Market Outlook - Equity

After a positive run for the last 4 months, Indian markets declined in the month of July. Indian markets saw the weakest performance in July compared to global peers with Nifty 50 index (Nifty) declining 2.9% compared to Hang Seng (+2.9%), Kospi (+5.7%), SSE Composite (Shanghai Stock Exchange) (+3.7%) and Nikkei 225 (+1.4%). In the developed economies S&P 500 was up by 2.5%, US Dow Jones by 0.8%, while European markets fared better than US Dow Jones with FTSE 100 up by 4.7%, CAC 40 by 2.2%, DAX by 1.3%.

Nifty took a breather in July as weak corporate earnings, uncertainty around a potential trade deal with the US weighed on markets. On 30th July President Trump announced 25% tariffs on India along with additional penalty which further impacted markets. On the positive side, India signed the 'Free Trade Agreement' (FTA) with the UK. This deal will boost some key sectors such as textiles, leather, footwear, sports goods and toys, marine products, gems and jewellery, engineering goods, auto parts and engines, and organic chemicals.

The mid and small cap index underperformed the broader market with Nifty Small Cap 250 Index declining by 3.7% and Nifty Midcap 150 Index by 2.9% for the month. Sector-wise most sectors ended in red barring BSE Healthcare (+2.5%) and BSE FMCG (+1.6%), with BSE IT declining 8.7% followed by BSE CAP (-5.7), OIL (-3.8%), Metals (-2.6%), Banks (-3.2%), Consumer Discretionary (-1.5%) and Consumer Durables (-0.5%).

Given the uncertainty on tariffs and weak earnings, FPIs have turned net sellers after positive flows for the past 4 months. FPIs sold to the tune of USD 2.1bn in July, and overall net selling of USD 10.3bn for calendar year 2025. Some of the emerging market like South Korea (+USD 4.5bn) and Taiwan (+USD 7.8bn) continued to see positive flows for third consecutive months. Brazil saw outflow of USD 1bn, followed by Indonesia (-USD 435mn) and Malaysia (-USD 201mn).

The Federal Open Market Committee (FOMC) maintained its range for interest rate at 4.25-4.5% and indicating that it still expects two rate cuts this year, though the outlook is more uncertain. The Fed also expects inflation to pick slightly this year to 2.7% from the current level of 2.5%. For Q2CY25 US GDP grew better than expected at 3% which was aided by increased consumer spending. With threats of tariffs on countries buying Russian oil by President Trump, Brent increased by ~6% in the last week of July to \$72.55.

Domestically, corporate India has started reporting its quarterly results. Companies have reported lower than expected sales and EBITDA (Earnings before interest, taxes, depreciation and amortization). Earnings continue to grow at mid-single digits on YoY basis. While sales for IT companies have been in line, they are facing challenges on the EBITDA margin. In the BFSI space, while Net Interest Margin (NIM) compression was expected, most companies reported higher slippages, i.e. rise in non-performing assets, led by MSME and Microfinance (MFI) sector, indicating stress in credit quality in this segment. Capital market companies continue to perform well. Consumer companies reported inline results with pick up in rural spend and some traction in urban consumer spends.

CPI inflation continues to decelerate at 2.1% in June as against 2.8% in May, as food prices moderate. India Services Purchasing Managers' Index (PMI) inched up to 10 months high at 60.4 in June as against 58.8 in May. Continued strength in domestic market aided service companies, along with increase in export business. Manufacturing PMI rose to 14 months high of 58.4 in June (57.6 in May), led by intermediate goods makers, with slowdown in the consumer and capital goods segment. June also saw quicker upturn in new order inflow.

Monsoons continue to be above normal with good rainfall in the last week of July leading to cumulative rainfall surplus of 7% above normal. For the season till July end, cumulative rainfall was 467.8mm against normal of 437.2mm. A healthy monsoon and pick-up in sowing will be key for rural demand pick-up.

After rallying almost 7% in the 1HCY25, Indian markets have taken a pause in the month of July with overall Nifty 50 rally for CY2025 coming down to 3%. Key to watch would be increase in consumption given favourable monetary policy by RBI, Personal tax cuts announced in Budget and better than expected monsoons. Key challenge though is US tariffs where uncertainty remains, though impact could be lower given exports to US forms only 18% of overall exports for India. Valuations are now reasonable, and earnings are expected to pick up in 2nd half led by favourable base and early and well spread out of festivals in 2HFY2025-26.

Market Outlook - Fixed Income

Debt Market Commentary - July -2025

Global Economy -

Global economic activity remained fluid in July-2025, while awaiting clarity on trade tariffs. While some countries like Japan, EU, Vietnam, Indonesia have entered trade deals with US but the impact of the new trade negotiations are yet to play out. The volatility and uncertainty regarding the trade tariffs have reduced since the effective tariff rates have been lower than announced in April-2025. International Monetary Fund (IMF) in its latest world economic projections, have revised the global growth projections on the upside to 3% from earlier estimated 2.8% led by stronger-than-expected front-loading in anticipation of higher tariffs; lower average effective US tariff rates than announced in April-2025 and an improvement in financial conditions. Global currencies markets have witnessed a depreciating dollar in June-25, but saw the reversal in July with dollar index back to 99 levels.

