Market Outlook - Equity

Indian markets continue to underperform other emerging markets during the month of January 2026. Asian markets continued to see positive momentum on the back of Artificial Intelligence (AI) and Semiconductor rally. Europe and US markets were impacted due to US attack on Venezuela, threatening of possible invasion of Greenland and attack on Iran.

Nifty 50 was down by 3.1% for the month of January 2026. Amongst Asian markets, South Korean market (KOSPI) was up by 24%, followed by Taiwan Index (+10.7%), Hang Seng Index (+6.9%), Japan (NIKKEI 225) (+5.9%) and SSE Composite (Shanghai Stock Exchange) (+3.8%). In Europe, FTSE 100 Index (UK) was up by 2.9%, while DAX (Germany) was largely flat at 0.2% and CAC 40 (France) was marginally down by 0.3%. In the US both S&P 500 and Dow Jones were up by 1.3%.

In January 2026, Nifty Midcap 150 Index was down by 3.5% and Nifty Small Cap 250 Index by 5.5%. Sector wise majority of the sectors were in red with BSE Realty down the most by 10.3%, followed by BSE FMCG (-7.9%), BSE Consumer Durables (-7.8%), BSE Healthcare (-5.6%), BSE Auto (-5.2%), BSE Oil & Gas (-2.1%), BSE IT (-1.4%), while BSE Bankex was marginally up by 0.5% followed by BSE PSU (+4.5%) and BSE Metals (+5.5%).

FPIs entered 2026 with selling USD 3.5bn in Indian markets in January 2026, as global uncertainties and revival of corporate earnings to double digit growth remains a major overhang. With regards to certain emerging economies, Brazil saw the highest inflows to the tune of USD 4.3bn, followed by Taiwan (+USD 1.8bn), while Malaysia, South Korea and Thailand saw lower inflows of USD 150-400mn in January 2026. Indonesia saw outflows of USD 589mn and Vietnam by USD 211mn.

The US Federal Reserve in its latest meeting has kept the interest rate unchanged at 3.5-3.75% range, cut rates by 25bps to the 3.75-4% range. The pause on rate cut was on account of persistent inflation and resilient growth. Geo-political tensions are keeping crude oil prices under check at USD 60/bb to USD 70/bb on account of US intervention in Venezuela and threats of attack on Iran. The US has also threatened European Union with high tariffs if EU countries oppose to US control over Greenland.

On 27th January 2026 India and the European Nation concluded a landmark deal, after nearly 18 years of negotiations and is expected to become effective from CY2027. This will give a big boost to Indian exports particularly in the labour-intensive sectors which contribute ~28% of total India's exports to EU (USD 76bn in FY25) such as textiles, gems and jewellery, agriculture, seafood, leather. Tariffs on labour intensive exports will reduce to 0%, certain marine products, processed foods and defence goods are to be reduced over 3-5 years, select Agri-products are to be reduced to preferential rates.

Locally, government presented the budget for FY27 with higher focus on capex which is expected to grow 11.5% in FY27 to INR 12.2t, while revenue expenditure growing by 6.6%. The government in the budget has prioritized macro stability, with projected fiscal deficit of 4.3% in FY27 and also indicated a gradual improvement in debt dynamics, with the debt-to-GDP ratio expected to decline to 55.6% in FY27 from around 56% in FY26 (RE).

One of the key highlights of the budget was government's push to manufacturing, which will be key drivers for job creation, domestic value addition and long-term industrial competitiveness. Keeping this in mind government has focused on seven sectors which include, biopharmaceutical, semiconductors, electronic components, rare earth magnets, chemicals, capital goods and textiles.

Corporate India started reporting its quarterly numbers. During Q3FY26 Nifty 500 saw double digit revenue growth after a gap of five quarters while Earnings Growth marked third-consecutive quarter of double-digit growth, up 14.7% YoY for the 128 companies which reported results. Banking sector has seen improvement in credit growth and witnessing pick-up in corporate lending. Asset quality continues to improve with pain in unsecured segments normalising and collection efficiency improving as well as gross slippages coming down

Indian market valuations trade at its long-term average of 21x and with expectations of accelerated growth from 2HFY26 onwards, valuations can see re-rating. While Indian markets have been underperforming global peers over one year period on weak earnings growth, recent favourable government policies and improvement in earnings, risk reward seems favourable.

