Market Outlook - Equity

While uncertainty over tariff continue, Indian markets saw sharp rally in the month of March 2025, Nifty 50 Index rallying 6% and Nifty 100 Index by 7% respectively. Indian markets outperformed developed markets such as US S&P 500 (-5.8%) and Nasdaq (-8.2%). Some of the Asian Markets also underperformed with Hang Seng marginally up by 0.8%, Nikkei 225 down by 4.1% and Shanghai Stock Exchange (SSE) Composite Index up 0.4%. For the month of March 2025, Nifty Index outperformed the MSCI Emerging Market Index (+0.4%). In the long term too over Mar-15 to Mar-25, Nifty 50 Index (+7.3% CAGR) has significantly outperformed MSCI Emerging Market Index (+1.2% CAGR). Nifty Small Cap 250 Index rose by 9.1% and Nifty Midcap 150 Index by 7.7% over the month. Sector-wise, barring IT (-1.5%), most sectors ended in the green. Some sectors saw sharp rally with Capital Goods witnessing the most by (+13.5%), followed by Oil & Gas (+11.3%), Metals (+10.1%), Banks (+8.6%), Pharma (+8.4%), Realty (+6.6%) and FMCG (+5.8%).

Flows of Foreign Portfolio Investor (FPI), Domestic institutional investor (DII) and other investors have been volatile in the past few weeks. Foreign Portfolio Investor (FPIs) have turned net buyers, but retail investors have turned sellers (direct basis) while still buying through MFs. This follows months of large Foreign Portfolio Investor (FPI) selling and MF buying.

On the global side, Europe is where data points are turning encouraging now. European markets have rallied by 5% over the last three months. EU and Germany have announced large fiscal spending. They intend to spend 2.2% of GDP annually over the next 10 years on defence and infrastructure. This will have a multiplier effect on the economy which should spurt GDP growth for Germany. US has been a different story. President Trump's tariff policies is a key area of discussion. Since assuming office, Trump has announced multiple tariffs on its trading partners. This includes 20% tariff on China, 25% on some imports from Canada, 25% on steel/ Aluminium. President Trump announced that he will impose a uniform global tariff on all imports into the US from 2nd April, calling it 'Liberation Day'. His administration is expected to enforce an across-the-board 10% tariff on all products, irrespective of origin, to either pressure countries into lowering their tariffs or generate revenue for the US economy.

The US is one of the largest trading partners of India, with bilateral trade of USD124b in CY24. Exports from India to the US reached USD81b, and imports from India to the US amounted to USD44b, resulting in a trade surplus of USD37b for India in CY24. The US is India's largest export destination, with its share reaching 18% in CY24 from 13% in CY14 and 6% in CY06. Notably, India's imports from the US (as a % of total imports) have remained stable at ~6% in CY24 vs. ~5% in CY14.

US selloff has deepened over past 2 weeks, yields on 10-yr Treasuries slumped to the lowest since Oct'24 to 4.17%, after President Trump's comments on a potential recession, weak consumer sentiment and weak commentary from US Airlines and Retail chains.

On the other hand, in China manufacturing activity picked up momentum, expanding at its fastest pace in a year. The official purchasing managers' index (PMI) rose to 50.5 in March 2025 from 50.2 in February 2025, while the non-manufacturing purchasing managers' index (PMI), which includes services and construction, improved to 50.8 March 2025 from 50.4 February 2025. The data signals a gradual recovery in economic activity.

On currency side, most Asian currencies traded within a tight range as fears of increased US tariffs weighed on risk appetite. However, the Japanese yen emerged as an outlier, strengthening sharply due to haven demand. The USD/JPY pair fell 0.5% to as low as 148.73 yen.

On Indian economy front, in February 2025, the Consumer Price Index (CPI) inflation rate decreased to 3.6%, down from 4.3% in January 2025, primarily attributed to a decline in food prices. The Industrial Production (IIP) Index growth for January 2025 rose to 5%, compared to 3.5% in December 2024, reflecting an upturn in the manufacturing sector. Additionally, the Wholesale Price Index (WPI) for February 2025 increased to 2.38%, up from 2.31% in January 2025, driven by higher fuel and power costs. The Manufacturing PMI for March 2025 improved to 58.1 compared to 56.3 in the previous month, indicating a quicker increase. Both monetary and fiscal strategies have shifted to encourage domestic spending and liquidity.

