to close the account of the Unit holder and send the entire such (lesser) balance to the Unit holder. It may, however, be noted that in the event of death of the unitholder, the nominee / legal heir (as the case may be), subject to production of requisite documentary evidence, will be able to redeem the investment.

VIII. INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

1. INTRODUCTION

The Securities and Exchange Board of India (SEBI) has outlined investment valuation norms and accounting policies under SEBI (Mutual Funds) Regulations, 1996 (the Regulations) as amended from time to time. The Investment Valuation Norms are prescribed in the Eighth Schedule of the Regulations (regulation 47) and circulars issued by SEBI from time to time. Further, SEBI has amended Regulation 47 and the Eight Schedule vide a gazette notification no. LAD-NRO/GN/2011-12/38/4290 dated February 21, 2012 and has introduced overriding guiding principles in the form of "Principles of Fair Valuation".

The amended regulation requires that Mutual Funds shall follow principles of fair valuation to minimize the difference in valuation of mutual fund assets relative to market values and also to enable fair treatment across all classes of investors i.e. existing investors as well as investors seeking to subscribe or redeem units.

It further prescribes that the valuation of investments shall be based on the principles of fair valuation i.e. the valuation shall be reflective of the realizable value of securities/ assets. The valuation shall be done in good faith and in a true and fair manner through appropriate valuation policies and procedures as approved by the Board of AMC. The valuation policies and procedures approved by the Board of AMC

should seek to address conflict of interest.

The amendment also states that in case of any conflict between the principles of fair valuation and valuation guidelines as per Eighth Schedule and circulars issued by SEBI, the Principles of Fair Valuation shall prevail.

This Policy reflects the guiding principles to ensure fair valuation of all securities under the Schemes to comply with the amended Regulation 47 and the Eight Schedule relating to valuation of investments on February 21, 2012 and February 28, 2012. Further, in accordance with the para 6.1.3 of SEBI Master Circular, every AMC should formulate Valuation Committee to review investment valuation practices.

2. DISCLOSURE OF THE POLICY

The Valuation Policy approved by the AMC Board shall be disclosed in Statement of Additional Information (SAI), website of the AMC and other documents as prescribed by the Regulations and guidelines.

3. VALUATION METHODOLOGIES

- Investment in any new type of security shall be made only after establishment of the valuation methodology for such security with the approval of the Board of Directors of AMC.
- Valuation price of the security; arrived as per the policy; shall be applied consistently across the portfolios. In other words; any particular security shall be valued at same price across all the portfolios and it cannot have different prices for valuation on a particular day.
- In case there are multiple / dual credit ratings for the same company, the lowest among the same shall be considered for valuation purpose; provided the structures of the instruments under consideration are similar.
- Where it is observed that Valuation methodology mentioned below, does not lead to fair valuation of securities, Valuation Committee may on a prospective basis deviate from the defined methodology and adopt such alternate procedures / methods in conformance with the guiding principles of fair valuation in good faith to arrive at the true and fair estimation of the realizable value of the security. The rationale for any such deviations would be recorded in writing and placed before the Board of Directors of the AMC and the Trustee.

VALUATION METHODOLOGIES

Asset Class	Traded/ Non Traded/ Listed/	Valuation Methodology
Equity Shares, Normal Preference Shares and Cumulative Convertible Preference Shares	Traded	<p>Traded Securities are to be valued at the last quoted closing price on the primary Stock Exchange (NSE). If a security is not traded on NSE on a particular valuation day, the close price at which it is traded on BSE shall be considered.</p> <p>When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the selected stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than thirty days prior to valuation date.</p>

		The securities held under the portfolio of Index Scheme(s) and Exchange Traded Funds will be valued using the closing value of securities at the respective exchange that represents the underlying index of the scheme(s).
	Thinly traded/ Non-traded	<p>Thinly traded equity shares are equity shares for which the value of the trades of that security in a month is less than Rs. 5 lacs by value and the total volume of the trades in that security is less than 50,000 shares. In order to determine whether a security is thinly traded, the volumes traded in NSE and BSE shall be considered.</p> <p>Non Traded: If the equity securities are not traded on NSE and BSE for a period of thirty days prior to the valuation date, the scrip must be treated as 'non-traded' scrip.</p> <p>If the security is not traded either on NSE and BSE, the earliest previous day's close price shall be used, provided such day is not more than thirty days prior to the valuation date.</p> <p>Thinly traded/ Non-traded securities shall be valued "in good faith" by the AMC on the basis of the valuation principles laid down below:</p> <p>Based on the latest available Balance Sheet, net worth shall be calculated as follows:</p> <p>a) Net Worth per share = [Share Capital+ Reserves (excluding Revaluation Reserves) – Misc. expenditure and Debit Balance in P&L A/c] Divided by Number of Paid up Shares.</p> <p>b) Average capitalization rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.</p> <p>c) Management to evaluate impact on valuation of thinly traded/non traded equity investments if there are qualification in the auditor's report</p> <p>d) The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for ill-liquidity so as to arrive at the fair value per share.</p> <p>e) In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning.</p> <p>f) In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.</p> <p>g) In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme , it should be valued by the procedure above and the proportion which it bears to the total net</p>

1 Waterfall approach for valuation of money market and debt securities

SEBI, vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, has laid down the broad principles for considering traded yields for the purpose of valuation of money market and debt securities. The said circular prescribe AMFI to ensure valuation agencies have a documented waterfall approach for valuation of Debt and Money Market securities.