Market Outlook - Fixed Income

Debt Market Commentary January-2026

The tariff shock triggered by the US on other economies had a structured effect on global growth and trade dynamics. The impact is huge but cannot be seen on a standalone basis. The comparative trade advantage is fading, and a more insulated trade economy is taking shape. New trade blocks are being formed whereas old ones are becoming obsolete. The dominance of dollar has faced subtle disinterest via increased use of local currencies in trade and diversification of reserves; gold became the center of it.

What we witnessed is switch from the influence and dominance of one currency and country to a more fragmented and multipolar economic system. Unsettling trade shocks have underlined a new reality in which geopolitics rather than pure economics is setting the stage for a new world order, driving growth, inflation and capital flows. The standing point of changing world order is visible in asset classes.

Source: Bloomberg, Data as on Jan, 14th 2026

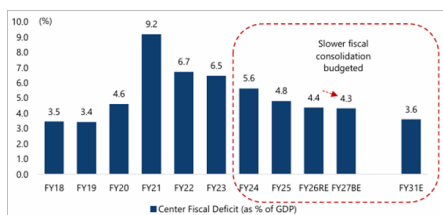

Commodities that were meant to hedge each other moved in tandem, safe havens behaved like risk assets, therefore forcing investors and policy makers to adapt in real time. Gold prices remained volatile, rising above \$5400 in January-26 and declining sharply back to ~\$4800 levels starting Feb-26. Silver too followed similar volatility.

Meanwhile, global fixed income markets have also witnessed sideways movements led by uncertainty and divergence between central bankers positioning on rate cycles especially in advanced economies. Recent divergence was visible between US and Japan, where US in December-2025 policy reduced federal fund rate and started with Quantitative easing, whereas Japan delivered a rate hike.

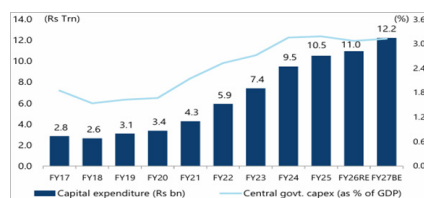

Domestic Economy-

Amidst these uneasy global dynamics, India has not been completely insulated. Domestic growth and currency faced headwinds from US tariffs, with secondhand effects on domestic liquidity conditions. But with the recent announcement of lowering of US trade tariffs on India from 50% to 18% it has led to appreciation of Indian rupee against dollar. India has also concluded major FTAs with UK, New Zealand and European Union. The most significant of the deals is India-EU FTA, with a combined market estimated at ~USD 24 trillion. The EU's average tariff rate on Indian goods will drop from 3.8% to 0.1%, which could boost India's exports and imports from EU which have been stagnant of late. EU-India FTA is a comprehensive agreement that spans both goods and services. More importantly, there is a comprehensive agreement on mobility of skilled and semi-skilled professionals.

Central government fiscal deficit to GDP trend

Central government capital expenditure

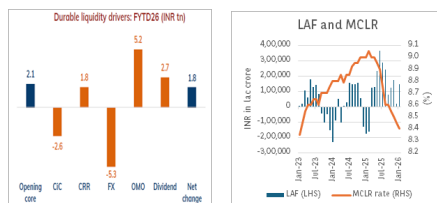

Source: Bloomberg, Jefferies Data as on Feb 01, 2026

Union budget was another key event shaping market expectations. Budget FY27 was focused on India's commitment to fiscal discipline and sovereign credibility while choosing temporary repricing rather than structural damage. Centre has targeted fiscal deficit at 4.3% for FY27, which broadly aligns with its fiscal consolidation road map, while continuing its thrust on capital expenditure, considering a 11% y/y growth from FY26 revised estimates.

Overall, the tax assumptions as usual have been realistic. A 10% nominal gdp growth in our view is conservative and can surprise on the upside going forward. The borrowing trajectory was largely predictable with a few surprises. Also, the budget avoided any disruptive policy changes amidst an already volatile global environment.