Both monetary and fiscal strategies have shifted to encourage domestic spending and liquidity. In the FY26 Union Budget, India's Finance Minister showcased the government's approach to boost consumption by allocating INR1 trillion in planned savings for taxpayers.

India's economic challenges might have troughed and trends in some key metrics indicate that the outlook is improving GDP grew at 6.2% in 3QFY25, picking up from the 5.6% lows of 2QFY25; (2) Food inflation has come off sharply over the last few months to 3.8% in Feb'25.

Index has corrected by 8.8% over the last six months with valuations now in line with ten-year averages. Earnings are likely to improve considering a low base and impact from higher capex and consumption allocation in budget. Key to watch would be impact of Trump tariff policies and monsoons.

Market Outlook - Fixed Income

Debt Market Commentary – April-2025

Escalating trade tensions have been swinging the world on an uncertainty around the plausible impact of the tariffs. The concerns are on its immediate impact on world growth and inflation. Directly making the policy makers walk through eggshells trying to balance rising prices and currency depreciation.

Source- Bloomberg, Data as on 31.03.2025

US FOMC Economic Projections in %		2025	2026	2027
Change in real GDP	Dec-2024 Projections	2.1	2.0	1.9
	March-2025 Projections	1.7	1.8	1.8
PCE Inflation	Dec-2024 Projections	2.5	2.1	2
	March-2025 Projections	2.7	2.2	2
Federal funds rate	Dec-2024 Projections	3.9	3.4	3.1
	March-2025 Projections	3.9	3.4	3.1

Source- Federal Reserve Summary of Economic Projections, Data as on 31.03.2025

The Fed kept its policy rate unchanged at 4.25-4.5%. The pace of balance sheet unwinding reduced to \$40 bn per month from \$60 bn. The March-25 economic projections reflected shift in inflation estimates on the upside. Whereas growth estimates were revised downwards. Fed Chair Powell stressed the high degree of uncertainty on activity and inflation outcomes but argued that economic parameters were shifting so slowly. The key message in the policy was to wait and watch, aligning with their pause on fed fund rate both on action and projection. Adding to this is the uncertainty around tensions between Russia and Ukraine, with significant implications on oil market as US threats to impose sanctions as high as 50%. Trade and geopolitical tensions have kept the global markets volatile.

Source- Bloomberg, Data as on 01.04.2025

The true winner amongst the major asset classes is gold. With gold prices touching a new high of ~\$3130, rising by ~37% y/y as on April 1st, 2025. Escalating tensions between Russia Ukraine and US sanctions threats on Russian oil is visible in rising brent prices. Brent prices have increased to 74\$/bl from their low of 69\$/bl in March-25.

Looking at Asian Economies, recent growth pickup in China offsets some of the growth uncertainty with pickup in China's demand to offset some of the tariff related negative effects on global production.

Domestic Economy –

Amidst volatile external environment, Indian economy continues to demonstrate resilience supported by sectoral performance and improving consumption trends. The Indian economy recorded a sequential pick-up in growth during Q3:2024-25 driven by private consumption and government spending. High frequency indicators suggest that aggregate demand

continued to remain resilient in Q4:2024-25. Tractor sales registered double-digit growth for the third consecutive month. The economic indicators show moderation in growth in certain sectors and not across the board.

Source- Bloomberg, Latest available Data as on March-2025

Despite headwinds to global trade and world demand, exports recorded a growth of 10.4%, primarily supported by services. With growth in exports surpassing that of imports, the net exports contributed positively to GDP growth by 2.5% in Q3:2024-25.

Government Borrowing- H1 FY26 –

Source: RBI, Data for H1 and FY26, as on March 28, 2025

The government has pegged H1FY26 gross g-sec borrowing at INR 8trn, which is 54% of full year borrowing. Similar to the issuance pattern year (H1FY25 actual issuance was 53% of full year). The issuances at 10 year and above is at 74.9% in H1 FY26, marginally lower than 76.8% in H1 FY25.