As prescribed by AMFI in guidelines issued in circular no 83/2019-20 on November 18, 2019, the following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- 1) Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN;
- 2) VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below);
- 3) VWAY of secondary trades of same issuer, similar maturity;
- 4) VWAY of primary issuances through fixed price auction of same issuer, similar maturity;
- 5) VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below);
- 6) VWAY of secondary trades of similar issuer, similar maturity;
- 7) VWAY of primary issuance through fixed price auction of similar issuer, similar maturity;
- 8) Construction of matrix (polling may also be used for matrix construction);
- 9) In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer which were not

reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months. Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAP of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered as exceptional events:

- i. Monetary/Credit Policy
- ii. Union Budget
- iii. Government Borrowing/ Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below:

Residual Tenure of Bond to be priced	Criteria for similar maturity
Upto 1 month	Calendar Weekly Bucket
Greater than 1 month to 3 months	Calendar Fortnightly Bucket
Greater than 3 months to 1 year	Calendar Monthly Bucket
Greater than 1 year to 3 years	Calendar Quarterly Bucket
Greater than 3 years	Calendar Half Yearly or Greater Bucket

In addition to the above:

- a. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

- b. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- c. The changes/deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer do not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- i. Issuers within same sector/industry and/or
- ii. Issuers within same rating band and/or
- iii. Issuers with same parent/ within same group and/or
- iv. Issuers with debt securities having same guarantors and/or
- v. Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

Recognition of trades and outlier criteria

- i. Volume criteria for recognition of trades (marketable lot)

Paragraph 1.1.1.1(a) of SEBI vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, prescribes that the marketable lots shall be defined by AMFI, in consultation with SEBI. In this regard, marketable lot is defined as under. The following volume criteria shall be used for recognition of trades by valuation agencies.

Parameter	Minimum Volume Criteria for marketable lot
Primary	INR 25 cr for both Bonds/NCD/CP/ CD and other money market instruments
Secondary	INR 25 cr for CP/ CD, T-Bills and other money market instruments
Secondary	INR 5 Cr for Bonds/NCD/ G-secs

Trades not meeting the minimum volume criteria i.e. the marketable lot criteria as stated above shall be ignored.

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semiliquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.

b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.

c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.

d. The following criteria shall be used by valuation agencies in determining Outlier Trades

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Up to 15 days	15-30 days	Greater than 30 days
Liquid	30 bps	20 bps	10 bps
Semi-Liquid	45 bps	35 bps	25 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below.

Liquidity classification criteria - Liquid, semi-Liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- Trading Volume
- Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid → $\geq 50\%$ of trade days
- Semi liquid → $\geq 10\%$ to 50% trade days
- Illiquid → $< 10\%$ of the trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; $> 15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; $> 25-50$ bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over A1+/AAA CD Bank matrix). The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

Process for construction of spread matrix

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	<p>Segmentation of corporates:</p> <p>The entire corporate sector is first categorized across following four sectors i.e. all the corporates will be catalogued under one of the below mentioned bucket:</p> <ol style="list-style-type: none"> 1. Public Sector Undertakings/ Financial Institutions/Banks; 2. Non-Banking Finance Companies -except Housing Finance Companies; 3. Housing Finance Companies; 4. Other Corporates
Step 2	<p>Representative issuers –</p> <p>For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating (i.e. "AAA" or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector.</p> <p>It may not be possible to find representative issuers in the lower rated segments, however in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.</p>
Step 3	<p>Calculation of benchmark curve and calculation of spread</p> <ol style="list-style-type: none"> 1. Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2. Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3. In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4. Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5. Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given
Step 4	<ol style="list-style-type: none"> 1. The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2. In case of rating downgrade/credit event/change in illiquidity or any other material event in Representative Issuers, new Representative Issuers will be identified. Also, in case there are two credit ratings, the lower rating to be considered. 3. Residential tenure of the securities of representative issuers shall be used for construction of yield curve.

Part B : Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SDL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quote, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

2 Abnormal situations and market disruptions

Following types of events could be classified as abnormal situations where current market information may not be available / sufficient for valuation of securities. Given the exceptional nature of the following events and the lack of clarity on how it would impact the markets, it may not be possible to define a standard methodology to be adopted for fair valuation of securities for such events.

- Major policy announcements by the Central Bank, the Government or the Regulator;
- Natural disasters or public disturbances that force the markets to close unexpectedly or functions abnormally;
- Significant volatility in the capital markets;
- Closure of the stock exchange where a particular security is listed;
- Events which lead to lack of availability of accurate or sufficient information to value the securities.
- Significant illiquidity in fixed income markets.
- Events like sovereign bankruptcy, disruptive political scenarios that may impact the markets.
- Valuation Agencies do not provide valuation for particular security

The above list is illustrative and not exhaustive.

Valuation Committee shall be responsible for monitoring exceptional events and recommending appropriate valuation methods. Necessary guidance may be sought from the Boards of AMC and Trustee.

3 Deviations from valuation guidelines

- In case the AMC decides to deviate from the valuation price given by the valuation agencies, the detailed rationale for each instance of deviation shall be recorded by the AMC.
- The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued vis-a-vis the price as per the valuation agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustee.
- The rationale for deviation along with details as mentioned above shall be disclosed immediately and prominently, under a separate head on the website of the AMC.
- Further, while disclosing the total number of instances of deviation in the monthly and half-yearly portfolio statements, the AMC will also provide the exact link to its website for accessing information mentioned above.

4 Valuation of Segregated Portfolio

Based the decision to segregate the debt and money market instrument in accordance with SEBI circular dated December 28, 2018, the valuation should consider the credit event and value the portfolio based on the principles of fair valuation in terms of relevant provisions of SEBI (Mutual Funds) Regulation, 1996 and circular(s) issued thereafter. In case of AT-1 Bonds and Tier 2 Bonds, the financial stress of the issuer and the capabilities of issuer to repay the dues are considered in the valuation of securities from the trigger date onwards i.e date on which the instruments is to be written off or converted to equity pursuant to any proposal or otherwise.

Irrespective of the above policy, the valuation committee might adopt valuation principles to align with fair valuation norms.

COMPUTATION OF NAV

A. Policy of computation of NAV

The Net Asset Value (NAV) per Unit of the options of the Plan(s) under the Scheme will be computed by dividing the net assets of the options of the Plan(s) under the Scheme by the number of Units outstanding under the options of the Plan(s) under the Scheme on the valuation date. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail.