On the growth front high-frequency indicators suggest continued buoyancy in growth impulses. Demand conditions remained upbeat, underpinned by a resurgence in rural demand and a gradual recovery in urban demand.

Domestic Liquidity-

Source: Bloomberg, Data as on Jan 30th, 2026

- System liquidity was under pressure on account of GST and foreign capital outflows.
- This led to increase in domestic yields.
- Post the announcement of further liquidity support (INR 1trn. Open Market Operations(OMO) purchase + USD 10bn FX swap) and month-end government spending, domestic yield curve flattened.
- Overall pressure on yields, especially short end remains, as CD ratio remains high (currently above 80).
- Also, the supply remains limited to the belly of the curve.
- We expect short-term rates to be supported with expectation of issuances of CDs in the coming quarter from commercial banks.

Domestic Inflation -

YoY%	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25
CPI Inflation	1.6	2.1	1.4	0.3	0.7	1.3
Food and Beverages	-0.8	0.05	-1.4	-3.7	-2.8	-1.8
Non-Food	2.4	2.5	2.7	2.9	3.0	3.0
Clothing and Footwear	2.5	2.3	2.3	1.7	1.5	1.4
Housing	3.2	3.1	3.0	3.0	3.0	2.9
Fuel and Light	2.7	2.3	2.0	2.0	2.3	2.0
Miscellaneous	5.0	5.0	5.4	5.7	5.6	6.2
Core	4.2	4.2	4.4	4.5	4.4	4.7

Source: Bloomberg, Data as on Jan 12, 2026

- India CPI inflation came at 1.33% y/y in December-2025 marking the eleventh consecutive print below the 4% inflation target.
- While headline inflation edged up in Dec-2025 from 0.7% in Nov-2025 it was driven by unfavorable base effects.

- Food inflation continued to remain in deflation. Food and beverage inflation declined by 1.8% y/y in Dec-2025 v/s a decline of 2.8% y/y in Nov-25. The decline was visible in key food items like vegetables, pulses, spices and cereals.
- High frequency daily food price indicators for first two weeks of January-26 indicated a month-on-month decline in vegetable, pulses and cereal prices.
- On the contrary, core inflation inched up to 4.7% y/y in Dec-25 vs 4.3% in Nov-25. However, core ex gold and silver where core inflation was ranging at 2.3% y/y.
- With India set to transition to a new CPI series in Feb 2026, with the base year revised to 2024 using the household consumption expenditure survey, the weights of food and core inflation will change.
- The new CPI series will give a better picture on core inflation with inclusion of modern services such as quick commerce in the index.
- Looking at the current inflation trajectory and RBI's dovish tone last policy, we still see space for another cut. The timing will depend on timelines of US tariffs and growth indicators in Q4 FY26. The space is available, but the key is timing.

Fixed Income Outlook-

Global Monetary Dynamics -

- Fed and Bank of Japan continue with contrary monetary policy outlook.
- The pressure of the above can keep high uncertainty in the global rates market.
- We expect FED to remain accommodative on rates front amidst political pressure and soft labour market.

Domestic Growth & Inflation -

- Shift in base year for GDP and inflation looks fundamentally positive for the economy.
- Growth and inflation projections will change as the base year changes.
- The new index for inflation has reduced weights for food cpi and higher weights for core CPI.
- This will give a better picture of actual inflation in the economy.
- Overall, RBI's language on growth is supportive and comfortable on inflation.

Currency -

- Recent announcement of US trade deal is expected to support INR and FII sentiments.
- Latest FTA deals are sentiment boosting and also opens different market access to India for both goods and services.
- Therefore, at current levels we see INR valuations being closer to fair level.
- This provides an entry point opportunity for foreign investors in domestic fixed income markets.