Domestic Inflation –

Source: Bloomberg, Data as on 12.03.2025

- Headline inflation has softened to 3.61% y/y in February-25 led by a continued decline in vegetable prices.
- The decline was also supported by a decrease in other food items.
- The estimate for March CPI inflation is tracking around 3.8%, after accounting for the continued decline in food prices in March-25 as well.
- The daily food price data by the department of consumer affairs indicates a further decline in vegetable, eggs, cereals, and pulses prices in first two weeks of March-25.
- The policy space to cut interest rate is supported by easing in inflation.

Domestic Liquidity –

Source: Bloomberg, Data as on 31.03.2025

- The liquidity deficit has seen a slow decline in March-25, compared to peak deficits later this year. Banking sector liquidity in India was at a deficit of Rs130 bn on March 27 compared to deficit of Rs2.3 tn on March 20.
- RBI has been infusing substantial liquidity into the system through Open Market Operations (OMO) (primary and secondary markets), USD-INR swap operations as well as Variable repo rate(VRR)s in spirit of the monetary policy stance.
- Following the liquidity, benchmark lending rate 1-Year median Marginal Cost of Funds based Lending Rate (MCLR) declined to 9% in March 2025 from 9.05% in February 2025.

Fixed Income Outlook –

- Global monetary policy dynamics have started witnessing bumps in their path to recalibrate the monetary rates.
- Trump's tariff threats and spillovers on currencies is the existing risk that is driving the markets volatile.
- On the domestic front, evolving growth dynamics have taken center stage.
- RBI's forward guidance and the rate cut gives us the confidence on growth supported future policy expectations.
- Recent softening in domestic inflations paves the way for RBI to take calibrated policy decisions.
- RBI has been infusing substantial liquidity into the system through Open Market Operations (OMO) (primary and secondary markets), USD-INR swap operations as well as VRRs in spirit of the monetary policy stance.
- In the H1 FY26 borrowing calendar, the amount to be borrowed in 5years segment as well as 10yr segment has gone up whereas the supply in the long bonds (30yr to 50yr) is lower versus last year.
- Having said that the overall reduction in borrowing duration is positive for bonds.
- Irrespective of the tools, liquidity measures are expected to have an impact on the short end of the curve.
- The spreads on the short end are already elevated and attractive and a rate cut going forward may compress the current spreads.
- In the light of above the fundamentals of India's fiscal demand supply remain balanced and that is expected to maintain a downside bias on yields.

Equity Investment Philosophy - Business, Management, Valuation (B.M.V.)

We believe that “companies create wealth and not markets” and thus the focus is on identifying businesses which could grow earnings at a faster rate for significantly long periods of time. Our in-house investment framework BMV (Business – Management – Valuation) helps us in identifying these companies. Thus, while investing we focus on all aspects of the company viz. quality of business, sustainability of growth, governance and price being paid for the company. All the companies which are part of the scheme portfolio have to pass through each of the BMV filters. And for us, all aspects are important. This drives the portfolio construction process and helps us identify stock picking opportunities across market cycles .

In search of companies with **superior** and **sustainable** earnings growth with **strong management**, at **reasonable valuations**.

MANAGEMENT

Leadership in:

- **Competency** basis management through market cycles (trend of sales, margins, capital allocation, etc.)
- **Corporate Governance** factors such as interest alignment with minority shareholders, Conduct and govern business with Transparency, Ethics and Accountability, organization structure, track record with respect to all shareholders

BUSINESS

Growth:

- Company growing faster than industry, industry growing faster than market
 - Structural and long-term sustainable growth
 - Focused and simple to understand
- Moat:** a sustainable competitive advantage arising from brand franchise, cost advantage, industry structure, technology/patents, distribution, etc.
- Change:** Positive change in sector, receding competitive intensity

VALUATION

- **Cash flow** is central to the way we think about a company's value
- **Valuations:** Intrinsic value, DCF (Discounted Cash Flow), Dividend Yield, Operating Cash Yield, etc.
- The narrower the 'moat' or weaker the management, the greater is the **margin of safety** required
- Superior **risk-reward** profile

^A sustainable competitive advantage

Data is as on month-on-month basis
Source- PIB, Bloomberg, RBI, MOSPI, SIAM, Office of Economic Advisor

The data mentioned above is as per their date of release and availability as on April 02, 2025.

Inflation lower than 4%, RBI rate cutting cycle and Liquidity supportive measures aid in softening of 10 year benchmark yield to 6.58% in March-25.