The NAV of the units under each options of the Plan(s) under the Scheme shall be calculated as shown below:

$$\begin{array}{l} \text{NAV} \\ \text{per} \\ \text{Unit} \\ \text{(Rs.)} \end{array} = \frac{\text{Market or Fair Value of the Plan's Investments + Current Assets - Current Liabilities and Provisions}}{\text{No. of Units outstanding under each option of the Plan(s) under the Scheme}}$$

Separate NAVs will be calculated and announced for each of the Plan(s) & option(s) under the scheme. The NAVs will be rounded off up to 4 decimal places for the Scheme. The units will be allotted up to 3 decimal places.

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Pursuant to Regulation 49 (3) the repurchase Price of the units of an open ended scheme will not be lower than 95% of the NAV. Any imposition or enhancement of Load in future shall be applicable on prospective investments only

B. Policy for computation of NAV in foreign securities

Incase of scheme investing in overseas funds, the valuation of the investment in the Units of the Underlying Fund will be based on the NAV of the Underlying Fund on the date of the valuation converted into Indian Rupees.

Incase of Baroda BNP Paribas Aqua Fund of Fund, as this Scheme invests predominantly in BNP Paribas Funds Aqua (Lux) (Underlying Fund), the NAV of the scheme will be based on the NAV of the Underlying Fund. Since the NAV of the Underlying Fund would normally be declared on the next business day, the scheme will declare the NAV of the day on the next Business Day, based on the NAV of the Underlying Fund.

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Valuation of Foreign Exchange Conversion:

On the valuation day, all the assets and liabilities in foreign currency will be valued in Indian Rupees on the basis of Foreign Exchange rate which will be the RBI Reference rate as at the close of the Banking hours on that day in India. In case the RBI reference rate is not available, Foreign Exchange rate quoted on Bloomberg/Reuters around India markets close time (which is currently around 3:30 p.m. IST) shall be considered. The Trustees/AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing. The Rupee value of Investments valued in the manner described above and other assets and liabilities represented in foreign currency shall be obtained by multiplying the aforesaid rate.

C. Procedure in case of delay in disclosure of NAV

The AMC shall declare the Net Asset Value (NAV) of the scheme on every Business Day on AMFI's website (www.amfiindia.com) by 11.00 p.m. (10 am on next business day in case of Fund of Fund scheme) and also on its website (www.barodabnp-paribas-mf.in). The NAV shall be calculated for all Business Days. In case of any delay, the reasons for such delay would also be explained to AMFI & SEBI in writing and the number of such instances would also be reported to SEBI on a quarterly basis. If the NAVs are not available before the commencement of business hours of the following day due to any reason, the AMC/Mutual Fund shall issue a press release providing reasons and explaining when the AMC/Mutual Fund would be able to publish the NAVs. The NAV shall also be made available to Unit Holders through SMS upon receiving a specific request in this regard on its website.

In case of debt schemes with investment in Corporate Debt Market Development (CDMDF), in the event the NAV of CDMDF units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

C. GENERAL INFORMATION

1. SECURITIES LENDING BY THE MUTUAL FUND

Subject to the para 12.11 of SEBI Master circular and SEBI Regulations as applicable from time to time, the Scheme may, subject to the approval of the Trustee, engage in Securities Lending. Securities lending means the lending of Securities to another person or entity for a fixed period of time, at a negotiated compensation in order to enhance returns of the portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period.

The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The Scheme may not be able to sell such lent securities and this can lead to temporary illiquidity.

The Scheme, under normal circumstances, shall have exposure in Securities Lending as mentioned in respective schemes. The Scheme will also not lend more than 5% of its net assets to any one intermediary to whom securities will be lent. The AMC shall report to the Trustee on a quarterly basis as to the level of lending in terms of value, volume and the names of the intermediaries and the earnings / losses arising out of the transactions, the value of collateral security offered etc.

2. UNDERWRITING BY THE MUTUAL FUND

Subject to the SEBI Regulations, the Scheme may enter into underwriting agreements after the Mutual Fund obtains necessary registration in terms of the Securities and Exchange Board of India (Underwriters) Rules and Securities and Exchange Board of India (Underwriters) Regulations, 1993 authorizing it to carry on activities as underwriters. The capital adequacy norms for the purpose of underwriting shall be the net assets of the Scheme and the underwriting obligation of the Scheme shall not at any time exceed the total net asset value of the Scheme. For the purpose of the SEBI Regulations, the underwriting obligation will be deemed as if investments are made in such securities.

3. BORROWING BY THE MUTUAL FUND

Under the SEBI Regulations, the Mutual Fund is allowed to borrow to meet the temporary liquidity requirements of its Scheme for the purpose of repurchase or redemption of Units or the payment of interest or IDCW (dividend) to the Unit holders. Further, as per the SEBI Regulations, the Mutual Fund shall not borrow more than 20% of the Net Assets of the Scheme and the duration of such borrowing shall not exceed a period of six months.

The Mutual Fund may, subject to the approval of the Trustee, raise such borrowings from the Sponsor or its group companies, subsidiaries, associates, affiliates, etc., or Banks in India or any other entity at market related rates prevailing at the time and applicable to similar borrowings. The security for such borrowings, if required, will be as determined by the Trustee. Such borrowings, if raised, may result in a cost, which would be dealt with in consultation with the Trustee.

16. ACCOUNTING POLICIES & STANDARDS

In accordance with Regulation 50 read with the Ninth Schedule to the SEBI Regulations, the Scheme shall follow the accounting policies and standards stated below:

- a. For the purposes of the financial statements, mutual funds shall mark all investments to market and carry investments in the balance sheet at market value. However, since the unrealised gain arising out of appreciation on investments cannot be distributed, provision has to be made for exclusion of this item when arriving at distributable income.
- b. Dividend income earned by a scheme should be recognised, not on the date the dividend is declared, but on the date the share is quoted on an ex-dividend basis. For investments which are not quoted on the stock exchange, dividend income must be recognised on the date of declaration.
- c. In respect of all interest-bearing investments, income must be accrued on a day to day basis as it is earned. Therefore, when such investments are purchased, interest paid for the period from the last

interest due date upto the date of purchase must not be treated as a cost of purchase but must be debited to Interest Recoverable Account. Similarly, interest received at the time of sale for the period from the last interest due date upto the date of sale must not be treated as an addition to sale value but must be credited to Interest Recoverable Account.

