

BARODA BNP PARIBAS BALANCED ADVANTAGE FUND

GET BOTH
HEADS & **TAILS**
 BY YOUR SIDE.

A fund that dynamically adjusts your investments in equity or debt to manage market ups and downs.

Benefits of Balanced Advantage Fund

- Saves from timing the market
- Asset allocation based on the market trend
- Diversification with investment in equity and debt
- Equity taxation benefit

Market Outlook - Equity

The Year 2025 ended on a positive note, with the Nifty 50 Index achieving a milestone of ten years of positive returns. Nifty 50 Index registered gains of 10.5% for Calendar Year (CY 2025). For the full year Nifty Midcap 150 Index was up by 5.4% while Nifty Small Cap 250 Index was down by 6%. Mid caps and Small caps underperformed the large caps. Sector wise Metals was the best performing sector up by 27.4% for CY2025 followed by Auto's (+21.1%), Banks (+15.6%), while Realty and IT sector were down 17.3% and 14.9% respectively. FPI sell-off intensified during CY2025 to the tune of USD 17.9bn (USD 755mn sell-off in CY2024), domestic flows continued to remain strong, with Domestic Institutional Investors (DIIs) infusing USD 89.5bn into equities. For the month of December, FPI outflow was USD 1.7bn while DII inflow was USD 8.1bn.

CY2025 was a challenging year led by adverse geopolitical events. The start of CY2025 was impacted by news of President Trump imposing tariffs, increase in crude prices and weak corporate earnings. The news of India-Pakistan war, Iran-Israel war in the 2nd half of 2025 was negated by slew of positive news such as GST rate rationalization, RBI rate cut of 125bps and US Fed rate cut of 75bps. Consequently Nifty 50 rallied by ~18% from the bottom of April.

Locally, policy changes such as increase in slab rate for individual income tax and GST rationalization are witnessing early signs of pick-up in consumption. Domestic passenger vehicle volume grew by 27% YoY for the month of December 2025, while 2-wheeler retail domestic sales were up by 38% YoY during the same period. Commercial vehicle domestic sales volumes were up by 28% YoY in December 2025 and tractor domestic sales were up by 37% YoY.

Banking credit growth has improved to 11.2% vs average of 10% for the year and is set to further increase. In November, India's Industrial Production (IIP) registered a robust growth of 6.7%YoY, a sharp increase from 0.6% in October 2025, driven primarily by manufacturing sector and from basic metals, pharma and autos. GST net collection for financial year till date (April 25-November 25) stood at INR 12.79tn, up 7.3% YoY. CPI inflation in November inched up to 0.71% from 0.25% in October 2025 on account of increase in food prices.

Globally, the sentiments in 1HCY25 were marred by geo-political tensions and President Trump threatening to impose high tariffs. Barring some of the economies like India, China most of the countries have negotiated a lower tariff rate of 10-20%. Most markets have fared better than India and had an element of AI driving the outperformance. South Korean market was up by 75.6%, highest globally during CY25 primarily led by rally in AI and defence stocks. This was followed by Brazil (+34%), Hong Kong (+27.8%), Japan (+26.2%) and Taiwan (+25.7%). Amongst the developed economies, Germany was up 23% in CY2025 followed by UK (+21.5%), US S&P 500 (+17.3%), China (+18.4%) and US Dow Jones (13.7%).

On the currency front, INR has been the worst performing currency in CY25, down by 4.9%, followed by Indonesia (-3.2%), Philippines (-1.7%) while South Korea has appreciated by 1.8%, followed by Japan by 0.4%. While uncertainty on tariff and geo-political instability impacted the rupee, outflow by FPIs also led to depreciation in INR. For CY2025, FPIs withdrew most emerging markets. Amongst some of the Asian economies Taiwan saw outflow of USD 7.8bn, followed by Malaysia (USD-5.1bn), Vietnam (USD-4.8bn), South Korea (USD-4.5bn). Amongst Emerging Markets (EM), only Brazil saw inflows of USD 4.9bn during CY2025.