The WALR on outstanding rupee loans of SCBs declined to 9.8% in February-25 from 9.87% in January-25, following RBI's rate cutting cycle.

Buoyant domestic demand helped in recovering the ground lost in February-25. Registering 58.1 in March-25 Manufacturing Purchasing Managers Index (PMI) was up from 56.3 in February to its highest mark in eight months.

GST collection recorded second highest revenue at 1.96 lac crore in March-25. GST collections for Q4 FY25 remained strong led by pickup in economic activity.

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Baroda BNP Paribas Large Cap Fund

(An Open ended Equity Scheme predominantly investing in large cap stocks)

This product is suitable for investors who are seeking*:

- Wealth Creation in long term.
- Investments in diversified and actively managed portfolio of equity and equity related securities with bias to large cap companies

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Note on Segregated Portfolio: Due to credit event (Default of debt servicing by Yes Bank on March 6, 2020), securities of Yes Bank have been segregated from the scheme's portfolio w.e.f March 6, 2020. Yes Bank had, on March 14, 2020, informed the Stock Exchanges that the AT1 bonds were fully written down and had extinguished with immediate effect pursuant to Master Circular- Basel III Capital Regulations dated July 01, 2015 read with Section 45 of the Banking Regulation Act, 1949. On March 16, 2020, Axis Trustee Services Ltd., debenture trustee for the AT1 bonds, had led a writ petition in the Hon'ble High Court, Mumbai, inter alia seeking relief from the Court to set aside the decision to write off the AT1 bonds, and that the matter was sub-judice before the on'ble Court. Kindly refer to SID/KIM for complete details on segregation of portfolio.

Baroda BNP Paribas Corporate Bond Fund

(An Open ended Debt Scheme predominantly investing in AA+ and above rated corporate bonds. A relatively high interest rate risk and moderate credit risk scheme)

This product is suitable for investors who are seeking*:

- Capital appreciation and regular income in long term.
- Investment primarily in AA+ and above rated corporate bonds and the rest in debt and money market instruments.

*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Nifty 50 TRI (% CAGR*)	-0.08	N.A.	N.A.	N.A.	2.02

Inception Date : January 29, 2024

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Different plans shall have a different expense structure. The above data assumes investments in Growth option for distributor/regular plan.

Where returns are not available for a particular period, they have not been shown.

*% CAGR Returns are computed after accounting for the cash flow by using the XIRR method.

For further details on performance of the scheme and performance of other schemes managed by the Fund Manager, please refer to "Performance of Schemes" page. Please note TRI indicates Total Return Index.

Performance of Schemes

(as on March 31, 2025)

Returns in INR represents the value of Rs. 10,000 invested at the beginning of 1 year, 3 years, 5 years and since inception.

Past performance may or may not be sustained in future and is not a guarantee of future returns and should not be used as a basis of comparison with other investments. Returns do not take into account the load and taxes, if any. Returns are for growth option. Different plans shall have a different expense structure. Where scheme performance for last 3 and 5 years is not available, the same has not been shown. Performance of Baroda BNP Paribas Dividend Yield Fund, Baroda BNP Paribas Nifty 200 Momentum 30 Index Fund, Baroda BNP Paribas Nifty Midcap 150 Index Fund & Baroda BNP Paribas Children's Fund is not provided as the scheme has not completed 6 months. \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 - 21.82% \$ \$ Impact of segregation Fall in NAV - Mar 6, 2020 v/s Mar 5, 2020 - 2.24% \$ The inception date of Baroda BNP Paribas Corporate Bond Fund is November 8, 2008. However, since there was no continuous NAV history available for this plan prior to May 10, 2010, the point to point return from since inception may not be the true representation of the performance of the scheme. Hence the returns since May 10, 2010 have been considered for calculating performance for the since inception. * The scheme is a 'Transferee Scheme', and accordingly, the performance is being provided in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024 whereby the weighted average performance of both the Transferor Scheme and Transferee Scheme has been considered. * Returns in INR show the value of 10,000/- invested for last 1 year, last 3 years, last 5 years and since inception respectively. ** Total Return Index: Total Return Index: The total return index is a type of equity index that tracks both the capital gains of a group of stocks over time, and assumes that any cash distributions, such as dividends, are reinvested back into the index. Looking at an index's total return displays a more accurate representation of the index's performance. By assuming dividends are reinvested, you effectively account for stocks in an index that do not issue dividends and instead, reinvest their earnings within the underlying company. For example, an investment may show an annual yield of 4% along with an increase in share price of 6%. While the yield is only a partial reflection of the growth experienced, the total return includes both yields and the increased value of the shares to show a growth of 10%. Difference between total return index & price index: A total return index (TRI) is different from a price index. A price index only considers price movements (capital gains or losses) of the securities that make up the index, while a total return index includes dividends, interest, rights offerings and other distributions realized over a given period of time. † The scheme has been in existence since September 23, 2004. The performance given above is the blended performance of erstwhile BNP Paribas Large Cap Fund and erstwhile Baroda Large Cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda Infrastructure Fund to convert it to Baroda Large Cap Fund. ‡ The scheme has been in existence since May 02, 2003. The performance given above is the blended performance of erstwhile BNP Paribas Mid cap Fund and erstwhile Baroda Mid cap Fund in accordance with para 13.4 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024. The performance has been blended from Oct 03, 2016, i.e., the effective date of the change in the fundamental attribute of Baroda PSU Equity Fund to convert it to Baroda Mid Cap Fund.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.**