- d. In determining the holding cost of investments and the gains or loss on sale of investments, the "average cost" method must be followed.
- e. Transactions for purchase or sale of investments should be recognised as of the trade date and not as of the settlement date, so that the effect of all investments traded during a financial year are recorded and reflected in the financial statements for that year. Where investment transactions take place outside the stock market, for example, acquisitions through private placement or purchases or sales through private treaty, the transaction should be recorded in the event of a purchase, as of the date on which the scheme obtains an enforceable obligation to pay the price or, in the event of a sale, when the scheme obtains an enforceable right to collect the proceeds of sale or an enforceable obligation to deliver the instruments sold.
- f. Bonus shares to which the scheme becomes entitled should be recognised only when the original shares on which the bonus entitlement accrues are traded on the stock exchange on an ex-bonus basis. Similarly, rights entitlements should be recognised only when the original shares on which the right entitlement accrues are traded on the stock exchange on an ex-rights basis.
- g. Where income receivable on investments has accrued but has not been received for the period specified in the guidelines issued by the Board, provision shall be made by debiting to the revenue account the income so accrued in the manner specified by guidelines issued by the Board.
- h. When in the case of an open-ended scheme units are sold, the difference between the sale price and the face value of the unit, if positive, should be credited to reserves and if negative be debited to reserves, the face value being credited to Capital Account. Similarly, when in respect of such a scheme, units are repurchased, the difference between the purchase price and face value of the unit, if positive should be debited to reserves and, if negative, should be credited to reserves, the face value being debited to the capital account.
- i. In the case of an open-ended scheme, when units are sold and appropriate part of the sale proceeds should be credited to an Equalisation Account and when units are repurchased an appropriate amount should be debited to Equalisation Account. The net balance on this account should be credited or debited to the Revenue Account. The balance on the Equalisation Account debited or credited to the Revenue Account should not decrease or increase the net income of the fund but is only an adjustment to the distributable surplus. It should, therefore, be reflected in the Revenue Account only after the net income of the fund is determined.
- j. The cost of investments acquired or purchased should include brokerage, stamp charges and any charge customarily included in the broker's brought note. In respect of privately placed debt instruments any front-end discount offered should be reduced from the cost of the investment.
- k. Underwriting commission should be recognised as revenue only when there is no devolvement on the scheme. Where there is devolvement on the scheme, the full underwriting commission received and not merely the portion applicable to the devolvement should be reduced from the cost of the investment.
- l. In case of real estate mutual fund scheme, investments in unlisted equity shares shall be valued as per the norms specified in this regard.

The accounting policies and standards outlined above are as per the existing SEBI Regulations and are subject to changes to be in compliance to reflect the changes in the SEBI Regulations. 22. DEMATERIALISATION AND REMATERIALISATION PROCEDURES

Dematerialization of units

Pursuant to para 14.4.2 of SEBI Master Circular dated June 27, 2024; the unit holders of the Scheme shall be provided an option to hold units in demat form in addition to physical form. The following shall be applicable:

1. The unit holder opting to hold units in demat form must provide their demat account details in the specified section of the application form. Such unit holder should have a beneficiary account with the depository participant (DP) (registered with NSDL / CDSL) and shall be required to indicate in the application form the name of the DP, DP ID Number and the beneficiary account number. The unit holder must mandatorily provide latest client investor master or demat account statement along with the application form.
2. Units held in demat form are transferable (except for Equity Linked Savings Scheme) in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 1996 as may be amended from time to time. Transfer can be made only in favor of transferees who are capable of holding units and having a valid demat account.
3. In case, the unit holder desires to hold the units in a demat/rematerialized form at a later date, the request for conversion of units held in non-demat form into Demat (electronic) form or vice-versa should be submitted alongwith a demat/remat request form to the DP directly and not to the AMC or the Registrar and Transfer Agent (RTA) of the Fund. The AMC shall then issue units in the desired form within two working days of the receipt of valid documents from the respective DP. The credit of the converted units shall be reflected in the transaction statement provided by the DP to its client. Similarly, request for redemption or any other non – financial request shall be submitted directly to the DP and not to the AMC/ RTA of the Fund.
4. For the units held in demat form investors will receive an account statement from their respective DPs and not from AMC / RTA of the Fund.
5. Units will be credited in the demat account only based on fund realization.
6. The facility of availing the units in demat / remat form is available subject to such processes, operating guidelines and terms & conditions as may be prescribed by the DPs and the depositories from time to time.
7. Presently, the option to hold units in demat form shall not be available for systematic transactions like Systematic Transfer Plan (STP), Systematic Withdrawal Plan (SWP) etc. Such investors shall be mandatorily allotted units in physical form.

Pursuant to para 14.4.2 of SEBI Master Circular dated June 27, 2024 and AMFI communication no. 35P/MEM-COR/35/11-12 dated December 23, 2011 an option to hold units in demat form shall be available for SIP transactions. However, the units will be allotted based on the applicable NAV as per the SID and will be credited to investors demat account on weekly basis upon realization of funds. For e.g. units will be credited to investors demat account every Monday (or immediate next business day in case Monday happens to be a non-business day) for realization status received in last week from Monday to Friday. If an investor has opted to hold units in demat form for SIP

transactions, he will be able to redeem / transfer only those units which are credited to his demat account till the date of submission of redemption / transfer request. Accordingly, redemption / transfer request shall be liable to be rejected in case of non - availability of sufficient units in the investor's demat account as on date of submission of redemption / transfer request.

Converting the units held in Demat mode to Remat mode:

- a) Investor needs to submit the Conversion Request Form (CRF) for conversion of units from demat mode to remat (SOA/physical) mode.
- b) Investor needs to attach demat account statement along with form as a proof of holding units in the demat form.
- c) After verification, DP will process & register the request in their system. An electronic number gets generated and then DP forwards the request to the AMC/RTA.
- d) AMC/RTA conduct their own due diligence and on completion of that they report the request and confirm conversion of units into physical mode.