Spreads and Rates -

- RBI has been very proactive on liquidity and rates front. Even though the spreads are elevated due to higher CD ratio.
- We believe RBI's concerns on growth will be visible on rates through liquidity measures.
- Also, next quarter we expect some normalization of CD ratio.
- With expectations of further RBI liquidity measures we expect yield curve steepening.
- Going ahead, spreads and accrual would be a major source of alpha as compared to duration in the portfolio.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management – Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

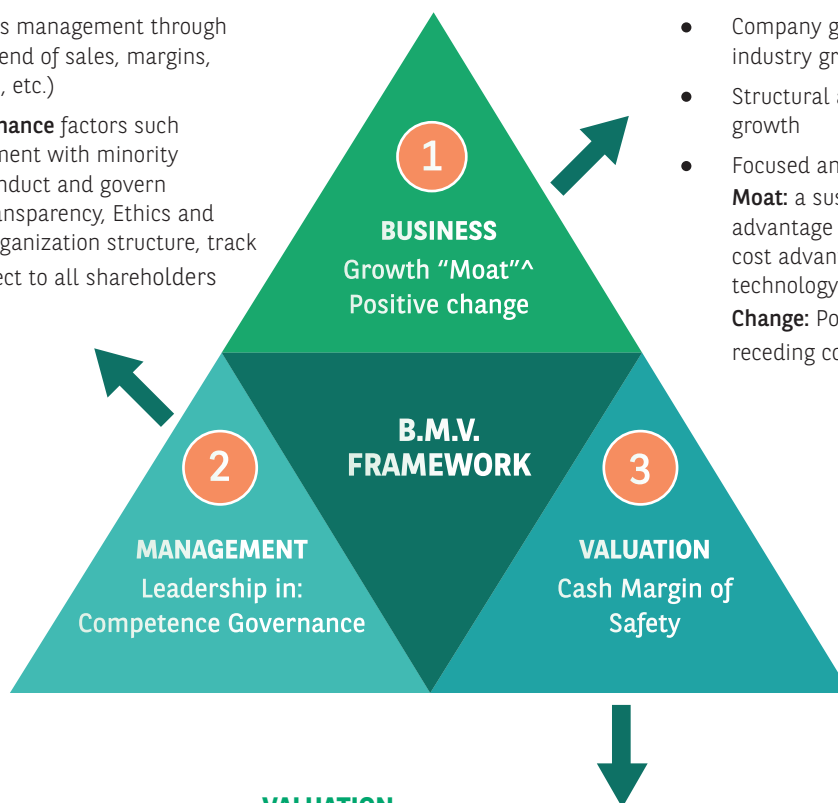

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
 - Structural and long-term sustainable growth
 - Focused and simple to understand
- Moat:** a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
- Change:** Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

India 10 year yield came into pressure amidst liquidity concerns and higher borrowing estimates in FY27.

1-Year median Marginal Cost of Funds based Lending Rate (MCLR) moderated to 8.40% in January 2026, reflecting slower transmission of rate cuts in the economy.

IIP(Index of Industrial Production) growth gained momentum and grew by 7.8% y/y in Dec-25 led by increase in broad based growth in all sub indexes.

Indian manufacturing PMI saw a rebound in January-26, driven by increased new orders and output growth.

Data is as on month-on-month basis

BONDS & NCDs	
Listed / awaiting listing on the stock exchanges	
Yes Bank Ltd.	[ICRA]D 0.00%
TOTAL	0.00%
Segregated portfolio 2	
BONDS & NCDs	
Listed / awaiting listing on the stock exchanges	
Yes Bank Ltd.	[ICRA]D 0.00%
TOTAL	0.00%

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

(An Open ended Debt Scheme predominantly investing in AA+ and above rated corporate bonds. A relatively high interest rate risk and moderate credit risk scheme)

This product is suitable for investors who are seeking*:

- Capital appreciation and regular income in long term.
- Investment primarily in AA+ and above rated corporate bonds and the rest in debt and money market instruments.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown. *% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to "Performance of Schemes" page.

Please note TRI indicates Total Return Index.

Performance of Schemes

(as on January 30, 2026)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Gold ETF Fund of Fund and Baroda BNP Paribas Business Conglomerates Fund is not provided as the scheme has not completed 6 months. \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24%. µ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. * The scheme is a 'Transfer Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. ** Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%. Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time. † The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund. ‡ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid Cap Fund and erstwhile Baroda Mid Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund. SAR - Simple Annualised Return.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnp-paribasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port traffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is
Core CPI (%YoY)	consumer price inflation excluding food and fuel.
WPI (%YoY)