The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit, except for Baroda BNP Paribas Liquid Fund where the face value is ₹ 1,000 per unit.

Pursuant to distribution under Income Distribution cum Capital Withdrawal ("IDCW") option, NAV of the IDCW option of the scheme(s) would fall to the extent of payout and statutory levy (if applicable). The amounts under IDCW options can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. **Past performance may or may not be sustained in future and is not a guarantee of future returns.** The above stated distribution rate per unit is net distribution rate after deducting applicable taxes. The above distribution rates are on face value of ₹ 10 per unit.

How to Read Factsheet

Fund Manager: An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity: The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark: A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Note: Pursuant to para 1.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, uniform structure for benchmarking of schemes has been prescribed by SEBI. These uniform benchmarking of schemes indices are termed as first tier benchmark which reflects the category of the scheme.

Further, Association of Mutual Funds in India (AMFI), in consultation with AMFI Valuation Committee, has published the list of benchmark as 1st tier benchmarks for mutual fund schemes and the same is also made available on its website <https://www.amfiindia.com/research-information/other-data> and <https://www.amfiindia.com/importantupdates>.

Benchmark indices for Schemes of Baroda BNP Paribas Mutual Fund have been aligned with AMFI prescribed 1st tier benchmarks for mutual fund schemes effective December 01, 2021.

Entry Load: A mutual fund may have a sales charge or load

at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load: Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will redeem the fund at ₹ 101.

Modified Duration: Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta: Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile: Mutual funds invest in securities after

evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Concept of Macaulay duration: The Macaulay Duration is a measure of a bond's sensitivity to interest rate changes. It is expressed in annual terms. It is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Factors like a bond's price, maturity, coupon, yield to maturity among others impact the calculation of Macaulay duration. The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond. As it provides a way to estimate the effect of certain market changes on a bond's price, the investor can choose an investment that will better meet his future cash needs.

TER: TER refers to 'Total Expense Ratio' of the scheme and refer to the expenses that will be charged to the scheme. These costs consist primarily of management fees and additional expenses, such as trustee fees, marketing and selling expenses, auditor fees and other operational expenses. The total cost of the scheme is divided by the scheme's total assets to arrive at a percentage amount, which represents the TER, most often referred to as simply 'expense ratio' of the scheme.

In accordance with AMFI Best Practice guidelines circular no. 72/2018-19 dated June 26, 2018, the TER provided in this document refers to TER as on last day of the month and the same is being disclosed including additional expenses as per Regulations 52(6A)(b), 52(6A)(c) and GST. Further, for actual Expense ratio of the scheme, investors may refer to following link <https://www.barodabnpbarbasmf.in/downloads/total-expense-ratio-of-mutual-fund-schemes> on website of mutual fund.

Tracking Difference: Tracking Difference is the annualized difference in daily returns between the NAV of the ETF/Index Fund and its underlying index over a period of time.

Tracking Error: Tracking error indicates how closely the portfolio return is tracking the benchmark Index return. It measures the deviation between portfolio return and benchmark index return. A lower tracking error indicates portfolio closely tracking benchmark index and higher tracking error indicates portfolio returns with higher deviation from benchmark index returns.