E. INFORMATION PERTAINING TO INVESTMENTS BY THE SCHEMES OF THE FUND

1. Derivative strategies

Trading In Derivatives

The Scheme intend to use derivatives for the purposes, which may be permitted by SEBI Mutual Fund Regulations from time to time, which will include hedging & portfolio balancing. Hedging does not mean maximisation of returns but only reduction of systematic or market risk inherent in the investment. Pursuant to para 7.6 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, specified the guidelines pertaining to trading by Mutual Fund in Exchange Traded Derivatives. Accordingly, the scheme may use derivative instruments viz. Interest Rate Swaps, Forward Rate Agreements, Options or such other derivative instruments as may be introduced from time to time as permitted under the SEBI Regulations and guidelines for hedging and portfolio rebalancing.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the scheme and the benefits and risks attached therewith.

Interest Rate Swaps (IRS) and Forward Rate Agreements (FRA)

Why invest in IRS & FRA:

Bond markets in India are not very liquid. Investors run the risk of illiquidity in such markets. Investing for short-term periods for liquidity purposes has its own risks. Investors can benefit if the Fund remains in call market for the liquidity and at the same time take advantage of fixed rate by entering into a swap. It adds certainty to the returns without sacrificing liquidity.

IRS

All swaps are financial contracts, which involve exchange (swap) of a set of payments owned by one party for another set of payments owned by another party, usually through an intermediary (market maker). An IRS can be defined as a contract between two parties (counter parties) to exchange, on particular dates in the future, one series of cash flows, (fixed interest) for another series of cashflows (variable or floating interest) in the same currency and on the same principal for an agreed period of time. The exchange of cashflows need not occur on the same date.

Risk: The risk in relation to associated counter parties of the respective contracts.

FRA

A FRA is an agreement between two counter parties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date, based on a notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period. The special feature of FRA is that the only payment is the difference between the FRA rate and the reference rate and hence is single settlement contracts. As in the case of IRS, notional amounts are not exchanged. However, there is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party to comply with the terms of the contract. To the extent that settlements of contracts are not guaranteed by an exchange or clearing corporation, hence, there is the risk of counterparty to a deal defaulting in payment.

Risk: The risk in relation to associated counter parties of the respective contracts.

Illustrations

Basic Structure of a Swap

Assume that the scheme has a Rs.20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 12%) and pays the "benchmark rate" (MIBOR), which is fixed by the National Stock Exchange of India Limited (NSE) or any other agency such as Reuters. This swap would effectively lock-in the rate of 12% for the next 6 months, eliminating the daily interest rate risk. This usually is routed through an intermediary who runs a book and matches deals between various counterparties.

The steps will be as follows -

Assuming the swap is for Rs. 20 crore June 1, 2020 to December 1, 2020. The Scheme is a fixed rate receiver at 12% and the counterparty is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).

On June 1, 2020, the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (ISDA).

On a daily basis, the benchmark rate fixed by NSE will be tracked by them.

On December 1, 2020, they will calculate the following -

The Scheme is entitled to receive interest on Rs. 20 crore at 12% for 184 days i.e. Rs.1.21 crore, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.

The counterparty is entitled to receive daily compounded call rate for 184 days and pay 12% fixed.

On December 1, 2020, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 1.21 crore, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.

Effectively the Scheme earns interest at the rate of 12% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 12% p.a. for 6 months on Rs. 20 crore, without borrowing for 6 months fixed.

The above example illustrates the benefits and risks of using derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Numerical example explaining Imperfect Hedging with investments in IRFs:

Perfect hedging:

Date: 18th January 2020

Spot price of Govt. security (6.79% 2027) = Rs. 95.55

Price of IRF - January Contract (expiry on 25-Jan-2020) = Rs. 95.57

On 18-Jan-2020, the fund holds 1000 units of the government security from the spot market at Rs. 95.55. Subsequently, it is anticipated that yields may rise in the near future. Thus, to hedge the underlying position taken, the fund sells January 2020 IRF. The price at the Futures contract is Rs. 95.57.

On 23-Jan-2020, assuming due to increase in yields:

Spot price of the security (6.79% 2027) = Rs. 95.10

Price of IRF - January Contract (expiry on 25-Jan-2020) = Rs. 95.07

Thus, due to hedging the portfolio:

Loss in the underlying security: $(Rs. 95.10 - Rs. 95.55) * 1000 = (Rs. 450)$

Profit in the futures market: $(Rs. 95.57 - Rs. 95.07) * 1000 = Rs. 500$.

Imperfect hedging:

D = The duration of the portfolio (measure of the interest rate sensitivity of the portfolio) = 7

P = Portfolio's market value = Rs. 100

Y = underlying interest rate or portfolio yield = 8.00%

Change in market value of portfolio = $P * D * \text{Change in } Y$

The portfolio can be a mix of:

- 1) Corporate Bonds and Government securities
- 2) Only Corporate Bonds (i.e. no Government securities)

Subsequently, if it is anticipated that yields may rise in the future, the fund manager can hedge the underlying duration risk in the IRF by selling the futures contract.

Spot price of the security (6.79% 2027) = Rs. 95.10

Futures price of the contract = Rs. 95.07

Duration of the underlying security of the futures contract = 6

% of the portfolio hedged in this strategy = 10%

Thus, due to hedging the portfolio: In case the interest rates rise by 50 bps point, then ;

Change in the market value of the portfolio = $100 * 7 * (0.50\%) = (Rs. 3.50)$

Duration risk managed due to hedge in IRF = % of portfolio hedged * portfolio's market value * duration of the underlying security * Change in the interest rates
= $10\% * 100 * 6 * (0.50) = Rs. 0.30$

Thus, net change in the market value of the portfolio = $Rs. 100 - Rs. 3.50 + Rs. 0.30 = Rs. 96.80$

Equity Derivatives

The Scheme(s) may use various equity derivatives from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest. Accordingly, the Scheme(s) may use derivative instruments like futures & options stock indices, future & options on individual securities or such other derivative instruments as may be introduced from time to time as permitted under the SEBI (Mutual Funds) Regulations, 1996.