FED in its July FOMC meeting delivered another pause keeping the Federal fund rate at 4.25-4.50%. The overall tone of the policy was slightly hawkish as concerns on tariff related inflation risks continued to cloud Fed's decision. The FED highlighted some pass through of tariff related hikes to be visible in inflation data but the key question is whether the pass through will affect inflation in the medium term.

Global Inflation has started to moderate, now averaging 4.2%. It remains elevated in the U.S., and consumer prices are beginning to be affected by the recent tariffs and dollar depreciation, particularly in goods that are sensitive to imports. In contrast, Europe and China have experienced more subdued price pressures due to slower consumption and fiscal support. Also, energy markets have been relatively less volatile this month.

Source: Bloomberg, Data as on July 16, 2025

However, geopolitical tensions do still remain high this month. In particular, the Iran-Israel conflict and ongoing conflicts in Ukraine continue to pose serious risks, with any escalation potentially disrupting shipping routes and supply chains and triggering fresh inflationary shocks. Due to these tensions, major economies are treading carefully.

Domestic Economy-

Domestic economic activity held up in June-July-2025, with high-frequency indicators pointing to improving prospects of rural outlook with positive kharif agricultural season. On the urban front continuation of strong momentum in the services sector supports overall outlook. High-frequency indicators displayed a mixed picture showing a clear divide between urban and rural economic activity.

Source: Bloomberg, Data as on July, 2025

Auto sales saw a sluggish month with respect to sales in June-2025. Looking deeper, passenger vehicle sales contracted by 7.4% y/y in June-2025, followed by two wheelers contracting by 3.4% y/y. Auto sales reflect a sluggish urban demand whereas rural demand continues to remain robust with tractor sales clocking in a 10.5% y/y growth in June-2025. Credit growth too witnessed a slowdown. Credit growth has slowed to a 3-year low. RBI's support and government's fiscal push is expected to reflect with a lag with transmission of rate cuts.

India received 'above normal' rainfall during the first half of the current monsoon season at 106% of long period average. This has allowed crop sowing operations to expand by 4% over last year.

External sector continues to remain volatile, latest tariffs on India remained around 25%, similar to what was announced in April-25. US has about 20% of total weightage in India's export basket. Overall expectations are the current tariffs can lower India's GDP by 0.2 bps as India's exposure to US tariffs remains relatively moderate with exports to US accounting for 2% of GDP.

Against these external headwinds, RBI has been adding to the forex (FX) buffer. India's FX reserves increased to \$700 bn. in July-25 as INR stabilized and domestic liquidity concerns faded.

Source: Bloomberg, Data as on July 16, 2025

Despite global uncertainties, the Indian economy remains largely resilient, supported by strong macroeconomic fundamentals. The front-loading of government expenditure, healthy fiscal indicators and lower inflation and faster transmission of rate reductions are expected to support economic growth in FY 2026.

Domestic Inflation -

Source: Bloomberg, Data as on July 13, 2025

 Headline CPI slowed further in June-25, to 2.1% y/y from 2.8%y/yin May-25, lowest since Feb-19. The decline in headline inflation is led by lack of seasonal pickup in food prices and a favorable base.

- The domestic inflation trajectory remains favorable, driven by moderating food price, timely monsoons and a healthy crop output, as well as benign commodity prices.
- We expect FY26 inflation to undershoot RBI's target of 3.7%.
- The favorable base effects are expected to fade in Q4 FY26, irrespective of that, we see space for one more rate cut with the presence of a negative output gap and benign inflation expectation.

Domestic Liquidity -

Source: Bloomberg, Data as on July 16, 2025

- Banking and durable liquidity are currently comfortable, and financial conditions have significantly improved.
- Banking MCLR tracking the benchmark rates and liquidity reduced to 8.75%, reflecting transmission of rate cuts in the economy.

Fixed Income Outlook

- Geopolitical tensions have again begun to cloud the global economy.
- Trumps tariff threats and spillovers on currencies is the existing risk that is driving the markets volatile.
- The impact of uncertainty on US inflation and growth will be a key watch on global front.
- The recent softening of employment data in US and downward revision of the same for last two months do indicate softening of growth levels in US. The probability of rate cuts by FED has increased post this data and may be a key monitorable going forward as we get into later part of 2025
- On the domestic front, evolving growth dynamics have taken center stage.
- RBI's forward guidance and the rate cut gives us the confidence on growth supported future policy expectations.
- Recent softening in domestic inflations paves the way for RBI to take calibrated policy decisions.
- Irrespective of the tools, liquidity measures are expected to have an impact on the short end of the curve.
- The spreads on the short end are elevated and current liquidity expectations make them attractive.
- Recent moves by RBI give us confidence that liquidity will be managed in spirit of the stance.
- RBI had injected INR 5tn through Open Market Operations (OMOs) recently and also cut CRR by 100 bps to aid transmission of rates.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that "companies create wealth and not markets" and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management - Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles.