Although there are multiple headwinds globally, India continues to remain the fastest growing economy registering GDP growth of 8.2% during Q2FY26. With favourable policy announcements by the government, India's GDP is expected to remain healthy, with Fitch Ratings revising India's GDP forecast to 7.4% for FY26 up from 6.9% projected earlier.

Going ahead, revival in earning will be key to watch out for and crucial for FPIs to turn positive on India. Earnings growth improved during 2Q FY26 and it may grow in double digits during FY27 and FY28. With index underperforming emerging markets, FPI ownership at all time low and with some reversal of AI trades we can expect activity to pick up in Indian markets. Wish you all a Happy and Prosperous New Year. Happy investing!

Market Outlook - Fixed Income

Debt Market Commentary January-2026

As we progressed towards the end of 2025, global uncertainty though present but retreated from its elevated levels post US tariff shock. With countries closing negotiations and deals with the US, the impact of the tariffs becomes clearer. Although there are countries still behind the wagon to close any deal and are currently facing the brunt of the tariffs.

In the month of December, there was a clear divergence in the monetary policy of some central banks. While the US and the UK delivered a rate cut emphasising the soft labour market conditions, Japan increased its policy rate to a 30-year high as inflation remained above target. US Treasury yields declined amidst increasing rate cut expectations. Yields, thereafter, firmed up to a 16-year high in early December following hawkish comments from the Bank of Japan. Though yields moderated post the Fed policy in December, the fall was capped by uncertainty on Fed rate outlook for 2026.

Year	Meeting	Real GDP	Unemployment rate	PCE Inflation	Core PCE Inflation	Fed funds rate
2025	Dec-25	1.7	4.5	2.9	3.0	3.6
	Sep-25	1.6	4.5	3.0	3.1	3.6
2026	Dec-25	2.3	4.4	2.4	2.5	3.4
	Sep-25	1.8	4.4	2.6	2.6	3.4

	Sep-25	1.8	4.2	2.0		3.0

Source: FED FOMC SEP data as on 06.12.2025

Global commodity prices remained largely stable. Divergent movements were also observed across commodity markets, with a continued uptick in gold prices and a softening bias in crude oil prices. Copper prices too picked up sharply led by supply concerns.

Domestic Economy-

The Indian economy, supported by resilient domestic demand, grew by 8.2% y/y in Q2 FY26. High-frequency indicators suggest that overall economic activity held up in November-2025. The increase in e-way bill generation indicates a rise in goods movement and freight activity supported by the GST reforms. The increase in petroleum consumption was driven by a pick-up in construction and agricultural operations. Electricity demand declined for the second consecutive month due to the early onset of winter season.

Indicators of urban demand strengthened further, building up on the festival season pick-up. Retail passenger vehicle sales grew at their highest pace in over a year, aided by GST benefits, marriage season demand, and improved supply. Retail tractor sales growth, buoyed by positive rabi season prospects, reduction in GST rates and hike in minimum support prices of rabi crops, registered a significant pick-up. Other high frequency indicators of rural demand, namely, retail automobiles sales, however, witnessed a sharp deceleration in the post festive season coupled with adverse base effects

India's external sector exhibited resilience despite a challenging global environment. Current account deficit narrowed in Q2 FY26 with a moderation in merchandise trade deficit, robust services exports and resilient remittances. Capital flows, however, were tempered by persistent global uncertainties. Foreign exchange reserves remain sufficient to comfortably meet India's external financing requirements.

Domestic Economy-

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

- CPI inflation picked up tad bit at 0.7% in November-2025 v/s 0.25% YoY in October-2025. The marginal pick-up was due to less supportive base effect.

- Food and beverages inflation remained negative at -2.8%YoY in November v/s -3.7% in October. The deflation in food prices remains broad-based, spanning vegetables, pulses, and spices.

- Preliminary estimates for December CPI inflation is tracking at 1.7%, reflecting adverse base-effect. The pass-through of GST cuts is likely completed in October and November.

- Core inflation is estimated at 4.8%, reflecting further surge in gold prices. There is also a possibility of higher telecom tariffs in December.