The following information provides a basic idea as to the nature of the derivative instruments proposed to be used by the Scheme(s) and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

Index Futures

Benefits

Investment in stock index futures can give exposure to the index without directly buying the individual stocks. Appreciation in index stocks can be effectively captured through investment in Stock Index Futures. The Fund can sell futures to hedge against market movements effectively without actually selling the stocks it holds. The stock index futures are instruments designed to give exposure to the equity market indices. The Bombay Stock Exchange and the National Stock Exchange trade in index futures of 1, 2 and 3-month maturities. The pricing of an index future is the function of the underlying index and interest rates.

Illustration

Spot Index: 1790

1 month Nifty Future Price on day 1: 1800. Fund buys 100 lots. Each lot has a nominal value equivalent to 200 Units of the underlying index.

Situation 1:

Let us say that on the date of settlement, the future price = closing spot price = 1810

Profits for the Fund = $(1810 - 1800) * 100 \text{ lots} * 200 = \text{Rs. } 200,000$

Situation 2

Let us say that on the date of settlement, the future price = Closing spot price = 1795

Loss for the Fund = $(1795 - 1800) * 100 \text{ lots} * 200 = (\text{Rs. } 100,000)$

The net impact for the Fund will be in terms of the difference between the closing price of the index and cost price (ignoring margins for the sake of simplicity). Thus, it is clear from the example that the profit or loss for the Fund will be the difference of the closing price (which can be higher or lower than the purchase price) and the purchase price.

Risk:

The risks associated with index futures are similar to the one with equity investments. Additional risks could be on account of illiquidity and hence mispricing of the future at the time of purchase.

The strategy of taking a long position in index futures increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.

The long position will have as much loss / gain as in the underlying index. e.g. if the index appreciates by 10%, the index future value rises by 10%. However, this is true only for futures contracts held till maturity. In the event that a futures contract is closed out before its expiry, the quoted price of the futures contract may be different from the gain/ loss due to the movement of the underlying index. This is called the basis risk.

While futures markets are typically more liquid than the underlying cash market, there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific futures contract.

Buying Options

Benefits of buying a call option

Buying a call option on a stock or index gives the owner the right, but not the obligation, to buy the underlying stock / index at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

If the Fund buys a 1 month call option on Reliance at a strike price of Rs. 500, the current market price being say Rs.505. The Fund will have to pay a premium of say Rs. 25 to buy this call. If the stock price goes below Rs. 500 during the tenure of the call, the Fund avoids the loss it would have incurred had it straightaway bought the stock instead of the call option. The Fund gives up the premium of Rs. 25 that has to be paid in order to protect the Fund from this probable downside. If the stock goes above Rs. 500, it can exercise its right and own Reliance at a cost price of Rs. 500, thereby participating in the upside of the stock.

Risk:

The strategy of taking a long position in index call option increases the exposure to the market. The long position is positively correlated with the market. However, there is no assurance that the stocks in the portfolio and the index behave in the same manner and thus this strategy may not provide gains perfectly aligned to the movement in the index.

The risk/downside, if the market falls/remains flat is only limited to the option premium paid.

While option markets are typically less liquid than the underlying cash market, hence there can be no assurance that ready liquidity would exist at all points in time, for the Scheme to purchase or close out a specific contract.

Benefits of buying a put option

Buying a put option on a stock originally held by the buyer gives him / her right, but not the obligation, to sell the underlying stock at the designated strike price. Here the downside risks are limited to the premium paid to purchase the option.

Illustration

If the Fund owns Reliance and also buys a three-month put option on Reliance at a strike of Rs. 500, the current market price being say Rs. 505. The Fund will have to pay a premium of say Rs. 35 to buy this put. If the stock price goes below Rs. 500 during the tenure of the put, the Fund can still exercise the put and sell the stock at Rs. 500, avoiding therefore any downside on the stock below Rs. 500. The Fund gives up the fixed premium of Rs. 35 that has to be paid in order to protect the Fund from this probable downside. If the stock goes above Rs. 500, say to Rs. 515, it will not exercise its option. The Fund will participate in the upside of the stock, since it can now sell the stock at the prevailing market price of Rs. 515.

Risk:

There can be no assurance that ready liquidity would exist at all points in time, for the scheme to purchase or close out a specific options contract.

The hedging strategy using Put Options is a perfect hedge on the expiration date of the put option. On other days, there may be (temporary) imperfect correlation between the share price and the put option.

Some strategies that employ stock /index futures and their objectives

Arbitrage strategies

The arbitrage strategies the fund may adopt could be as under. The list is not exhaustive and the fund could use similar strategies and any other strategies as available in the markets that are permitted by regulator.

Index / Stock spot - Index / Stock Futures: The pricing of the futures is derived from underlying Nifty spot or the underlying stock. It is the cost of carry that binds the value of the futures to the underlying portfolio. When the two go out of sync, there are opportunities. The cost of carry binds the futures price to the price of the underlying asset. The price of the futures at any given instance should typically be more than the level of Nifty at that point. Theoretically, the fair value of the futures is equal to the price of the underlying plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk, in this case is the Clearing Corporation of the Exchange. Cash and carry trades at times provide higher than the prevailing interest rates. There is an opportunity to exploit by selling the overpriced futures and buying the underlying portfolio. It may also happen that the Index / Stock Future may be at a discount. In such cases, the Scheme may buy the future and sell the stock after borrowing the same.

The Scheme shall enter into a combination of the transactions simultaneously. If the Scheme has to unwind the positions prior to the expiry on account of redemptions or any other reason, the returns would depend on the spread between the spot and futures price at which the position is unwound. If the price differential between the spot and futures position of the subsequent month maturity is attractive near the expiry date, then the scheme may rollover the futures position and continue with the position in the spot market.

Rollover means unwinding the short position in the futures of the near month and simultaneously shorting the futures of the subsequent month. The Scheme shall endeavor to deploy its assets through transactions in the above pattern, which may involve Index Futures with Stock Futures or Futures of the same stock with different expiry months.

Cash Future Arbitrage: This strategy is employed when the price of the future is trading at a premium to the price of its underlying in spot market. The Scheme shall buy the stock in spot market and endeavor to simultaneously sell the future at a premium on a quantity neutral basis.