In search of companies with superior and sustainable earnings growth with strong management, at reasonable valuations.

- Valuations: Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield,
- Valuations: Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield,
 Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the margin of safety required
- Superior risk-reward profile

[^]A sustainable competitive advantage

India's benchmark 10-year yield rose to 6.37% in July-25 led by unfavorable global cues.

Median Marginal Cost of Funds based Lending Rate (MCLR) moderated to 8.75% reflecting transmission of rate cuts in the economy.

India Manufacturing PMI recorded a 16 month high, with Indian manufacturing sector benefitting from strong growth in new orders with rising international demand.

Central government expenditure increased by 37.4% y/y. Internals reflect stronger reveneue expenditure towards pay and pensions and higher interest payments.

Data is as on month-on-month basis Source: - PIB, Bloomberg, RBI, MOSPI, SIAM, Office of Economic Advisor

The data mentioned above is as per their date of release and availability as on August 04, 2025.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Baroda BNP Paribas Large Cap Fund

(An Open ended Equity Scheme predominantly investing in large cap stocks)

This product is suitable for investors who are seeking*:

- Wealth Creation in long term.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown. *% CAGR Returns are computed after accounting for the cash flow by using the XIRR method. For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to "Performance of Schemes" page. Please note TRI indicates Total Return Index.

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Energy Opportunities Fund, Baroda BNP Paribas Income Plus Arbitrage Active Fund of Funds, Baroda BNP Paribas Multi Asset Active Fund of Funds and Baroda BNP Paribas Health and Wellness Fund is not provided as the scheme has not completed 6 months. \$1 mpact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 : -2.24%. µp The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous performance prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. *The scheme is a 'Transferce Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. *Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: A total return index: A total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as di

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. Past performance may or may not be sustained in future and is not a guarantee of future returns.

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ('IDCW') option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. Past performance may or may not be sustained in future and is not a guarantee of future returns. The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/ IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website https://www.amfiindia.com/research-information/other-data and https://www.amfiindia.com/importantupdates.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01,

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/ agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30. 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor. based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem

Modified Duration: Modified duration is the price sensitivity and the percentage Change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following https://www.barodabnpparibasmf.in/downloads/totalexpense-ratio-of-mutual-fund-schemes on website of mutual

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	indicator incasores.	
Currency in circulation (% YoY)	Measures each in circulation and is an important indicator of economic activity particularly in the informal sector	
M3 (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector Measures money supply and is linked to real GDP growth and inflation	
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto	
Personal credit (%YoY)		
Credit to industry (%YoY)	loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects)	
- · · · · · · · · · · · · · · · · · · ·	and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in	
Credit to services (%YoY)	economy, industry's demand for credit and services' sector demand for credit respectively.	
Deposit growth (%YoY)	Measures total deposit growth in the banking system	
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope	
	transmission of rate cuts. G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec	
10 year G-Sec yields (%)		
Weighted account to discounts of Boules (0/)	yields are determinant of the government's ability to service its debt.	
Weighted average lending rate of Banks (%)	Lending rate for all loans Cost of deposits for banks	
Weighted average deposit rate of banks (%)		
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission	
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.	
Industry	Management of CDD	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP	
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP	
IIP (%YoY)	The Index of Industrial Production (IID) measures valume of industrial output. It is an index which datails out the	
Mining (% YoY) Manufacturing (%YoY)	The Index of Industrial Production (IIP) measures volume of industrial output. It is an index which details out the	
Electricity (%YoY)	growth of various sectors in an economy such as mineral mining, electricity and manufacturing.	
Capital goods production (%YoY)	There are part of IID manufacturing. Massures values of demostic conital goods production which is (1) reflective of	
Consumer durable production (% YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of	
, , ,	the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of	
Consumer non-durable production (% YoY)	consumer non-durable output particularly FMCG products.	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing	
PMI Services Index	and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on	
PMI Composite Index	order book, prices, employment etc.	
Consumer		
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume	
Motorvehicle sales (%YoY)		
Passenger Vehicle (% YoY)	Measures total number of wholesale motor vehicle sales (passenger vehicles, tractor, commercial and two wheelers)	
Commercial Vehicle (% YoY)	i.e. dispatches from manufacturers to dealers. Indicator of consumption activity.	
Two wheeler (% YoY)		
Tractor sales		
Petrol consumption (% YoY)	Measures volume of motor spirit consumption	
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy	
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication	
	component of GDP.	
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport	
. ,	storage and communication component of GDP.	
Freight	lui e e e e e e e e e e e e e e e e e e e	
Major port tarffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country	
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country	
Foreign Trade	Manager who of surerts	
Export growth (% YoY)	Measures value of exports	
Import growth (% YoY)	Measures value of imports	
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.	
Fiscal	Macausa total anatol graph many appropriate and in an investment of the wildle and the second of the	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence	
	and other services component of GDP.	
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.	
Inflation		
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically	
Core CPI (%YoY) WPI (%YoY)	purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is consumer price inflation excluding food and fuel.