- FY26 CPI inflation is tracking at 2.0% in line with RBI's estimate.

Domestic Liquidity -

Source: Bloomberg, Data as on 31.12.2025

- Banking system liquidity became deficit post advance tax payments on December 15th, 2025.

- RBI's commitment to provide sufficient liquidity has led to further announcement of liquidity measures.

- RBI continues to infuse liquidity at an accelerated pace, it has undertaken INR3tn Open Market Operations(OMO)purchase and INR2.6tn via CRR cut until Jan 2026.

- RBI has also conducted two buy-sell swaps during this period of US\$15bn in December and January, thereby reinstating core liquidity of more than INR 4 trillion.

- RBI's action also addresses the tepid money supply (M3) growth in the economy.

- The announcement of OMOs for liquidity gives additional 3 tn INR in the economy which may circle back to accretion of deposits in the banking sector.

- Deposit growth is an important factor to bring down the Credit-Deposit (CD) ratio of the scheduled commercial banks. Thus, supporting short-term rates as this may lead to lesser issuances of CDs in the coming quarter.

Fixed Income Outlook-

- US Monetary Shift** – FED in December-25 policy delivered a rate cut and also mentioned to start quantitative easing.

Even though the economic projections reflect one cut in 2026 and 2027, we believe the FED will continue to remain data dependent and the SEP (summary of economic projections) to align accordingly.

The key triggers on Fed's rate trajectory depend further clarity on US labor market conditions post government shutdown, US tariffs and its actual impact on inflation and tightness in US money markets.

We expect one more cut by March-2026 given weakness in labour market conditions.

- Changing Policy Dynamics from August to December -25** - RBI Monetary policy reduced the repo rate by 25bps to 5.25% in line

with our expectations. The dynamics of RBI's future monetary policy decisions will depend on

a) Firstly, the direction of FED policy monetary, where we expect fed to deliver at least 1 rate cuts by March 2026 led by labor market concerns and tightness in US money markets, b) Secondly, domestic growth is currently supported by multiple reforms and policies pushes, the actual momentum of the economy will be visible in Q4 FY26 post effects of GST cuts. However, the current run rate of less than double digit nominal GDP also provides an impetus to remain on expansionary mode on monetary policy front especially when fiscal expansion potential remains limited c) Thirdly, inflation expectations in Q1 and Q2 FY27 are lower than 4% and real rates remain 'substantially high' as per RBI's Governor. Therefore, RBI may acknowledge scope for either reducing rates further/continue infusion of durable liquidity or remain on long pause with liquidity infusion mode till the time double digit nominal gdp or inflation more than 4% on sustainable basis is achieved.

- Elevated spreads and yields** - We believe the recent sell off started since August-25 has created another opportunity for investors as it has resulted in valuation of securities to a reasonably attractive point wherein spreads of 10-year benchmark vs the overnight rate and SDLs/Long gsec versus the 10yr benchmark have reached the higher end of the trading range. The investors could benefit from further easing of rates in months ahead.

- Fiscal concerns added to the woes But!** – Fiscal concerns aided further rise in yields, but we do not expect GST rate cuts to be fiscally negative as we expect Government to benefit from higher volumes at lower GST rates along with other avenues to manage the deficit, if any.

- INR took the hit** - INR depreciation has resulted in INR valuation being closer to fair level and provides an attractive entry point from foreign investors in fixed income markets.

- At last, the opportunity** - Positive real rates of ~200 bps (1yr T-bill vs FY26 inflation), post RBI rate cut of 100 bps provides a fundamentally attractive case for remaining invested in fixed income assets. Benign inflation forecast of 2.6%, below RBI threshold of 4% for FY 26 and maintaining GDP forecast at 6.8% indicates a continuity of pro-growth-oriented policy mindset. Multiyear high spread between benchmarks and long end G-sec is expected to provide ample opportunity, with stable to lower rate view and comfortable macros.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management – Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