Buying the stock in spot market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts. The future contracts are settled based on the last half an hour's weighted average trade of the spot market. Thus there is a convergence between the spot price and the futures market on expiry. This convergence helps the Scheme to generate the arbitrage return locked in earlier.

On or before the date of expiry, if the price differential between the spot and futures position of the subsequent month maturity still remains attractive, the scheme may rollover the futures position and hold onto the position in the spot market. In case such an opportunity is not available, the scheme would liquidate the spot position and settle the futures position simultaneously. Rolling over of the futures transaction means unwinding the short position in the futures of the current month and simultaneously shorting futures of the subsequent month maturity, and holding onto the spot position.

Corporate Action / Event Driven Strategies:

Dividend Arbitrage: At the time of declaration of dividend, the stock futures / options market can provide a profitable opportunity. Generally, the stock prices decline by the dividend amount when the stock becomes ex-dividend.

Buy-Back/ Open offers Arbitrage: Companies that are targets for buy-backs/ open offers, provide opportunities depending on the difference between the traded price and the buy-back open offer price. The scheme will take a long position in a stock for which the buy-back/ open offer price is expected to be higher than the traded price. Depending on the probability of the open offer and acceptance of shares, the scheme may take a certain short position in the future of the same stock.

Merger Arbitrage: When the Company announces any merger, amalgamation, hive off, de-merger, etc, there could be opportunities due to price differential in the cash and the derivative market.

Delisting Arbitrage: When a company intends to delist from the stock exchanges, it goes for a Reverse Book Building process and offers an exit price to all existing shareholders. The scheme can take a long position in a stock in case the traded price is below the expected exit price.

Arbitrage

(1) Selling spot and buying future: In case the Scheme holds the stock of a company "A" at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too,

the Scheme will have a benefit of Rs 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

Note: The same strategy can be replicated with a basket of Nifty 50 stocks (Synthetic Nifty) and the Nifty future index

(2) Buying spot and selling future: Where the stock of a company "A" is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

Risk: On the date of expiry, when the arbitrage is to be unwound, it is not necessary for the stock price and its future contract to coincide. There could be a discrepancy in their prices even a minute before the market closes. Thus, there is a possibility that the arbitrage strategy gets unwound at different prices.

B. Buying/ Selling Stock future: When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the Scheme can square up the short position thereby earning a profit of Rs.10 vis a vis a fall in stock price of Rs 8.

Risk: There is risk of not being able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

(c) Hedging: The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Both index and stock futures and options may be used to hedge the stocks in the portfolio.

Risk: This may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

(d) Alpha Strategy: The Scheme will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying a bank stock and selling Bank Nifty future.

Risk: Execution of these strategies depends upon the ability of the fund manager to identify and execute based on such opportunities. These involve significant uncertainties and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

2. Swing Pricing

Pursuant to para 4.10 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, SEBI has prescribed swing pricing framework for open ended debt schemes (excluding overnight funds, Gilt funds and Gilt with 10-year maturity funds), effective from March 01, 2022.

Swing pricing refers to a process for adjusting a fund's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity. Swing pricing mechanism would help ensure fairness of treatment of entering, exiting and existing investors in the mutual fund schemes, particularly during market dislocation.

SEBI vide Para 4.10.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024,, prescribes that for the purpose of determining 'market dislocation', Association of Mutual Funds in India (AMFI) shall develop a set of guidelines/parameters/model for recommending the same to SEBI. SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto. Once market dislocation is declared, it will be notified by SEBI that swing pricing will be applicable for a specified period.

Accordingly, pursuant to Para 4.10.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, provisions for mandatory swing pricing during market dislocation (as and when notified by SEBI), are introduced for all the open ended debt schemes of the Fund (excluding Baroda BNP Paribas Overnight Fund and Baroda BNP Paribas Gilt Fund) as below:

(1) Applicable Schemes: Upon announcement of '**market dislocation**' by SEBI, investors are requested to note that, the mandatory swing pricing shall be applied for the Open ended Debt Schemes of the Fund which:

- (i) have **High or Very High risk on the risk-o-meter** (as of the most recent period at the time of declaration of market dislocation); and
- (ii) are classified in the cells **-A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix.**

(2) Minimum swing pricing factor: Pursuant to SEBI Master Circular, a minimum swing factor, as per below matrix, shall be made applicable and the NAV for the Applicable Schemes will be adjusted downwards for the incoming and outgoing investors:

Swing factor for Open ended Debt Schemes			
Credit Risk (Max)→ Interest Rate Risk (Max) ↓	Relatively Low: Class A (CRV>=12)	Moderate: Class B (CRV>=10)	Relatively High: Class C (CRV<10)
Relatively Low: Class I (MD<=1 year)	--	--	1.5%
Moderate: Class II (MD<=3 year)	--	1.25%	1.75%
Relatively High: Class III (Any MD)	1%	1.5%	2%

MD=Macaulay Duration, CRV=Credit Risk Value.

(3) Illustration: Consider a scheme having an unswung NAV of Rs. 100 and swing factor of 1%, the NAV is to be applied upon notification of market dislocation by SEBI. The Swing NAV for the scheme shall be adjusted downwards as below:

Swing NAV = unswung NAV * (1-swing factor)

$$= \text{Rs. } 100 * (1-0.01)$$

$$= \text{Rs. } 100 * (0.99)$$

$$= \text{Rs. } 99$$

Further pursuant to AMFI Best Practices Guidelines Circular No.135/ BP / 96B / 2024-25 dated November 4, 2024 ('AMFI circular') read with Clause 4.10 of SEBI Master Circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 on 'Mandatory Swing pricing framework for mutual fund schemes' in case of Re-opening of the scheme after announcement of winding up' shall be as follows:

- 1.. There may be instances where the AMC, after making an announcement to wind up a scheme, decides to roll-back the decision to wind up the scheme. Such situations may trigger large scale redemptions. Thus, in such circumstances, as required by and in terms of aforesaid AMFI circular as amended from time to time, the AMC shall mandatorily invoke swing pricing upon re-opening any of the Applicable Schemes for subscriptions and redemptions.
2. The swing period should be higher of swing period suggested by the Board of AMC or a minimum period of 7 working days (as per AMFI circular), upon reopening a scheme for subscriptions and redemptions.
3. The minimum swing factor applied would be higher of the swing factor suggested by the Board of AMC or as per following Swing factor prescribed during Normal Times in the AMFI circular:

Minimum Swing factor for eligible debt schemes			
Max Credit Risk of scheme → Max Interest Rate Risk of the scheme ↓	Class A (CRV* \geq 12)	Class B (CRV* \geq 10)	Class C (CRV* $<$ 10)
Class I: (Macaulay duration \leq 1 year)	A-I : 0.00%	B-I : 0.05%	C-I : 0.20%
Class II: (Macaulay duration \leq 3 years)	A-II : 0.05%	B-II : 0.10%	C-II : 0.40%
Class III: Any Macaulay duration	A-III : 0.10%	B-III : 0.20%	C-III : 0.60%
*CRV: Credit Risk Value			

Note: The above are floor swing amounts and AMC may set higher limits, depending on the dynamics of the concerned schemes both on liability side and on asset side.

(4) Impact for Investors: The swing pricing will be made applicable only for scenarios related to net outflows from the schemes. When swing pricing mechanism is triggered and swing factor is made applicable during market dislocation, both the incoming and outgoing investors shall get NAV adjusted for swing pricing. Swing pricing shall be made applicable to all unitholder at PAN level with an exemption for redemptions upto Rs. 2 lacs for each scheme.

(5) Periodic Disclosures: Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMC in prescribed format in the SIDs and in scheme wise Annual Reports and Abridged summary and prominently on the website in case of swing pricing has been made applicable for the mutual fund scheme.

(6) Computation of scheme performance: The scheme performance shall be computed based on unswung NAV.

3. Provisions on creation of Segregated portfolio/Side pocketing

SEBI has, vide para 4.4 of SEBI Master circular SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, permitted creation of segregated portfolio of debt and money market instruments by mutual funds schemes, in order to ensure fair treatment to all investors in case of a credit event and to deal with liquidity risk.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event.

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a) Downgrade of a debt or money market instrument to 'below investment grade', or
 - b) Subsequent downgrades of the said instruments from 'below investment grade', or
 - c) Similar such downgrades of a loan rating
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) Segregated portfolio of unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount.
- 4) Creation of segregated portfolio is optional and is at the discretion of the AMC.

The AMC shall inform AMFI immediately about the actual default by the issuer. Upon being informed about the default, AMFI shall immediately inform the same to all AMCs. Pursuant to dissemination of information by AMFI about actual default by the issuer, the AMC may segregate the portfolio of such instrument.

Process for Creation of Segregated Portfolio:

- 1) On the date of credit event or actual default, AMC should decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it would:
 - a) seek approval of the Trustees prior to creation of the segregated portfolio.
 - b) immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. Mutual Fund will also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC (www.barodabnpparibasmf.in).
 - c) ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event or actual default, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a) Segregated portfolio will be effective from the day of credit event or actual default.
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d) The NAV of both segregated portfolio and main portfolio will be disclosed from the day of the credit event or actual default.
 - e) All existing investors in the scheme as on the day of the credit event or actual default will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.
 - g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
 - h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- 3) If the Trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.

In case Trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Processing of Subscription and Redemption Proceeds:

Notwithstanding the decision to segregate the debt and money market instrument, the valuation process shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI MF Regulations, 1996 and circular(s) issued thereunder.

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as per the existing SEBI guidelines/circular on applicability of NAV as under:

- 1) Upon Trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- 2) In case Trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Disclosure:

In order to enable the existing as well as the prospective investors to take informed decision, the following, as mandated by SEBI under para 4.4.7, SEBI Master circular no. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 shall be adhered to:

- 1) A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event or actual default shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- 2) Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the scheme.
- 3) The NAV of the segregated portfolio shall be declared on daily basis.
- 4) The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- 5) The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event or actual default and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- 6) The disclosures at point (4) and (5) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- 7) The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees:

In order to ensure timely recovery of investments of the segregated portfolio, the Trustee shall ensure that:

- The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every Trustee meeting till the investments are fully recovered/ written-off.

- The Trustee shall monitor the compliance of the same as per the SEBI Master circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, Trustees will put in place a mechanism to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs) etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of AMC, including claw back of such amount to the segregated portfolio of the scheme.

Total Expense Ratio (TER) for the Segregated Portfolio:

- 1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Based on the para 16.6 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, to comply with the requirements of RTA inter-operable Platform for enhancing investors' experience in Mutual Fund transactions / service requests, the Qualified RTAs (QRTA's), Kfin Technologies Limited (Kfintech) and Computer Age Management Services Limited (CAMS) have jointly developed MFCentral - A digital platform for Mutual Fund investors.

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / phygital services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the MFCentral platform. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using link <https://mfcentral.com/> (or its app in future).

With a view to comply with all provisions of the aforesaid circular, AMC/the Fund designates MFCentral as its Official Points of Acceptance of Transactions (OPAT) w.e.f. September 23, 2021.

Any registered user of MFCentral, requiring submission of physical document as per the requirements of MFCentral, may do so at any of the designated Investor Service centres or collection centres of Kfintech or CAMS.

Further, all financial & non-financial transactions can also be submitted through MF Utilities India Private Limited (MFUI) either electronically or physically through the authorized Points of Service ('POS') of MFUI. The list of POS of MFUI is published on the website of MFUI at www.mfuindia.com and may be updated from time to time.

Investors / unitholders are advised to refer to the website i.e. www.barodabnpparibasmf.in for list of OPATs and the changes thereto. It may be noted that the list is subject to local authority's orders with respect to conducting operations in the official premises. For the convenience the investors/unitholders, AMC continues to accept transactions through the online mode and all the investors are encouraged to adopt online means for transacting. Further, the facility for execution of mutual fund transactions by submitting the same to the designated email address i.e. mumbai@barodabnpparibasmf.in continues to be remain available to the investors in terms of notice-cum-addendum no. 15/2010 dated March 30, 2020 till further notice.