Glossary

Here's a quick reckoner to know what each indicator measures.

Banking	
Currency in circulation (% YoY)	Measures cash in circulation and is an important indicator of economic activity particularly in the informal sector
M3 (% YoY)	Measures money supply and is linked to real GDP growth and inflation
Bank non-food credit growth (%YoY)	Measures total non-food bank credit growth. The key sub components are personal credit growth (home loan, auto loans, personal loan, credit cards etc.), credit to industry (loans for infrastructure, large corporates and large projects) and credit to services (loans given to NBFCs and service related industry). These are reflective of consumption in economy, industry's demand for credit and services' sector demand for credit respectively.
Personal credit (%YoY)	
Credit to industry (%YoY)	
Credit to services (%YoY)	
Deposit growth (%YoY)	Measures total deposit growth in the banking system
Credit to deposit ratio (%)	Total credit / Total deposits reflects credit demand vs. availability of funds in the banking system and hence scope for transmission of rate cuts.
10 year G-Sec yields (%)	G-Secs are securities issued by Central Government to borrow from financial market to meet its fiscal deficit. Gsec yields are determinant of the government's ability to service its debt.
Weighted average lending rate of Banks (%)	Lending rate for all loans
Weighted average deposit rate of banks (%)	Cost of deposits for banks
Median MCLR (%)	Margin lending rate for new loans. Indicator of effectiveness of monetary transmission
Commercial Paper issuance (%YoY)	Measures demand for short term funds of corporates via the market route. Also reflective of ease of access to funds.
Industry	
Cement production (% YoY)	Measures volume of cement production and determines the construction component of GDP
Steel production (% YoY)	Measures volume of steel production determines the construction component of GDP
IIP (%YoY)	
Mining (% YoY)	
Manufacturing (%YoY)	
Electricity (%YoY)	
Capital goods production (%YoY)	These are part of IIP manufacturing. Measures volume of domestic capital goods production which is (1) reflective of the capex cycle, (2) measures volume of consumer durable output including automobiles, and (3) measures volume of consumer non-durable output particularly FMCG products.
Consumer durable production (% YoY)	
Consumer non-durable production (% YoY)	
PMI Manufacturing Index	The Purchasing Managers' Index (PMI) is an index of the prevailing direction of economic trends in the manufacturing and service sectors. A lead indicator of manufacturing sector performance takes into account business sentiment on order book, prices, employment etc.
PMI Services Index	
PMI Composite Index	
Consumer	
Rural wage (% YoY)	Measures average rural wages which determines rural propensity to consume
Motorvehicle sales (%YoY)	
Passenger Vehicle (% YoY)	
Commercial Vehicle (% YoY)	
Two wheeler (% YoY)	
Tractor sales	
Petrol consumption (% YoY)	Measures volume of motor spirit consumption
Diesel consumption (%YoY)	Measures volume of high speed diesel consumption which reflects industrial activity in the economy
Air traffic (% YoY)	Domestic passengers flown, an important determinant of trade, hotels, transport storage and communication component of GDP.
Foreign tourist arrivals (%YoY)	Measures number of foreign tourist arrivals into the country, an important determinant of trade, hotels, transport storage and communication component of GDP.
Freight	
Major port traffic (%YoY)	Volume of cargo traffic at ports, proxy for EXIM and Domestic activity in the country
Rail freight traffic (% YoY)	Earnings from railway freight traffic and proxy for movement of goods in the country
Foreign Trade	
Export growth (% YoY)	Measures value of exports
Import growth (% YoY)	Measures value of imports
Capital goods imports (%YoY)	Measures value of capital goods imports and is reflective of the domestic capex cycle.
Fiscal	
Central Government expenditure (%YoY)	Measures total central government expenditure and is an important determinant of the public administration, defence and other services component of GDP.
Indirect tax (%YoY)	Measures total growth in indirect taxes and hence consumption. Also determines the taxes component of GDP.
Inflation	
CPI (%YoY)	Consumer price index (CPI) is defined as the change in the prices of a basket of goods and services that are typically purchased by specific groups of households. Whereas WPI measures change in wholesale prices for goods. Core CPI is consumer price inflation excluding food and fuel.
Core CPI (%YoY)	
WPI (%YoY)