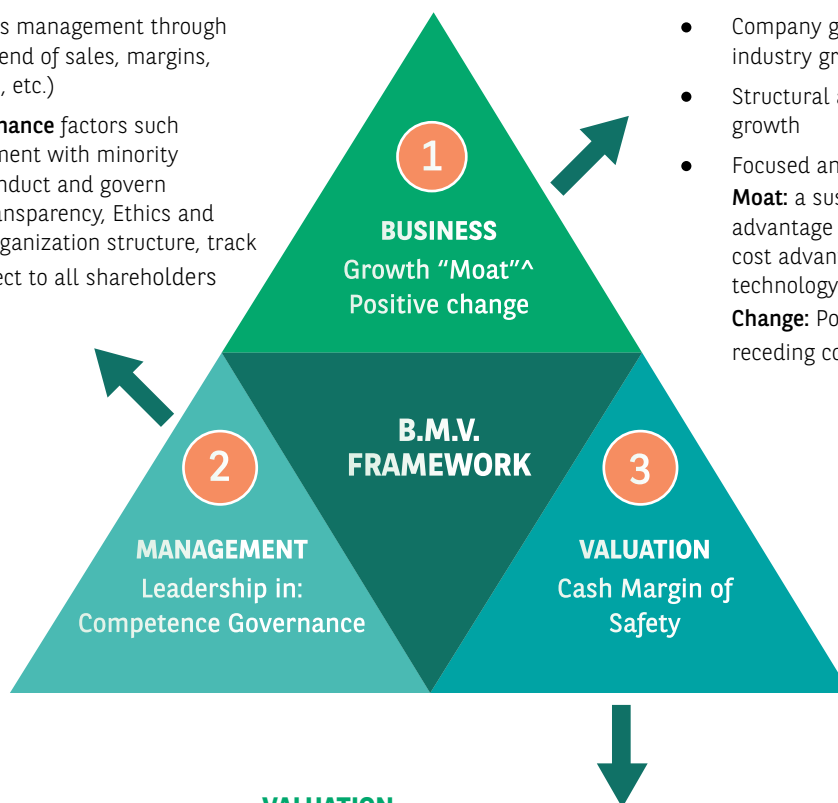

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
 - Structural and long-term sustainable growth
 - Focused and simple to understand
- Moat:** a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
- Change:** Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

India 10 year benchmark yield spiked to 6.59% led by global monetary developments post Bank of Japan policy hike.

Benchmark rates continue to squeeze bit by bit with ongoing transmission of rate cuts in the economy.

India's Manufacturing PMI slowed to a 2 month low. The survey reflected weaker international order growth and narrowed range of export destinations, with goods mainly heading to Asia, Europe and the Middle East.

GST collections declined by 1.3% y/y in December-2025 led by a smaller collection in compensation cess.

Legend: Negative (Red), Watch (Orange), Neutral (Green), Positive (Dark Green)

Data is as on month-on-month basis

Source: PIB, Bloomberg, RBI, MOSPI, SIAM, Office of Economic Advisor

The data mentioned above is as per their date of release and availability as on January 05, 2026.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Baroda BNP Paribas Large Cap Fund

(An Open ended Equity Scheme predominantly investing in large cap stocks)

This product is suitable for investors who are seeking*:

- Wealth Creation in long term.

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular-Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

(An Open ended Debt Scheme predominantly investing in AA+ and above rated corporate bonds. A relatively high interest rate risk and moderate credit risk scheme)

This product is suitable for investors who are seeking*:

- Capital appreciation and regular income in long term.
- Investment primarily in AA+ and above rated corporate bonds and the rest in debt and money market instruments.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown. *% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to "Performance of Schemes" page.

Please note TRI indicates Total Return Index.

Performance of Schemes

(as on December 31, 2025)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Gold ETF Fund of Fund and Baroda BNP Paribas Business Conglomerates Fund is not provided as the scheme has not completed 6 months. \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 -2.24%, µµ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. * The scheme is a 'Transfer Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. * Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%. Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time. † The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund. ‡ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid Cap Fund and erstwhile Baroda Mid Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund. SAR - Simple Annualised Return.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port traffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is consumer price inflation excluding food and fuel.
Core CPI (%YoY)	
WPI (%YoY)
